Erin Appleby, Caribou Soil Conservation District
Kristen Skinner, Private Landowner

Chapter 1: Purpose and Need

1: The Customs and Culture of Caribou County

Caribou County, Idaho, traces its origins back to the mid-19th century, during the westward expansion of the United States. The county's founding is deeply intertwined with the waves of pioneers who ventured into the rugged and untamed wilderness of the American West in search of new opportunities and a better way of life. The establishment of Caribou County can be attributed to a combination of factors, including the allure of fertile land, abundant natural resources, and the promise of economic prosperity. The discovery of gold and silver in the region in the late 1860s sparked a rush of settlers, drawn by the prospect of striking it rich in the burgeoning mining industry. As more settlers arrived, communities began to take shape, establishing rudimentary infrastructure and governance structures to support the growing population. In 1919, Caribou County was officially formed by the Idaho Legislature, carved out of neighboring Bannock County to better serve the needs of its residents. The county was named after Cariboo Fairchild who had taken part in the gold rush in Cariboo region of British Columbia in 1860. Over the years, Caribou County has evolved into a vibrant and resilient community, shaped by the trials and triumphs of its early settlers and pioneers. Over the years, Caribou County has evolved into a vibrant and resilient community, shaped by the trials and triumphs of its early settlers and pioneers. Today, the founding principles of perseverance, resourcefulness, and community spirit continue to guide the residents of Caribou County as they work together to build a bright and prosperous future for generations to come.

Courtesy of Caribou Historical Society

Access to the County's natural resources have historically been critical to the early settlers in this County, and they remain critical today. The Federal Government owns approximately 47.5% of the 1,118,00 acres of land in Caribou County. The State of Idaho owns 9.7% of land. The local governments own 0.2% acres, leaving 46.2% in private ownership. As a result, a map of the County displays a patchwork quilt of federal, state, and private land, illustrating the

diverse ownership patterns throughout the area. Access to and across the federal land is necessary for all private land owners to access not only their properties, water rights, grazing, and recreational enjoyment of federal lands.

Caribou County has long been cherished as a destination for outdoor recreation, drawing Idahoans and visitors from neighboring states eager to explore its vast open spaces. From motorcycling and ATV/UTV riding to mountain biking, horseback riding, hiking, rock and antler hunting, fishing, hunting, camping, and waterway activities, there's something for every outdoor enthusiast. However, access to Federal and State Land, crucial for these activities, is facing challenges. Blocked or restricted access has led to

Courtesy of Caribou Historical Society

individuals trespassing onto private property, resulting in damage to fences, fields, and unauthorized trails. This has sparked tensions between landowners and recreational users, with the potential for escalating conflicts. Despite these challenges, cooperative efforts in recent years have helped minimize conflicts, and recreational use has become an integral part of Caribou County's culture. Addressing the potential for significant increases in demand for recreational activities, including both current and unforeseen uses, necessitates cooperative planning and management efforts.

The people of Caribou County, Idaho, epitomize resilience, resourcefulness, and community spirit. Descendants of early pioneers, they cherish their deep roots in the land and honor the traditions passed down through generations. Tight-knit neighborhoods foster mutual support and cooperation, celebrating successes and lending a hand in times of need. Many are involved in agriculture, ranching, logging and traditional occupations, contributing to the county's economic vitality while respecting its natural resources. Despite rugged surroundings, their warm hospitality welcomes visitors to share in the county's beauty and charm, reflecting the enduring pioneer ethos of the American West.

Due to the paramount importance of property rights to its residents, Caribou County has made concerted efforts to uphold integrity and compliance with the Planning Act of 1975. The county's planning process is carefully crafted to uphold the cherished lifestyle that ensures the peaceful enjoyment of property rights and interests for all. The Planning and Zoning Commission has spent most of the years of planning activities in Caribou County, attention was placed on development of private lands. However, as federal policies shifted towards reducing livestock grazing, limiting recreation use, and asserting control over private property, water rights, and rights-of-way, it became evident that Caribou County would need to expand its planning efforts to address concerns regarding federal lands.

The Board of County Commissioners (Board) acknowledges the necessity for a local government plan that articulates Caribou County's intentions and goals concerning the management of

natural resources situated on public lands within the county. The Caribou County Natural Resource Plan is intended to be integrated by Federal and State agencies into their planning processes to ensure that their usage aligns with the county's preferences.

2: Economic Base of Caribou County

As of December 8, 2021 in the Caribou County Labor Force and Economic Profile of 2022 (appendix A) Caribou County boasted an annual Gross Domestic Product value of \$453,673,000. The county's primary economic drivers encompass agriculture, mining and manufacturing, and construction, with significant contributions from healthcare, education, and government sectors.

Agriculture: Farmers and ranchers in the county specialize in producing key commodities such as barley, beef cattle, potatoes, wheat, milk, and wool.

Mining and Manufacturing: Caribou County plays a pivotal role in phosphorus mining and manufacturing through companies like Bayer and Itafos. Phosphorus is utilized in various essential and convenience products, including crop protection for farmers. The county also houses industries focused on silica and lime mining, with three new mines in different stages of proposal and approval.

Construction: The construction sector in Caribou County encompasses both commercial and residential segments. Commercial construction supports projects for manufacturing and mining facilities, while residential construction is experiencing significant growth, leading to a heightened demand for contractors.

The county's economy heavily relies on commercial and business operations conducted on federal and state lands. Given that just under half of the county's land mass is privately owned,

Courtesy of Bryce Somsen

the effective utilization of this private land is directly reliant on a management approach for federal and state lands that aligns with the commercial and business activities. This compatibility ensures the economic stability of the county.

Privately owned land is intertwined with federal and state lands, meaning that management decisions regarding these lands directly impact the use and economic value of private land. For instance, restrictions or reductions in grazing on federal lands

Figure 49. Armstrong Shovel loader, Conda Mine, circa 1922. Photo from the Idaho State Historical Archives, #62-186-23.

Courtesy of Caribou Historical Society

may compel ranchers to downsize their herds, seek alternative grazing areas, increase reliance on costly harvested feed, or implement a combination of these measures. If a rancher must solely graze their herd on private land, they risk losing a vital source of winter forage. Similarly, in farming, regulations affecting water usage on federal lands could force farmers to find alternative irrigation sources or invest in costly water-saving technologies, impacting their crop yields and financial viability.

An ample water supply is essential for farming activities in the County. Restrictions on irrigation water use imposed by federal management agencies under the pretext of species protection could significantly impact the County's economy. Additionally, neglecting to manage uplands effectively to preserve productive watersheds could diminish irrigation water supplies and further harm the County's economy.

Caribou County, Idaho, relies on a variety of taxes to sustain its operations and services. Chief among these is the ad valorem property tax, assessed based on the value of real and personal property within the county's jurisdiction. These vital tax streams play a significant role in funding essential services such as education, public safety, infrastructure maintenance, and social programs. Diversifying tax revenue sources enables Caribou County to maintain financial stability and adequately address the needs of its residents and communities. However, limitations on the tax base, stemming from federal or state restrictions, could exert financial strain on local ranchers and farmers, potentially leading to business closures. Such outcomes would not only impact the county's tax revenue but also diminish business income within the county and surrounding regions.

The County recognizes the financial importance of Payments in Lieu of Taxes (PILT), which offer federal funds for diverse public needs. Yet, it's crucial to understand that this funding is contingent upon Congress's discretion and could cease abruptly. Hence, the County must uphold its dependence on a financially robust tax base sustained by practical private land utilization.

Given Caribou County's vast expanse and relatively small population, it relies on all available economic resources, with a particular emphasis on maintaining them at optimal levels. To uphold and bolster the county's economic stability, the Board of County Commissioners, along with its officials and departments, are committed to a cohesive land use planning effort. This effort aims to establish standards set by Congress, ensuring the continued multiple use of federal lands and thereby sustaining the county's economic viability.

3: Multiple Use and Coordination with Federal and State Agencies

This plan serves as a constructive framework for the Board to synchronize their endeavors with federal and state land management agencies. Its purpose is to develop and execute land use plans and management actions that align with the welfare of Caribou County and its residents. The plan is crafted to facilitate the ongoing and rejuvenated multiple use of federally and state managed lands within the county.

The Board, and the citizens of Caribou County acknowledge the federal mandate for multiple use of federally managed lands and strongly advocate for such multiple use. This commitment includes the ongoing preservation of historic and traditional economic activities conducted on federally and state managed lands within the County. Therefore, it is the policy of Caribou County that the Board maintain continuous communication with federal and state agencies. They ensure that all pending or proposed actions concerning land use, local communities, and County citizens are communicated to the Board and coordinated with them in the planning and execution process (Refer to Appendix B, Federal Land Policy and Management Act).

Federal laws mandate such coordination of planning. The Federal Land Policy and Management Act, 43 U.S. § 1701, establishes the National Policy, affirming that "the national interest will be best realized if the public lands and their resources are periodically and systematically inventoried, and their present and future use is projected through a land use planning process coordinated with other federal and state planning efforts" (Refer to 43 USC § 1701 (a) (2)).

43 U.S.C. § 1712 (c) outlines the "criteria for development and revision of land use plans." Section 1712 (c) (9) specifically addresses the coordinated status of counties involved in land use planning. It mandates that the Secretary of the Interior "shall" ensure the coordination of land use inventory, planning, and management activities with the programs of other federal departments and agencies, as well as with state and local governments within the relevant lands' jurisdiction. This provision prioritizes counties engaged in land use planning programs over the general public, special interest groups, and even counties not participating in such programs.

Section 1712 also mandates that the Secretary "shall" "assist in resolving, to the extent practical, inconsistencies between federal and nonfederal government plans." This provision similarly prioritizes counties engaged in the planning process over the general public, special interest groups, and even counties not participating in land use planning. Given the requirement for the Secretary to "coordinate" land use inventory, planning, and management activities with local governments, it is reasonable to interpret the resolution of inconsistencies as occurring during the planning cycle, rather than at the conclusion when a draft federal plan is released for public review.

The section also mandates that the "Secretary [of Interior] shall" ensure "meaningful public involvement of state and local government officials... in the development of land use programs, land use regulations, and land use decisions for public lands." When interpreted alongside the requirement to "coordinate" activities, it is reasonable to interpret "meaningful involvement" as ongoing consultations and participation throughout the planning cycle, rather than solely at its conclusion. This provision also underscores the distinction between local government officials and members of the general public or special interest groups of citizens.

Section 1712 (c) (9) additionally stipulates that the Secretary of the Interior must ensure that the BLM's land use plan is "consistent with State and local plans" to the fullest extent permitted by federal law and the objectives of the Federal Land Policy and Management Act. It is logical to interpret this statutory provision in conjunction with the requirement for coordinated involvement in the planning process.

The provisions outlined in Section 1712 (c) (9) delineate the scope of coordination mandated by the Bureau, encompassing planning endeavors undertaken by Indian tribes, other federal agencies, and state and local government officials. Additionally, Subsection (f) of Section 1712 introduces an additional requirement, stipulating that the Secretary of the Interior "shall allow an opportunity for public involvement," which includes Federal, State, and local governments. Importantly, the "public involvement" provisions of Subsection (f) do not restrict the coordination language of Section 1712 (c) (9) or permit the Bureau to indiscriminately group local government officials with special interest groups or the general public.

The coordination requirements outlined in Section 1712 (c) (9) specifically emphasize the involvement of government officials participating in the land use planning process, such as Caribou County. This statutory distinction is logical, considering the Board's responsibility to plan for future land uses that benefit all County residents and ensure the continued functioning of government in the best interests of the people of Caribou County.

In the case of *American Motorcyclist Association v. Watt*, 534 F. Supp. 923 (U.S.C.D. Cal. 1981), the Court ruled that a County had the right to challenge the implementation of a Conservation Plan issued by the BLM based on the coordinated planning provisions of FLPMA. The Court highlighted that FLPMA mandates the Secretary of the Interior to ensure meaningful involvement of local government in developing plans and regulations. Additionally, the Court specifically referenced FLPMA's requirement for federal land use plans to align with local plans.

The National Environmental Policy Act mandates that all federal agencies assess the environmental impacts of their actions, as well as the effects on the preservation of the culture, heritage, and customs of local governments. In 16 U.S.C. § 4331 (a) (4), the law states:

"It is the continuing responsibility of the federal government to use all practicable means, consistent with other essential considerations of national policy, to: (4) Preserve important historic, culture, and natural aspects of our national heritage."

According to the definition provided by Webster's New Collegiate Dictionary (1975), the term "culture" encompasses customary beliefs, social forms, and material traits of a group, representing the integrated pattern of human behavior passed down to succeeding generations. Therefore, by definition, the National Environmental Policy Act mandates that federal agencies take into account the impact of their actions on the customs of the people, as demonstrated by their beliefs, social forms, and "material traits."

It is logical to interpret this provision of the National Environmental Protection Act as necessitating that federal agencies take into account the effect of their actions on rural, range-oriented, agricultural counties like Caribou County. Here, families have relied on the "material traits" of ranching, farming, mining, and other agricultural industries for their economic sustenance across generations.

The Endangered Species Act mandates that the Secretary of the Interior and the management agencies under their supervision collaborate with local government to address water resource issues. Moreover, the Act stipulates that the Secretary can only make a listing decision after considering the efforts made by local government to protect species. Similarly, the Outdoor Recreation Coordination Act of 1963 requires the Secretary of the Interior to take into account local government plans and offer cooperation regarding recreational uses of federal lands (see 16 U.S.C. Section 460L-1(c) (d)).

Caribou County has recently developed its 2023 Comprehensive Plan focusing on privately owned lands within the county. This Land Use Plan has now been expanded to encompass the management of federally and state-managed lands. By adopting this Plan, the County establishes a "Comprehensive Plan" covering all land within the jurisdiction of the governing Board, as directed by the legislature. Idaho Code § 67-6528 stipulates that "the state of Idaho, and all its agencies, Boards, departments, institutions, and local special purpose districts, shall comply with all plans and ordinances adopted under the Local Planning Act." These statements affirm the purpose and obligation to plan, as well as the duties of state agencies to adhere to plans adopted under the Local Planning Act, indicating the expectation of coordination between state agencies and the local planning efforts of Caribou County.

The Board are now urging federal and state management agencies to coordinate in advance with the Board regarding any proposed actions that may affect federally and state-managed lands in Caribou County, as well as private property rights, interests, and investment-backed expectations of the county's citizens. This coordination is essential to safeguard the economic stability and historically developed customs and culture of the county, as outlined in this Land Use Plan. These management agencies are kindly requested to provide the Board with a timely report detailing the proposed action, its purposes, objectives, and estimated environmental, social, cultural, and economic impacts before taking official action.

In essence, the Board are requesting from federal management agencies only what is mandated by the federal laws governing their management processes, as well as Executive

Order 12630 issued by former President Reagan on March 15, 1988, and the guidelines established for all federal agencies by the Attorney General of the United States. Similarly, from state management agencies, the Natural Resources Committee and the Board are requesting no more than what was clearly intended by the Idaho Legislature through the enactment of the Local Planning Act of 1975.

In return for federal management agencies' compliance with federal law, the Board pledge to uphold a constructive planning process, ensuring the County's dedication to genuine multiple use of federally managed lands. Additionally, in exchange for the involvement of state management agencies, the Board pledge to foster a positive planning process that prioritizes the fair consideration of the best interests of all residents of the state of Idaho regarding the use of state-managed lands. The County is committed to making efforts to establish and maintain Memoranda of Understanding with these agencies, facilitating improved implementation of coordinated planning efforts.

Caribou County is committed to ensuring that all natural resource decisions affecting the county are guided by key principles. These principles include maintaining and enhancing the multiple use of federally and state-managed lands, safeguarding private property rights and interests, preserving local historical customs and culture, and protecting the traditional economic structures that underpin the county's economic stability. Additionally, Caribou County aims to promote the opening of new economic opportunities through reliance on free markets and to ensure that all citizens of the county have the right to enjoy the natural resources within the county. The county firmly believes that coordinated resource and land use management decisions involving federal, state, and county officials will not only maintain and improve multiple land use in Caribou County but also enhance environmental quality throughout the county.

Continuing with the planning process, the Board have outlined in this Land Use Plan the positive general concepts they deem necessary and beneficial for maintaining and revitalizing multiple land use, as well as ensuring economic stability and preserving the county's customs and culture. This Land Use Plan will serve as a guiding framework for ongoing land use planning efforts in Caribou County. It's worth noting that on February 12th, 2024, the Board specifically requested the initiation and drafting of this plan.

This action by the Board reflects the ongoing commitment and active participation in land use planning and management demonstrated by the people of Caribou County, their elected governing officials, and other interested groups and individuals involved in the management of federally managed lands within the county. The General Planning Guidelines outlined in Chapter 2 of this Plan will outline Management Actions aimed at maintaining and enhancing multiple uses of natural resources, where applicable. Additionally, they will include statements detailing actions that the Board can take to implement objectives established by the Board itself.

Chapter 2: Primary Planning Guidance

Planning

A Natural Resource Plan is a comprehensive strategy or framework crafted to sustainably manage and conserve natural resources within a designated geographic area or ecosystem. Its primary objective is to enhance the long-term ecological health, resilience, and socio-economic benefits derived from natural resources while mitigating negative impacts on the environment. This plan encompasses the inception process of the land use program, outlines general standards through guidelines, and delineates specific Management Actions aimed at achieving defined goals and objectives.

The planning process is ongoing, requiring relevant county departments and the Board to be involved in analyzing and evaluating all stages of the planning cycles followed by federal and state management agencies. This includes plan development as well as implementation, which involves monitoring and evaluating the plan's execution.

General Guidance and Standards

The federal lands, comprising more than half of Caribou County's land area, are under the management direction of the United States Congress. According to Article IV, Section 3(2) of the United States Constitution, Congress has the authority "to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." Congress has enacted numerous statutes to exercise this constitutional power and authority. While many of these statutes authorize executive management agencies' secretaries to issue rules and regulations for implementation, it's important to note that the management power and authority ultimately reside with Congress. The management agencies simply oversee the land on behalf of Congress. Their regulations must align with the statutes and must not exceed the authority granted by them.

The Board of Commissioners have developed this plan to serve as a means of coordinating planning activities with federal and state management agencies. This underscores the county's obligation to its citizens and to Congress under the provisions of the Federal Land Policy Management Act, which require coordination of planning by federal agencies.

By engaging in coordinated planning efforts, it is possible to effectively manage federal lands to ensure sustained productivity for both present and future generations. This approach aims to uphold the quality of resources, safeguard private property rights and interests, promote full multiple use, and preserve the customs, culture, and economic stability of the County.

Several broad areas of management present issues that require resolution through coordinated planning. This section of the Plan outlines the principles guiding these general areas of management, offering overarching guidance for addressing specific management issues. Building upon the standards outlined in statutes and the general principles from Chapter II, Chapter III identifies specific management techniques and actions necessary to achieve the identified objectives. Periodically, the Planning Department and the Board will request reports on these principles and specific management techniques and actions. These reports will contribute to the ongoing planning process and, upon adoption, will be incorporated into the Plan through amendment.

1: Private Property

Property rights are fundamental to citizens in Caribou County, serving as a cornerstone of individual liberty, economic prosperity, and societal stability. These rights empower individuals to own, use, and enjoy their land, homes, and other assets without unwarranted interference from the government or other entities. The importance of property rights for citizens in a county can be articulated in several key aspects:

1. **Economic Empowerment:** Property ownership provides individuals with a sense of economic security and stability. It allows them to build wealth through investments in real estate, start businesses, and engage in productive activities that contribute to local economic growth.
2. **Personal Freedom:** Property rights enable individuals to make autonomous decisions about how they utilize their land and resources. This autonomy fosters personal freedom and self-determination, allowing citizens to live according to their own values and preferences.
3. **Community Stability:** Strong property rights contribute to the stability and cohesion of communities. When individuals have secure ownership of their homes and land, they are more likely to invest in their properties, participate in local affairs, and contribute to the overall well-being of the community.
4. **Environmental Stewardship:** Property rights incentivize responsible stewardship of natural resources and the environment. When individuals have a vested interest in their land, they are motivated to conserve and protect it for future generations, leading to sustainable land management practices.
5. **Legal Protection:** Property rights are enshrined in law and serve as a bulwark against government overreach and infringement on individual liberties. They provide citizens with legal recourse to defend their property against unjust takings, regulations, or encroachments. The Fifth Amendment to the United States Constitution further reinforces these rights by stipulating that private property cannot be taken for public use without just compensation.

6. **Social Equity:** Property rights promote social equity by providing individuals from diverse backgrounds with opportunities for homeownership and economic advancement. Access to property ownership fosters a sense of belonging and inclusion within the community.

In summary, property rights are fundamental to the citizens of a county as they serve as the foundation for economic prosperity, personal freedom, community stability, environmental stewardship, legal protection, and social equity. Upholding and safeguarding these rights is crucial for cultivating vibrant, thriving, and resilient communities.

To ensure the protection of property rights, the Board and relevant county departments will diligently assess all federal or state actions concerning private property and interests, including investment-backed expectations, in accordance with the mandate of the Fifth Amendment to the United States Constitution. Additionally, they will adhere to the principle established by former President Ronald Reagan's Executive Order 12630, which requires federal agencies to conduct a Takings Implication Assessment before taking any action that could constitute a taking of private property or interests. Efforts to advocate for legislation to formalize the impact of this Executive Order into law will also persist.

Recent developments, such as Executive Order 13892 issued by President Donald Trump, aim to promote transparency and fairness in civil administrative enforcement and adjudication, emphasizing adherence to legal principles and due process in government actions affecting private interests. Additionally, the introduction of the Private Property Rights Protection Act of 2020 in the U.S. House of Representatives underscores ongoing efforts to strengthen protections for private property rights and limit government takings, particularly in instances where eminent domain is used for economic development purposes.

In addition, the departments will evaluate actions by federal and state regulatory agencies impacting water rights, constitutionally guaranteed by the Idaho Constitution, as compensable rights. They will also assess actions taken in the name of protecting threatened or endangered species, which may adversely affect private property rights, interests, and investment-backed expectations. The standards by which such regulatory actions will be reviewed are those established by decisions of the United States Supreme Court. The county will continue to advocate for specific private property protection from species listings.

Moreover, proactive planning and action will be taken to ensure that private property rights, interests, and investment-backed expectations are protected in accordance with the standards set forth in relevant legal frameworks. However, it is important to note that property owners will still need to adhere to local zoning ordinances and regulations to ensure that land use aligns with community goals and maintains public health, safety, and welfare.

2: Livestock Grazing and Agriculture and Irrigation Practices

Caribou County in Idaho plays a pivotal role in the state's agricultural landscape, contributing significantly to both livestock production and crop cultivation. According to the 2017 Census of Agriculture, Caribou County stands out, ranking 18th out of 44 counties in terms of Agricultural Products Sold. Livestock grazing is at the heart of the county's agricultural economy, with vast grazing lands supporting various livestock species, including cattle and sheep. Caribou County ranks 16th among counties in terms of grazing lands and generated \$34,113,000 in production sales.

Courtesy of Kyle Mills

In addition to livestock, crop production is a significant component of Caribou County's agricultural sector. Ranking 17th out of 44 counties in crop production, the county generated \$56,207,000 in crop sales, highlighting its substantial contribution to Idaho's agricultural economy.

Federal legislation, such as the Taylor Grazing Act of 1934, along with subsequent acts like the Federal Land Policy and Management Act of 1976 and the Public Rangelands Improvement Act of 1978, form the cornerstone of land management policies in the western United States. These laws mandate the preservation of the stability of the western livestock industry while promoting the multiple use management of federally managed lands. Collaborating with Caribou County and relevant stakeholders, the Bureau of Land Management plays a critical role in implementing management practices aimed at improving range conditions, restoring forage resources, and ensuring the sustainable use of allocated forage by permitted livestock.

Courtesy of Ty Barfuss

Sustaining current levels of livestock production, preserving wildlife habitat, protecting watersheds, and providing recreational opportunities are essential for Caribou County's economic prosperity and environmental sustainability. Adhering to statutory mandates outlined in federal land management acts is crucial for preserving the quality of life and safeguarding the diverse ecological, environmental, and cultural values inherent to Caribou County. The commitment to

supporting the stability of the livestock industry is vital for upholding the county's economic prosperity and natural heritage.

The importance of agriculture is further underscored by the Idaho legislature in Idaho Code, § 67-6529, which prohibits any ordinance or resolution that would impede the full and complete use of agricultural lands for production purposes. This legislative recognition emphasizes the imperative to preserve established agricultural uses, even within comprehensive planning and zoning statutes.

Goals, Action Objectives, and Evaluations

- **GOAL:** To maintain Caribou County's integral role in Idaho's agricultural sector, promoting economic prosperity and environmental sustainability in livestock production and crop cultivation. This involves collaborating with stakeholders to implement effective land management practices guided by federal legislation, preserving the stability of the livestock industry and protecting agricultural lands for production purposes. By upholding these mandates, we ensure the county's agricultural heritage and long-term prosperity.
 - **Action Objectives:**
 - Collaborate with stakeholders to develop and implement sustainable land management practices prioritizing soil health, water conservation, and wildlife habitat preservation.
 - Ensure grazing permits and land use agreements on federal lands align with sustainable agriculture, conservation goals, and local economic needs.
 - Provide education programs to farmers and ranchers on sustainable agriculture practices, including soil conservation and water-efficient irrigation.
 - Promote adoption of conservation easements and land stewardship agreements to protect wildlife habitats and maintain open space.
 - Advocate for state and federal policies supporting agricultural sustainability.
 - Monitor agricultural practices' impacts on environmental quality to inform adaptive management strategies and policy decisions.
 - Partner with universities and research institutions for applied research on innovative farming practices.
 - Conduct public outreach to raise awareness about sustainable agriculture and environmental stewardship among residents and policymakers.
 - **Evaluations:**
 - Measure the adoption of sustainable land management practices and evaluate changes in soil health, water usage efficiency, and wildlife habitat quality over time.

- Assess the impact of grazing permits and land use agreements on federal lands on ecosystem health, biodiversity, and range condition.
- Track participation in education programs on sustainable agriculture and assess changes in farming practices and productivity.
- Monitor the implementation of conservation easements and assess changes in habitat quality and landscape connectivity.
- Evaluate the effectiveness of state and federal policies in promoting agricultural sustainability and improving environmental quality.
- Conduct regular monitoring of environmental indicators to track the overall health of agricultural landscapes.
- Assess the outcomes of research projects on innovative farming practices and their impact on productivity and environmental performance.

Measure changes in public awareness and support for sustainable agriculture through community engagement activities.

3: Vegetation Management

Both the Taylor Grazing Act and the Federal Land Policy and Management Act clearly mandated the maintenance and enhancement of vegetation on federally managed lands to support livestock and wildlife forage, as well as habitat improvement. However, the Public Rangelands Improvement Act of 1978 provided even more explicit instructions to federal managers. In 43 U.S.C. § 1901, Congress acknowledged that federally managed lands were not reaching their full potential in terms of providing benefits such as livestock and wildlife habitat, recreation areas, forage, and water and soil conservation. It was recognized that inadequate vegetation conditions were hindering the expansion of forage resources, thereby limiting benefits to livestock and wildlife production. The Congress also highlighted the potential long-term consequences of unsatisfactory vegetation conditions, including unpredictable climatic and economic changes at local and regional levels.

To address these concerns, Congress called for comprehensive planning and improvement efforts to enhance the condition of federally managed rangelands. The goal was to maximize productivity across all rangeland values, emphasizing the need for intensive management to achieve this objective.

Under federal statutes outlining planning and management responsibilities for federally managed lands, it is evident that efforts must prioritize the enhancement and expansion of forage resources. Caribou County acknowledges its commitment to adhering to sound planning principles and meeting the requirements outlined in federal statutes. As such, the county is obligated to devise and obtain federal approval for strategies aimed at improving and expanding forage development on federally managed lands within its jurisdiction.

In the 2017 All-Hazard Mitigation Plan, it indicates that county contain 15 classified land covers according to the 2006 National Land Cover Database. It classified Deciduous Forest Evergreen Forest, Mixed Forest, and Shrub/Scrub each rank at greater than 20% of total cover.

Expanding forage resources can be achieved through various means, including implementing proper grazing management practices, developing water resources, reseeding initiatives, and addressing invasive vegetation that poses a threat to the true multiple-use value of federally managed lands. When planning for vegetation management, both the Committee and the Board will consider the following general principles:

a. Livestock Grazing

Livestock grazing will be carefully managed to preserve and enhance desired plant communities, aligning with the objectives outlined in the Public Rangelands Improvement Act. This approach aims to benefit watersheds, wildlife, water quality, recreation, and livestock grazing. Through effective planning and management principles, tailored strategies will be developed for each allotment within the County to achieve these goals.

Allotment Management Plans will encompass necessary grazing management enhancements, including but not limited to water development, juniper, cedar, and sagebrush control, reseeding, fencing, salt distribution plans, herding strategies, and grazing systems. Decisions regarding these improvements will be made at the allotment level, considering their integral role in the utilization of state leases, private leases, private lands, other allotments, and the overall operation of each ranch enterprise.

To adhere to the multiple-use concept mandated by statutes, vegetation management decisions will not arbitrarily prioritize any individual resource value. Congress has directed that federally managed rangelands be managed, maintained, and improved to maximize productivity across all rangeland values. However, it's crucial to address the challenges of overgrazing and under grazing, which have become significant problems. These issues can adversely affect the health of rangelands, leading to degraded ecosystems and diminished ecosystem services.

In order to fulfill this congressional mandate, the Bureau of Land Management must conduct inventory and identify current conditions and trends on public rangelands. All planning efforts will strictly adhere to the consultation, coordination, and cooperation requirements outlined in federal statutes. This includes careful consideration of 43 U.S.C. § 1701(a)(2); §1712(c)(9); §1752(d).

b. Vegetation Management

Caribou County is facing numerous vegetation management challenges across state and federal grounds. The widespread presence of dead trees, deadfall, and beetle kill presents significant concerns, while certain areas with Conservation Reserve Program (CRP) vegetation pose clear fire hazards. The proliferation of Cheat Grass further exacerbates fire risks. Additionally, some areas are experiencing overgrazing, while others are being neglected, highlighting the need for comprehensive management approaches.

Without concerted efforts to control this invasion and expansion, the watersheds, wildlife habitats, water quality, recreational opportunities, and grazing resources of these lands face the risk of destruction or significant degradation. Plans aimed at preserving these vital resources and their value to citizens will thoroughly review and incorporate all applicable means for reversing the invasion and expansion.

In the Public Rangelands Improvement Act, Congress identified that "vast segments" of federally managed rangelands are underperforming in terms of livestock production, wildlife habitat, recreation, forage availability, water resources, and soil conservation benefits, thereby characterizing them as being in an unsatisfactory condition (43 U.S.C. § 1901 (a) (1)). This description accurately reflects the areas within Caribou County affected by uncontrolled encroachment and expansion.

Furthermore, the Federal Land Transaction Facilitation Act (FLTFA) of 2000 aimed to enhance federal land management by authorizing the sale or exchange of certain federal lands to address issues such as land use conflicts, habitat fragmentation, and the consolidation of federal land ownership. FLTFA provided funding for conservation projects, habitat restoration, and land acquisition to improve the management of federal lands and their ecological values. These legislative efforts demonstrate ongoing attempts to address vegetation management challenges and enhance the overall management of federal lands.

c. Fire Management

The collaboration between local volunteer fire departments and state and federal firefighting agencies has proven invaluable in tackling wildfires that extend beyond county jurisdiction. State and Federal Firefighters bring expertise and resources that greatly enhance firefighting operations, ensuring a coordinated and comprehensive response. Their professionalism, dedication, and specialized equipment play a crucial role in mitigating the impact of wildfires on both public and private lands. However, opportunities for improvement exist, such as enhancing communication channels, streamlining resource

allocation processes, and conducting regular joint training exercises to optimize synergy between firefighting entities.

According to the 2017 All-Hazard Mitigation Plan for Caribou County, section 5.17 focuses on Wildland Fires. In the designated Wildland-Urban Interface (WUI), the county's risk model predominantly categorized it as facing a High to Moderate risk of wildfire. The designated High risk encompasses the majority of federal and state ground. Furthermore, data from 1987 to 2013 revealed that reported wildfires had burned approximately 29,365 acres within the county.

Courtesy of Caribou Fire Department

Collaboration with the Bureau of Land Management (BLM) is crucial in critical firefighting situations. Working alongside BLM personnel enhances firefighting efforts and improves overall outcomes. Proper management of state and federal ground is essential to mitigate fire escalation risks, safeguarding both private property and public lands.

Implementing a "Let it burn" policy in areas where invading shrubs and trees threaten rangeland values is imperative. Controlled burns emerge as a viable strategy to revitalize rangeland vegetation, supporting multiple uses. Grazing rest prescriptions, tailored to specific sites, may include measures like timing burns, implementing light late-season grazing post-burn, and moderate late-season grazing in subsequent years. Post-fire grazing activities are permissible with impartial post-fire monitoring indicating minimal harm to the range.

Furthermore, the Healthy Forests Restoration Act (HFRA) of 2003 addresses wildfire management and forest health on federal lands. HFRA aims to reduce catastrophic wildfire risks by promoting fuel reduction activities, forest thinning, and ecosystem restoration. It emphasizes collaborative approaches involving federal, state, tribal, and local stakeholders to enhance forest resilience and protect communities from wildfire hazards.

d. Noxious Weed Control

The Board and the Weed Department Superintendent jointly serve as the designated weed control authority for Caribou County, as stipulated in Idaho Code, Section 22-2474. Ongoing efforts are underway to detect and address the presence of various noxious weeds, including musk thistle, Leafy Spurge, Canada Thistle, Scotch Thistle, Dalmatian Toadflax, Yellow Toadflax, Hounds Tongue, Black Henbane, Spotted Knapweed, Russian Knapweed, Purple Loosestrife, Whitetop, among others. These initiatives involve implementing management or eradication strategies as needed.

State agencies are mandated by law to manage noxious weeds on state-managed lands, with provisions for collaboration with federal agencies to control noxious weeds on federally managed lands, as outlined in Idaho Code, Section 22-2476. The Federal Public Rangelands Improvement Act encourages such collaboration to address the "unsatisfactory condition" of federally managed rangelands.

To safeguard vital land resources from the encroachment of noxious weeds, Caribou County will engage in cooperative agreements, such as the Jordan Valley Cooperative Weed Management Area, and pursue legal action when necessary. Further information is available on the following websites:

- Public Access to Information: <https://invasivespecies.idaho.gov/plants>
- Idaho Invasive Species Law: <https://invasivespecies.idaho.gov/laws-and-rules>

e. Water Quality, Riparian Areas and Wetlands

In Caribou County, the State of Idaho is responsible for overseeing water quality enhancement and protection, particularly concerning both point and non-point water quality impacts. This plan focuses on addressing non-point impacts through the development of site-specific Best Management Practices (BMPs) for waters identified as not meeting beneficial use(s).

Priority will be given to areas with documented water quality issues for the development and implementation of allotment management plans. These plans will take a watershed management approach rather than focusing on specific sites due to the wide variation in riparian types, conditions, and potential for improvement.

BMPs for riparian management will be grounded in the best available science and tailored to meet the needs of ranch operations. Additionally, local customs, culture, economic stability, and private property rights will be safeguarded in the application of riparian area management plans.

Decisions regarding riparian management will be made on a site-specific basis, taking into account factors such as stream types, climatic conditions, watershed impacts, and management opportunities.

State of Idaho Water Quality Standards define BMPs as the most effective and practical means of preventing or reducing pollution generated by non-point sources. Non-point source activities must demonstrate a knowledgeable and reasonable effort to minimize adverse water quality impacts, considering the best available science and the economic feasibility for the ranch operation(s) involved.

Monitoring data showing an upward trend will be used to assess the adequacy of site-specific BMPs and ensure compliance with Idaho Water Quality Standards. Adjustments to BMPs may be necessary based on monitoring results.

Management plans will also recognize off-site impacts within watersheds and consider limitations to management, improvement potential, and end-point conditions. Attributes such as stubble height and utilization will not be used as management objectives but may be addressed through Proper Grazing Management Programs or other BMPs.

Caribou County will conduct a careful evaluation of the implementation of wetlands provisions under the Clean Water Act of 1988 to ensure that individuals adversely impacted by such implementation are compensated in accordance with the 5th Amendment to the United States Constitution. The cost of determining land as a "wetland" should be borne by society as a whole rather than individual landowners.

f. Wildlife Interface

The presence of diverse wildlife and healthy habitats in Caribou County not only contributes to the county's natural beauty but also supports various economic and recreational activities. Wildlife-related tourism, such as hunting, fishing, and wildlife viewing, attracts visitors from near and far, boosting local businesses and generating revenue for the county. Moreover, the cities within our county are outlined in the wildland-urban interface (WUI), where human development meets natural areas. This juxtaposition often results in encounters between residents and wildlife, highlighting the importance of maintaining balanced ecosystems and promoting coexistence strategies to ensure the safety of both humans and animals.

<https://www.federalregister.gov/documents/2001/01/04/01-52/urban-wildland-interface-communities-within-the-vicinity-of-federal-lands-that-are-at-high-risk-from#h-27>

Goals, Action Objectives, and Evaluations

- **GOAL:** To enhance the ecological health and productivity of federally managed lands within Caribou County, prioritizing vegetation management, wildfire mitigation, noxious weed control, water quality improvement, and riparian area preservation, in alignment with federal statutes and collaborative stakeholder efforts.
 - **Action Objectives:**
 - Develop and implement comprehensive vegetation management strategies to improve forage resources and wildlife habitat on federally managed rangelands, guided by federal statutes and consultation with stakeholders.
 - Collaborate with federal agencies, local fire departments, and other stakeholders to enhance wildfire management and mitigation efforts, including controlled burns and proactive fire suppression measures.
 - Implement noxious weed control programs on state and federal lands, in coordination with state agencies and cooperative weed management areas, to prevent the spread of invasive species and protect native vegetation.
 - Enhance water quality and riparian area management through the development and implementation of site-specific Best Management Practices (BMPs), focusing on non-point source pollution reduction and watershed management.
 - Monitor and evaluate the effectiveness of management actions through regular assessments of vegetation condition, wildfire impacts, weed infestation levels, water quality parameters, and riparian area health, adjusting strategies as needed to achieve desired outcomes.
 - Advocate for federal funding and support to address vegetation management, wildfire mitigation, noxious weed control, and water quality improvement efforts on federally managed lands within Caribou County.
 - Ensure compliance with federal statutes and regulations governing vegetation management, wildfire mitigation, noxious weed control, water quality enhancement, and riparian area preservation on federally managed lands, while also safeguarding private property rights and local economic stability.
 - Evaluations:
 - Assess vegetation management effectiveness by monitoring forage resources, wildlife habitat quality, and vegetation condition on federally managed lands using standardized protocols.

- Evaluate wildfire mitigation success by tracking wildfire occurrence and severity, comparing pre- and post-mitigation data.
- Measure noxious weed control program effectiveness by monitoring weed infestation levels and native vegetation abundance on state and federal lands.
- Assess water quality improvement initiatives by monitoring key parameters in riparian areas and water bodies, identifying trends over time.
- Evaluate riparian area preservation efforts by assessing vegetation composition, streambank stability, and aquatic habitat quality.
- Measure compliance with federal statutes and regulations through periodic assessments and audits.
- Assess collaboration effectiveness among stakeholders involved in vegetation management and conservation initiatives.
- **Evaluations:**
 - Assess vegetation management effectiveness by monitoring forage resources, wildlife habitat quality, vegetation condition, and wildlife interface dynamics on federally managed lands using standardized protocols.
 - Evaluate wildfire mitigation success by tracking wildfire occurrence and severity, comparing pre- and post-mitigation data, and assessing impacts on wildlife interface zones.
 - Measure noxious weed control program effectiveness by monitoring weed infestation levels, native vegetation abundance, and impacts on wildlife interface areas on state and federal lands.
 - Assess water quality improvement initiatives by monitoring key parameters in riparian areas and water bodies, identifying trends over time, and considering wildlife interface impacts.
 - Evaluate riparian area preservation efforts by assessing vegetation composition, streambank stability, aquatic habitat quality, and wildlife interface dynamics.
 - Measure compliance with federal statutes and regulations through periodic assessments and audits, with a focus on wildlife interface management requirements.
 - Assess collaboration effectiveness among stakeholders involved in vegetation management, wildfire mitigation, noxious weed control, water quality enhancement, riparian area preservation, and wildlife interface management initiatives.
 - Monitor public awareness and support for land management practices through surveys and outreach event evaluations.

4: Recreational Use

Caribou County boasts a plethora of attractions, encompassing a diverse array of historical sites, stunning landscapes, waterways, trails, and much more.

One iconic feature of American history, the Oregon Trail, spans over 2,000 miles and crosses six states, including Idaho. As it traverses through Caribou County, the Pioneer Historic Byway highlights 15 significant locations within our region:

- Niter Ice Cave
- Black Canyon Gorge
- Last Chance Canal
- Sheep Rock-Oregon Trail
- Chesterfield Townsite
- Geyser Park and Visitor Center
- Formation Springs Preserve
- Hooper Springs
- China Hat Geological Site
- Henry-Chester's County Store
- Grays Lake National Wildlife Refuge
- Lander Trail
- Cariboo Mountain
- Tincup Canyon

Courtesy of Nellie Askew

Our Caribou-Targhee National Forest, managed cooperatively by the U.S. Forest Service (USFS) and the Bureau of Land Management (BLM), offers a wealth of recreational opportunities year-round. Visitors can explore numerous trails, campsites, and waterways, with campgrounds such as Diamond Creek, Gravel Creek, Mill Canyon, Pine Bar, Tincup, and the Blackfoot Reservoir providing excellent facilities for outdoor enthusiasts. Additionally, there are several private campgrounds scattered throughout Caribou County.

A diverse range of activities awaits visitors in Caribou County, including fishing, hunting, horseback riding, picnicking, scenic drives, water sports, nature viewing, rock and mineral exploration, UTV/ATV riding, hiking (both day trips and overnight excursions), snowmobiling, cross-country skiing, ice fishing, snow biking, snowshoeing, sledding, and much more. Whether you're seeking adventure or tranquility, Caribou County offers something for everyone to enjoy throughout the year.

Nevertheless, conflicts between recreation users and other stakeholders of the land are on the rise. Private landowners are increasingly closing off historic access routes to state and federal grounds. Despite efforts by the county to address this issue, the state and federal

agencies have not provided assistance in maintaining or obtaining easements through the affected areas.

In the county's 2023 Comprehensive Plan, recreational use is highlighted as a crucial focus area. The plan's recreational goal is to "Support the development of new public parks and trails, facilities, amenities, and activities, as well as the enhancement of existing recreational areas and activities." Alongside this goal are specific objectives and strategies aimed at achieving it. The objectives are as follows:

- Objective 1: Promote a sustainable county-wide parks and recreation, open space, and waterways system.
- Objective 2: Ensure public land access and opportunities to recreate year-round.
- Objective 3: Protect County waterways for habitat and wildlife preservation and as crucial recreational areas.

In addition to the county's comprehensive plan, several federal acts have been enacted to support recreation on state and federal lands. These include the Land and Water Conservation Fund Act (LWCF) of 1965, the Recreation and Public Purposes Act (R&PP) of 1954, the National Trails Systems Act of 1968, and the Federal Lands Recreation Enhancement Act (FLREA) of 2004. Achieving and enhancing recreational opportunities throughout the county requires collaborative efforts between local governments, as well as state and federal entities. The overarching aim of this plan, in conjunction with the comprehensive plan, is to ensure that taxpayers can fully enjoy the benefits of public land.

Goals, Action Objectives, and Evaluations

- **GOAL:** To foster sustainable and accessible recreational opportunities throughout Caribou County by promoting collaboration between local, state, and federal stakeholders, enhancing existing recreational areas, and preserving historical sites and natural landscapes for the enjoyment of residents and visitors alike.
 - **Action Objectives:**
 - Foster collaboration between local, state, and federal authorities to streamline management efforts and ensure cohesive oversight of recreational opportunities, historical sites, and natural landscapes in Caribou County.
 - Develop and implement comprehensive management plans for county-owned parks, state parks, and federally owned lands to optimize recreational experiences while preserving historical and natural resources.

- Enhance public access to recreational areas through the maintenance and development of trails, facilities, and amenities, prioritizing inclusivity and equitable distribution of resources.
- Conduct regular assessments of recreational sites and historical landmarks to identify maintenance needs, address safety concerns, and ensure compliance with regulations and standards.
- Promote public awareness and engagement in recreational activities and historical site preservation efforts through outreach programs, educational initiatives, and community events.
- Establish partnerships with local stakeholders, nonprofit organizations, and volunteer groups to supplement government efforts in maintaining and enhancing recreational areas and historical sites.
- Advocate for funding and resources at the local, state, and federal levels to support the ongoing management, maintenance, and improvement of recreational opportunities and historical landmarks in Caribou County.
- **Evaluations:**
 - Evaluate collaboration between authorities by assessing coordination and communication effectiveness.
 - Measure management plan implementation by monitoring adherence and stakeholder feedback.
 - Assess public access through surveys and usage analysis to identify areas for improvement.
 - Monitor site condition and maintenance to address safety hazards and deficiencies promptly.
 - Evaluate public engagement through participation rates and feedback from community events.
 - Assess partnership effectiveness by measuring contributions and impact.

Evaluate resource allocation by analyzing budget reports and project outcomes.

5: Wilderness Recommendations

In addressing wilderness management, it is imperative to consider recent legislative and regulatory developments alongside evolving environmental challenges. The Forest Service Planning Rule of 2012 emphasizes sustainable management principles and stakeholder collaboration in guiding national forest and grassland management, including the preservation of wilderness characteristics. Complementing this, the Wilderness Stewardship Directive of 2015 provides guidance for federal land management agencies, particularly the Bureau of Land Management (BLM) and the U.S. Forest Service, in preserving wilderness character, managing visitor use, and conducting research within wilderness areas.

Furthermore, efforts such as the development of Sage-Grouse Plans and Amendments from 2015 to 2020 demonstrate a commitment to conserving sensitive habitats while allowing for compatible land uses like livestock grazing. Legal considerations continue to shape wilderness management policies, with ongoing litigation and court decisions addressing issues such as motorized recreation, new wilderness designations, and climate change adaptation.

Goals, Action Objectives, and Evaluations

- **GOAL:** Ensure adherence to federal wilderness preservation laws and regulations while balancing existing land uses and user rights within designated wilderness areas in Caribou County.
 - **Action Objectives:**
 - Assess federally managed lands for wilderness suitability and develop management plans for designated wilderness areas, ensuring compliance with federal laws and accommodating existing land uses.
 - Engage stakeholders to gather input on wilderness management priorities and educate the public on wilderness preservation regulations.
 - Monitor and enforce compliance with wilderness laws, collaborating with federal agencies for consistent application.
 - Advocate for the release of Wilderness Study Areas (WSAs) or new wilderness designations, considering existing land uses.
 - **Evaluations:**
 - Measure the effectiveness of wilderness assessments by evaluating the identification and designation of suitable wilderness areas.
 - Assess the implementation of management plans for designated wilderness areas, including compliance with federal laws and accommodation of existing land uses.
 - Evaluate stakeholder engagement efforts by monitoring participation rates and feedback on wilderness management priorities.
 - Monitor compliance with wilderness preservation laws and regulations, assessing the effectiveness of enforcement actions.
 - Measure advocacy efforts for the release of Wilderness Study Areas (WSAs) or new wilderness designations, considering the progress made in addressing existing land uses.

6: Scenic River Systems

Courtesy of Caribou Historical Society

Caribou County, Idaho, is home to significant stretches of the Scenic River System, such as the Bear River, Blackfoot River, and the Portneuf River. While these rivers are not federally protected, these rivers play a vital role in Idaho's water resources, serving agricultural, municipal, industrial, and recreational needs across multiple communities. They support diverse ecosystems and habitats, contributing to biodiversity and ecosystem resilience. Effective management of the Bear River basin's waterways is essential for mitigating natural

disasters like floods and droughts and enhancing community and ecosystem resilience.

Similarly, the natural waterways within Caribou County, including rivers, creeks, streams, reservoirs, and wetlands, are vital for ecological integrity and human communities. Preserving these waterways is crucial for maintaining water quality, preserving habitats, and promoting sustainable water management practices to ensure their continued health and resilience for future generations.

Goals, Action Objectives, and Evaluations

- **GOAL:** Ensure the sustainable management and preservation of water resources and the natural waterways within Caribou County, Idaho, to support ecological integrity, community livelihoods, and resilience.
 - **Action Objectives:**
 - Collaborate with the Idaho Department of Water Resources to monitor and manage water rights allocations and usage within Caribou County.
 - Establish partnerships with local water districts to implement water conservation measures and promote efficient water usage practices.
 - Work closely with the Environmental Protection Agency (EPA) to monitor and enforce federal water quality regulations, ensuring compliance with standards to safeguard water resources.
 - Coordinate with the Idaho Department of Environmental Quality (DEQ) to develop and implement strategies for preserving and improving water quality in Caribou County's waterways.
 - Engage with the Bureau of Land Management (BLM) to address water management issues on public lands within the county, focusing on sustainable resource utilization and conservation.

- Support local municipalities in the development and implementation of comprehensive water management plans tailored to the specific needs and challenges of their communities.
- Facilitate collaboration among stakeholder groups and water user associations to foster dialogue, share best practices, and address common water resource management concerns effectively.
- **Evaluations:**
 - Conduct regular assessments of water rights allocations and usage patterns within Caribou County to ensure compliance with state regulations and equitable distribution among stakeholders.
 - Evaluate the effectiveness of water conservation measures implemented in collaboration with local water districts, analyzing water usage data and identifying areas for improvement.
 - Monitor water quality indicators in Caribou County's waterways and compare them against federal standards, conducting regular sampling and testing to assess compliance with EPA regulations.
 - Assess the impact of water quality improvement initiatives led by the Idaho Department of Environmental Quality, analyzing changes in pollutant levels and ecological health indicators over time.
 - Evaluate the outcomes of collaborative efforts with the Bureau of Land Management to address water management issues on public lands, measuring progress in resource conservation and sustainable utilization.
 - Review the implementation of municipal water management plans, examining the adoption of recommended practices and their effectiveness in ensuring reliable water supply and quality for residents.
 - Conduct surveys and feedback sessions with stakeholder groups and water user associations to gauge satisfaction levels, identify areas of concern, and assess the overall effectiveness of collaborative water resource management efforts.

7: Threatened and Endangered Species

Caribou County will pay particular attention to any species designated in any category or classification for protection or consideration of protection under the Endangered Species Act and will act to require the agencies to comply with full procedural provisions of federal statutes.

a. Wildlife and Wildlife Habitat

In Caribou County, Idaho, the diverse wildlife population and their habitats are integral components of the county's ecological integrity and cultural heritage. From majestic elk and deer to elusive bears and wolves, Caribou County boasts a rich array of wildlife species that roam its forests, meadows, and mountains.

These wildlife species play crucial roles in maintaining ecosystem balance and health. For example, large herbivores like elk and deer help shape vegetation dynamics through browsing and grazing, influencing plant community composition and structure. Additionally, predators such as wolves and bears regulate prey populations, preventing overgrazing and promoting biodiversity. Furthermore, birds of prey, including eagles and hawks, contribute to pest control by preying on rodents and small mammals, thus indirectly benefiting agricultural landscapes.

Moreover, the habitats that support Caribou County's wildlife are diverse and interconnected. Dense forests provide cover and nesting sites for a variety of species, while riparian zones along rivers and streams offer essential water sources and breeding grounds for amphibians, fish, and waterfowl. Open meadows and grasslands provide feeding grounds for grazing animals like deer and elk, while wetlands support a variety of water-dependent species, including migratory birds and waterfowl.

The presence of diverse wildlife and healthy habitats in Caribou County not only contributes to the county's natural beauty but also supports various economic and recreational activities. Wildlife-related tourism, such as hunting, fishing, and wildlife viewing, attracts visitors from near and far, bolstering local economies and supporting jobs in the tourism industry. Additionally, outdoor recreational activities like hiking, camping, and wildlife photography thrive in areas where wildlife and their habitats are conserved and accessible.

However, to maintain ecological balance and prevent habitat degradation, it is also essential to manage wildlife populations through responsible herd thinning practices. Overpopulation of certain species can lead to habitat destruction, increased competition for resources, and negative impacts on ecosystem health. By implementing sustainable herd management strategies, Caribou County can ensure the long-term viability of its wildlife populations and preserve the integrity of its natural habitats for future generations to enjoy.

Goals, Action Objectives, and Evaluations

- **GOAL:** Caribou County aims to protect and conserve its diverse wildlife and habitats to maintain ecological balance, preserve cultural heritage, and support sustainable activities. This goal involves ensuring compliance with federal statutes, particularly the Endangered Species Act, and promoting responsible wildlife management practices.
 - **Action Objectives:**

- Conduct regular wildlife surveys and habitat assessments.
- Enhance habitats through reforestation and wetland restoration.
- Develop and implement wildlife management plans.
- Collaborate with agencies and stakeholders.
- Provide educational programs on wildlife conservation.
- Partner with conservation organizations for research.
- Enforce wildlife regulations to prevent illegal activities.
- Incorporate wildlife considerations into land use planning.
- Secure funding for conservation projects.
- Evaluate management effectiveness through monitoring.
- **Evaluations:**
 - Evaluate wildlife surveys for population trends and habitat conditions.
 - Assess habitat enhancement projects' success through vegetation and wildlife use changes.
 - Measure outcomes of wildlife management plans, including population control.
 - Evaluate collaboration levels with agencies and stakeholders in conservation.
 - Assess educational programs' impact on public awareness.
 - Evaluate research partnerships in informing management decisions.
 - Monitor enforcement actions against illegal wildlife activities.
 - Assess wildlife integration in land use planning.
 - Evaluate funding success for conservation projects.
 - Measure monitoring effectiveness in tracking wildlife and habitat changes.

8: Water Rights

Water rights in Caribou County, Idaho, are governed by a complex system of laws and regulations aimed at managing and allocating the county's water resources fairly and sustainably. The foundation of water rights in Idaho is the doctrine of prior appropriation, which grants priority to those who first put water to beneficial use.

Under Idaho law, water rights are established by obtaining a permit from the Idaho Department of Water Resources (IDWR) and completing the process of adjudication. This involves demonstrating a beneficial use for the water, such as irrigation, domestic use, or industrial purposes, and proving that the proposed use will not impair existing water rights.

Once a water right is established, the holder has a legal entitlement to a certain quantity of water from a specific source, such as a river, stream, or groundwater aquifer. Water rights

are subject to the principle of beneficial use, meaning that the water must be put to use for a beneficial purpose within a reasonable timeframe.

In Caribou County, examples of water rights may include irrigation rights for agricultural operations, domestic rights for residential use, and industrial rights for manufacturing or commercial activities. These rights are often associated with specific parcels of land and may have been established decades or even centuries ago.

However, there is concern among private citizens that changes in federal and state water laws could potentially impact their access to vital water resources. Collaborative efforts between the County, State, and Federal governments are crucial to ensuring that water laws remain fair, equitable, and lawful. By working together, stakeholders can address emerging challenges, protect existing water rights, and promote responsible water management practices that serve the needs of all water users while safeguarding the long-term sustainability of Caribou County's water resources.

Goals, Action Objectives, and Evaluations

- **GOAL:** To ensure fair, equitable, and sustainable management of water resources in Caribou County, Idaho, through collaboration with relevant stakeholders and adherence to existing water laws and regulations.
 - **Action Objectives:**
 - Foster collaboration between stakeholders, IDWR, and federal agencies for efficient water rights management.
 - Educate landowners and water users on water rights laws and procedures.
 - Simplify permitting processes for water rights acquisition and transfer.
 - Monitor water usage to address conflicts and shortages proactively.
 - Advocate for policies protecting existing water rights and promoting conservation.
 - Coordinate with neighboring counties on regional water management plans.
 - Improve water infrastructure to enhance distribution and efficiency.
 - Support research on water availability and quality for informed decision-making.
 - Promote voluntary water conservation efforts through incentive programs.
 - Develop emergency response plans for water-related crises.
 - **Evaluations:**
 - Evaluate stakeholder collaboration effectiveness.

- Assess landowner understanding of water rights laws.
- Monitor permitting process efficiency.
- Track water usage trends and conflicts.
- Review policy impacts on water rights.
- Assess regional water management progress.
- Evaluate water infrastructure improvements.
- Review relevant water research findings.
- Measure voluntary conservation program participation.

Assess emergency response plan effectiveness.

9: Land Tenure

Given that nearly half of the land in Caribou County, Idaho, is privately owned, it forms a significant portion of the county's tax base, which sustains essential county services. Any adjustments in land tenure by government agencies must ensure that there is no overall loss of private land value, property rights, or investment expectations, while also maintaining property tax revenue for the county. To optimize land management, efforts will be made to facilitate exchanges between government-owned lands and private landowners, ensuring equal value changes and preserving the integrity of private property rights. Additionally, isolated parcels of federally managed lands that could be more effectively handled by the private sector will be identified and recommended for potential sale, with the aim of improving overall land management efficiency and benefiting both the county and private landowners.

Goals, Action Objectives, and Evaluations

- **GOAL:** Ensure equitable land management practices that preserve private property rights, sustain property values, and optimize county tax revenue while facilitating efficient land exchanges between government-owned and private lands.
 - **Action Objectives:**
 - Review land tenure policies and regulations.
 - Establish collaborative framework for land management.
 - Develop guidelines for land exchanges.
 - Identify and recommend sale of isolated federal lands.
 - Conduct outreach to inform landowners.
 - Monitor impact of land tenure adjustments.
 - Advocate for supportive legislative changes.

- **Evaluations:**
 - Assess effectiveness of land tenure policies in preserving private property rights.
 - Evaluate success of collaborative efforts in facilitating land exchanges.
 - Measure the efficiency of guidelines for land exchanges in maintaining land value.
 - Analyze the impact of federal land sales on overall land management efficiency.
 - Monitor landowner satisfaction and awareness through outreach efforts.
 - Review changes in property tax revenue to gauge the financial impact.
 - Assess legislative support and progress towards supportive changes in land tenure regulations.

10: Energy and Mineral Resources

a. Mining

Caribou County boasts abundant energy and mineral resources, ranging from coal, natural gas, and oil to phosphine, lime, gold, and silver. These resources serve as vital economic pillars, fostering employment opportunities and driving local economic prosperity. Having the mines operate is key to our county's livelihood. However, with the expansion of this runs a risk of deamination other natural resources.

b. Solar and Wind Energy

While acknowledging the importance of renewable energy sources, Caribou County adamantly opposes the conversion of federal and state lands for such projects. Instead, the county advocates for the responsible management and utilization of its existing resources, including phosphine and lime, which play critical roles in various industrial and agricultural applications.

In striving for sustainability, Caribou County emphasizes the exploration of alternative approaches to meet its energy needs. This involves maximizing the efficient use of available resources while investing in research and development of innovative technologies that minimize environmental impact. Through these efforts, the county aims to strike a delicate balance between economic development and environmental conservation, ensuring the enduring prosperity and beauty of its natural landscapes for present and future generations.

Goals, Action Objectives, and Evaluations

- **GOAL:** To sustainably manage energy and mineral resources in Caribou County while actively opposing the development of solar and wind energy projects on forest and state lands, thereby preserving natural landscapes, wildlife habitats, and cultural heritage sites for future generations.
 - **Action Objectives:**
 - Monitor and enforce compliance with state and federal regulations governing energy and mineral resource extraction activities within Caribou County.
 - Collaborate with relevant agencies and stakeholders to conduct environmental impact assessments and develop mitigation strategies for proposed mining projects, ensuring the protection of natural resources and ecosystems.
 - Facilitate the responsible exploration and development of energy and mineral resources in a manner that balances economic benefits with environmental sustainability.
 - Promote research and development initiatives aimed at advancing technology and practices for energy and mineral extraction that minimize ecological footprint and mitigate environmental impacts.
 - Provide educational resources and outreach programs to inform the public about the benefits and risks associated with energy and mineral extraction activities, fostering informed decision-making and community engagement.
 - Evaluate the potential for diversifying energy sources by exploring renewable energy alternatives such as solar and wind power, while considering the county's environmental and economic priorities.
 - Advocate for policies and incentives that support sustainable energy and mineral resource development, promoting responsible stewardship of natural resources while fostering economic growth and job creation in Caribou County.
 - **Evaluations:**
 - **Mining:**
 - Evaluation Criteria: Assess the economic impact of mining activities on Caribou County, including employment generation, revenue contribution, and overall economic growth.
 - Metrics: Measure the number of jobs created, tax revenues generated, and GDP growth attributed to mining operations.

- Outcome: If mining activities contribute positively to local economic development without significant environmental degradation, the evaluation would be deemed successful.
- **Solar and Wind Energy:**
 - Evaluation Criteria: Evaluate the county's stance against solar and wind energy projects in terms of environmental sustainability and economic viability.
 - Metrics: Assess the preservation of natural landscapes, wildlife habitats, and cultural heritage sites due to the avoidance of solar and wind energy developments.
 - Outcome: If Caribou County successfully preserves its natural resources and cultural heritage while promoting alternative approaches to energy production, the evaluation would be considered favorable.
- **Overall Resource Management:**
 - Evaluation Criteria: Review the effectiveness of resource management practices in maintaining a balance between economic development and environmental conservation, specifically in the context of opposing solar and wind energy projects.
 - Metrics: Analyze the impact of energy and mineral extraction activities on air and water quality, wildlife habitats, and overall ecosystem health, considering the absence of solar and wind energy developments.
 - Outcome: If Caribou County manages to sustainably manage its energy and mineral resources while protecting its environment and cultural heritage from the negative impacts of solar and wind energy projects, the evaluation would indicate success.

11: Cultural, Geological, and Paleontological Resources

Caribou County, Idaho, boasts a rich tapestry of Native American heritage and pioneer history. The land once inhabited by indigenous tribes, including the Shoshone and Bannock, carries the echoes of their ancient cultures and traditions. These tribes traversed the rugged landscapes of Caribou County, leaving behind traces of their existence and deep connection to the land. As pioneers ventured westward during the 19th century, Caribou County witnessed the establishment of settlements like Chesterfield, a historic site nestled amidst picturesque surroundings. Founded in 1881, Chesterfield stands as a testament to the resilience and ingenuity of early settlers who carved out a living in the untamed wilderness

of Idaho. Today, visitors to Caribou County can explore Chesterfield's well-preserved buildings and artifacts, gaining insight into the challenges and triumphs of those who shaped the region's storied past.

The federally designed viewshed surrounding the historic Chesterfield Townsite in Caribou County, Idaho, is a cherished aspect of the region's cultural and natural heritage. As visitors stand amidst the well-preserved buildings and expansive landscapes of Chesterfield, they are transported back in time to the pioneering era of the American West. The unspoiled vistas from this site offer a glimpse into the past, allowing visitors to appreciate the rugged beauty and historical significance of the area. Situated close to federal and state land, Chesterfield's viewshed is intricately linked with the broader landscape, underscoring the importance of its preservation. As decisions are made at the federal and state levels, it is imperative that policymakers understand the significance of safeguarding viewsheds like the one surrounding Chesterfield. These landscapes not only hold aesthetic value but also serve as crucial repositories of our collective history. Hence, the county strongly urges policymakers and project managers to prioritize the preservation of such viewsheds, thereby guaranteeing that future generations can unequivocally cherish and honor Caribou County's abundant cultural and natural heritage.

Goals, Action Objectives, and Evaluations

- **GOAL:** Preserve Caribou County's cultural and natural heritage, including the federally designated viewshed around sites like Chesterfield Townsite. Advocate for policies prioritizing viewshed preservation in land management decisions, ensuring future generations can appreciate the region's history and beauty.
 - **Action Objectives:**
 - Advocate for viewshed preservation in land management policies.
 - Raise awareness among stakeholders about viewshed protection.
 - Research threats to viewsheds and develop mitigation strategies.
 - Partner with landowners and conservation groups for conservation efforts.
 - Educate residents and visitors on viewshed significance.
 - Secure funding for monitoring and enforcement of preservation regulations.
 - **Evaluations:**
 - Assess advocacy impact on land management policies for viewshed preservation.
 - Measure stakeholder awareness of viewshed importance.
 - Evaluate effectiveness of mitigation strategies against viewshed threats.

- Monitor collaboration with landowners and conservation groups.
- Gauge educational initiatives' impact on viewshed understanding.
- Review funding allocation for viewshed preservation efforts.

12: Right of Way

Utility corridors are fundamental components of Caribou County's infrastructure, and all planning efforts will prioritize their preservation and continuity. Over time, the development of mining, livestock grazing, ranching, and farming has led to the establishment of numerous rights-of-way across federally managed lands. The continued use of these rights-of-way is crucial for sustaining associated economic activities. Therefore, all planning initiatives will strive to uphold historic rights to traverse federally managed lands for mining, livestock raising, and other traditional purposes. Furthermore, maintenance activities necessary to sustain their historic usage will be permitted. In the 1993 legislative session, the Idaho Legislature passed an emergency Act, signed into law by the Governor, defining "Federal Land Rights of Way" and establishing procedures to preserve acknowledgment of such rights-of-way. This Act, originating as House Bill No. 388, amended Idaho Code Section 40-107 to define "Federal Land Rights of Way" comprehensively, encompassing various forms of construction, from horse paths to logging roads.

Caribou County is committed to ensuring the preservation and accessibility of Right of Ways across federally and state-managed lands. As integral components of the region's heritage and infrastructure, these pathways play a crucial role in facilitating economic activities such as mining, agriculture, and transportation. Recognizing their significance, Caribou County stands ready to assist and take proactive measures to safeguard these rights, ensuring they remain open and accessible to all who rely on them. Furthermore, the county will work closely with federal and state authorities to ensure that these rights are protected under relevant laws and regulations, reinforcing their importance in sustaining the livelihoods and economic prosperity of the community.

Caribou County hereby acknowledges its obligation to engage in collaborative efforts with pertinent federal and state agencies in the event of any damage inflicted by county operations upon federal and state roadways. Conversely, should federal or state projects cause harm to county roads, Caribou County formally requests that these agencies undertake joint endeavors to promptly restore affected county infrastructure. This reciprocal agreement is established to ensure to foster equitable resolution of road-related matters, thereby promoting the effective maintenance of transportation networks across all jurisdictional boundaries.

Goals, Action Objectives, and Evaluations

- **GOAL:** Preserve and maintain utility corridors across federally and state-managed lands in Caribou County to support economic activities such as mining, agriculture, and transportation, ensuring their accessibility and continuity for the benefit of the community.
 - **Action Objective:**
 - Conduct a comprehensive inventory of existing utility corridors across federally and state-managed lands within Caribou County, identifying their locations, conditions, and historical significance.
 - Collaborate with relevant stakeholders, including federal and state agencies, landowners, and user groups, to develop management plans for utility corridors that prioritize their preservation and continuity.
 - Implement maintenance activities as necessary to sustain the functionality and accessibility of utility corridors, including repairs, signage installation, and vegetation management.
 - Advocate for the protection of utility corridors under relevant laws and regulations at the federal and state levels, ensuring their recognition and preservation as vital components of the county's infrastructure.
 - Educate the public and raise awareness about the importance of utility corridors in supporting economic activities and maintaining access to federally and state-managed lands within Caribou County.
 - Establish a formal protocol for collaboration between Caribou County and federal/state agencies regarding road restoration.
 - **Evaluations:**
 - Conduct regular assessments of utility corridor conditions and accessibility.
 - Monitor the implementation of preservation plans and maintenance activities.
 - Evaluate stakeholder satisfaction with corridor management efforts.
 - Track any legal challenges or regulatory changes affecting corridor protection.
 - Evaluate the effectiveness of the collaboration protocol between Caribou County and federal/state agencies regarding road restoration by monitoring and tracking the efficiency of restoration efforts undertaken by both the county and the respective state/federal agencies.
 - Measure public awareness and understanding of the importance of utility corridors.

13: Air Quality

Caribou County will continuously monitor the available data to detect any potential conflicts with federal law concerning the preservation of air quality.

Goals, Action Objectives, and Evaluations

- **GOAL:** Ensure Caribou County maintains its high air quality by adhering to the regulations and standards outlined in the National Ambient Air Quality Act and the State of Idaho.
 - **Action Objectives:**
 - Ensure that prescribed fire projects incorporate air quality considerations while maximizing efforts to address the backlog of treatments needed to restore natural habitats affected by juniper encroachment or dense shrub cover.
 - Ensure prescribed fire projects are conducted at a rate that effectively reduces juniper encroachment over time and restores natural vegetation communities while adhering to all legal authorities.
 - **Evaluations:**
 - Regularly assess BLM prescribed fire environmental evaluations, along with air quality mitigation measures and expected consequences.
 - Regularly review and assess prescribed fire plans to ensure compliance with approved smoke management strategies and regulations, as well as air quality standards and guidelines.

14. Miscellaneous Forest Direction

a. Miscellaneous Forest Products

Various products, such as mushrooms, huckleberries, firewood, and Christmas trees, are harvested from lands within the county, predominantly from federal and state lands but also from private properties. These products hold significant cultural and economic value for the county's residents.

Goals, Action Objectives, and Evaluations

- **GOAL:** Promote the sustainable management of natural resources in Caribou County to ensure the continued availability of valuable products like mushrooms, huckleberries,

firewood, and Christmas trees while preserving ecological balance and supporting the county's cultural and economic well-being.

- **Action Objectives:**

- **Conduct Economic Impact Studies:** Commission studies to assess the economic contributions of product harvesting activities, including revenue generated, employment opportunities created, and overall economic benefits to the county.
- **Implement Sustainable Harvesting Practices:** Develop and promote guidelines for sustainable harvesting practices to ensure the long-term availability of harvested products while minimizing environmental impacts.
- **Facilitate Stakeholder Collaboration:** Organize meetings and workshops to engage stakeholders involved in product harvesting, including harvesters, landowners, government agencies, and community organizations, to gather input and foster collaboration.
- **Review and Update Regulations:** Review existing regulations governing product harvesting and propose updates or revisions to ensure compliance with current laws and address emerging challenges.
- **Promote Community Education and Outreach:** Develop educational materials and outreach programs to raise awareness among the community about the importance of sustainable harvesting practices, regulatory compliance, and the cultural and economic significance of harvested products.

- **Evaluations:**

- **Economic Impact Assessment:** Evaluate the economic contribution of harvested products to the local economy, including revenue generation and job creation.
- **Resource Sustainability Analysis:** Assess the sustainability of harvesting practices and identify areas for improvement to ensure long-term resource availability.
- **Stakeholder Engagement Review:** Gather feedback from stakeholders involved in product harvesting to identify challenges and opportunities for improvement.
- **Regulatory Compliance Check:** Ensure compliance with relevant regulations governing product harvesting and identify any regulatory gaps.
- **Community Benefit Assessment:** Evaluate the broader benefits of product harvesting to the community, including cultural significance and ecosystem services.

Appendix A – Caribou County Economic Overview

Caribou County Labor Force And Economic Profile

Last Updated: January 2022

Caribou County Economic Overview

Civilian Labor Force (Dec 2021)	4,169
Unemployment Rate (Dec 2021)	1.7%
Population (2020)	7,123
Median Household Income (2019)	\$59,053
Per Capita Personal Income (2020)	\$48,595
Poverty Rate (2019)	8.8%

Citation

This publication may be cited as follows:

U.S. Department of the Interior, Bureau of Land Management (editor), 2016. *The Federal Land Policy and Management Act of 1976, as amended*. U.S. Department of the Interior, Bureau of Land Management, Office of Public Affairs, Washington, DC. 106 pp.

Editor’s Note

This version of *The Federal Land Policy and Management Act of 1976, As Amended* updates the previous version of this pamphlet, issued in 2001. It includes all sections of the Federal Land Policy and Management Act (the Act) as originally passed by Congress in 1976, all subsequently enacted sections that have been codified alongside the original Act, and separately enacted sections that are not considered amendments to the Act. Consequently, it is more inclusive than most other similar documents.

Section and subsection headings are from the United States Code and are boldfaced to serve as easy references within each section. Where the original public law differs from the text of the United States Code, the text of the United States Code has generally been followed. Additions of text from amendments have been italicized and deletions from amendments have been removed. Two appendices and an alphabetical index have been added. The language throughout the document has been modified to be gender-neutral and editorial corrections to the original text have been made, as indicated with brackets.

Editor’s notes within the body of the document are in a different, smaller font, and are framed by brackets. Editor’s notes include additional cross-references not found in the United States Code; citations to amending statutes; and annotations regarding related legislation, uncodified riders, and similar matters. Editor’s notes are not intended to provide a comprehensive guide to the relevant law, nor do the notes reflect the views of the Bureau of Land Management or the Office of the Solicitor.

This document was prepared by the Bureau of Land Management with assistance from the Office of the Solicitor, in commemoration of the 40th anniversary of the Federal Land Policy and Management Act of 1976. Great care was taken to ensure that all amendments were included correctly and with precision. Nevertheless, we recognize that this document still could contain errors. The user is encouraged to consult the official United States Code if there is any doubt about the accuracy of the information contained herein.

The Federal Land Policy and Management Act is central to everything we do at the Bureau of Land Management. All of the actions we take rely on the authorities that were built into this law by Congress and the President. We use FLPMA every day to guide our management of over 10 percent of the land in the United States and one-third of the nation's minerals.

FLPMA defines our mission as one of multiple use and sustained yield. This means thoughtful development in the right places to drive economic opportunities for local communities. It also means protecting natural, cultural, and historical resources that are simply too special to develop. And above all, it means working with a changing nation to make decisions that are balanced and forward looking.

I am incredibly proud of the BLM and what this team accomplishes each day. Our responsibilities are wide ranging. In addition to supporting the nation's need for energy, minerals, timber, and grazing lands, we offer world-class recreational opportunities to millions of Americans who are passionate about hunting, fishing, hiking, paddling, and skiing. We have one of the nation's largest and most elite firefighting operations. Our dedicated law enforcement officers help guide and protect visitors to the public lands. We play a critical role in

maintaining healthy habitat for thousands of fish and wildlife species. And we don't do this alone. We work closely with hundreds of sovereign tribal nations and with state and local governments across the country.

All of this activity takes place on lands that stretch across the nation, from the Arctic Ocean to the Mexican border, and from Key West, Florida to the San Juan Islands of Washington State. While many people think of the BLM as a western agency, we play an active role in nearly every state in the country. In each of these places, FLPMA provides the essential foundation for our work.

I hope you use and enjoy this updated publication. While the entire document is an incredible resource, if your time is limited, I strongly encourage you to start by reading the definitions of multiple use and sustained yield in section 103. We regularly return to these two monumental ideas for inspiration and for direction. These concepts are both far-reaching and timeless, and they are well designed to carry our nation and our public lands forward for many generations to come.

Neil Kornze

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976

Public Law 94-579
94th Congress

An Act

To establish public land policy; to establish guidelines for its administration; to provide for the management, protection, development, and enhancement of the public lands; and for other purposes.

*Be it enacted by the
Senate and House of Representatives of the United States of America in Congress assembled*

TABLE OF CONTENTS

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976

Public Law 94-579 – 94th Congress v

TITLE I—GENERAL PROVISIONS

Sec. 101. Short title	1
Sec. 102. Congressional declaration of policy	1
Sec. 103. Definitions	2
Cooperative action and sharing of resources by Secretaries of the Interior and Agriculture	4

TITLE II—LAND USE PLANNING; LAND ACQUISITION AND DISPOSITION

Sec. 201. Continuing inventory and identification of public lands; preparation and maintenance	5
Sec. 202. Land use plans	5
Sec. 203. Sales of public land tracts	7
Sec. 204. Withdrawals of lands	9
Sec. 205. Acquisitions of public lands and access over non-Federal lands to National Forest System units ..	13
Sec. 206. Exchanges of public lands or interests therein within the National Forest System	14
Sec. 207. Qualifications of conveyees	17
Sec. 208. Documents of conveyance; terms, covenants, etc.	17
Sec. 209. Mineral interests; reservation and conveyance requirements and procedures	18
Sec. 210. Coordination by Secretary of the Interior with State and local governments	18
Sec. 211. Conveyances of public lands to States, local governments, etc.	19
Sec. 212. Recreation and Public Purposes Act	20
Sec. 213. National forest townsites	20
Sec. 214. Sale of public lands subject to unintentional trespass	21
Sec. 215. Temporary revocation authority.	22

TITLE III—ADMINISTRATION

Sec. 301. Bureau of Land Management	25
Sec. 302. Management of use, occupancy, and development of public lands	25
Sec. 303. Enforcement authority	28
Sec. 304. Fees, charges, and commissions	29
Availability of excess fees	29
Sec. 305. Forfeitures and deposits	30
Sec. 306. Working capital fund	30
Revolving fund derived from disposal of salvage timber	31
Sec. 307. Implementation provisions	31

Sec. 308. Contracts for surveys and resource protection; renewals; funding requirements	32
Sec. 309. Advisory councils	32
Sec. 310. Rules and regulations	33
Sec. 311. Annual reports	33
Sec. 312. Search, rescue, and protection forces; emergency situations authorizing hiring	33
Sec. 313. Disclosure of financial interests by officers or employees	33
Sec. 314. Recordation of mining claims	34
Sec. 315. Disclaimer of interest in lands	35
Sec. 316. Correction of conveyance documents	35
Sec. 317. Mineral revenues	36
Sec. 318. Funding requirements	39
FLAME Wildfire Suppression Reserve Funds	40
Cohesive wildfire management strategy	43
TITLE IV—RANGE MANAGEMENT	
Sec. 401. Grazing fees*	45
Sec. 402. Grazing leases and permits	46
Sec. 403. Grazing advisory boards	49
Sec. 404. Transportation of captured animals; procedures and prohibitions applicable	49
TITLE V—RIGHTS-OF-WAY	
Sec. 501. Grant, issue, or renewal of rights-of-way	51
Sec. 502. Roads	53
Sec. 503. Right-of-way corridors; criteria and procedures applicable for designation	54
Sec. 504. General requirements	55
Sec. 505. Terms and conditions	57
Sec. 506. Suspension or termination; grounds; procedures applicable	57
Sec. 507. Rights-of-way for Federal departments and agencies	58
Sec. 508. Conveyance of lands covered by right-of-way; terms and conditions	58
Sec. 509. Existing right-of-way or right-of-use unaffected; exceptions; rights-of-way for railroad and appurtenant communication facilities; applicability of existing terms and conditions	58
Sec. 510. Applicability of provisions to other Federal laws	59
Sec. 511. Coordination of applications	59
TITLE VI—DESIGNATED MANAGEMENT AREAS	
Sec. 601. California Desert Conservation Area	61
Acceptance of donation of certain existing permits or leases	63
Sec. 602. King Range	63
Sec. 603. Bureau of Land Management Wilderness Study	63
Yaquina Head Outstanding Natural Area	64
Lands in Alaska; designation as wilderness; management by Bureau of Land Management pending Congressional action	66

* As it appears in the United States Code, 43 U.S.C. 1751 contains a section heading and multiple subheadings displayed together. For ease of reading, these subheadings were divided up and placed with the appropriate text.

Fossil Forest Research Natural Area	66
Piedras Blancas Historic Light Station.....	68
Jupiter Inlet Lighthouse Outstanding Natural Area.....	71
TITLE VII—EFFECT ON EXISTING RIGHTS: REPEAL OF EXISTING LAWS; SEVERABILITY	
Sec. 701. Effect on existing rights.....	75
Sec. 702. Repeal of laws relating to homesteading and small tracts	76
Sec. 703. Repeal of laws related to disposal	78
Sec. 704. Repeal of withdrawal laws	80
Sec. 705. Repeal of laws relating to administration of public lands.....	81
Sec. 706. Repeal of laws relating to rights-of-way	81
Sec. 707. Severability	82

TITLE I

GENERAL PROVISIONS

Short Title

Sec. 101 [43 U.S.C. 1701 note]. This Act may be cited as the “Federal Land Policy and Management Act of 1976”.

Congressional Declaration of Policy

Sec. 102 [43 U.S.C. 1701].

(a) The Congress declares that it is the policy of the United States that—

- (1) the public lands be retained in Federal ownership, unless as a result of the land use planning procedure provided for in this Act, it is determined that disposal of a particular parcel will serve the national interest;
- (2) the national interest will be best realized if the public lands and their resources are periodically and systematically inventoried and their present and future use is projected through a land use planning process coordinated with other Federal and State planning efforts;
- (3) public lands not previously designated for any specific use and all existing classifications of public lands that were effected by executive action or statute before October 21, 1976, be reviewed in accordance with the provisions of this Act;
- (4) the Congress exercise its constitutional authority to withdraw or otherwise designate or dedicate Federal lands for specified purposes and that Congress delineate the extent to which the Executive may withdraw lands without legislative action;

(5) in administering public land statutes and exercising discretionary authority granted by them, the Secretary be required to establish comprehensive rules and regulations after considering the views of the general public; and to structure adjudication procedures to assure adequate third party participation, objective administrative review of initial decisions, and expeditious decisionmaking;

(6) judicial review of public land adjudication decisions be provided by law;

(7) goals and objectives be established by law as guidelines for public land use planning, and that management be on the basis of multiple use and sustained yield unless otherwise specified by law;

(8) the public lands be managed in a manner that will protect the quality of scientific, scenic, historical, ecological, environmental, air and atmospheric, water resource, and archeological values; that, where appropriate, will preserve and protect certain public lands in their natural condition; that will provide food and habitat for fish and wildlife and domestic animals; and that will provide for outdoor recreation and human occupancy and use;

(9) the United States receive fair market value of the use of the public lands and their resources unless otherwise provided for by statute;

(10) uniform procedures for any disposal of public land, acquisition of non-Federal land for public purposes, and the exchange of such lands be established by statute, requiring

each disposal, acquisition, and exchange to be consistent with the prescribed mission of the department or agency involved, and reserving to the Congress review of disposals in excess of a specified acreage;

(11) regulations and plans for the protection of public land areas of critical environmental concern be promptly developed;

(12) the public lands be managed in a manner which recognizes the Nation's need for domestic sources of minerals, food, timber, and fiber from the public lands including implementation of the Mining and Minerals Policy Act of 1970 (84 Stat. 1876, 30 U.S.C. 21a) as it pertains to the public lands; and

(13) the Federal Government should, on a basis equitable to both the Federal and local taxpayer, provide for payments to compensate States and local governments for burdens created as a result of the immunity of Federal lands from State and local taxation.

(b) The policies of this Act shall become effective only as specific statutory authority for their implementation is enacted by this Act or by subsequent legislation and shall then be construed as supplemental to and not in derogation of the purposes for which public lands are administered under other provisions of law.

Definitions

Sec. 103 [43 U.S.C. 1702]. Without altering in any way the meaning of the following terms as used in any other statute, whether or not such statute is referred to in, or amended by, this Act, as used in this Act—

(a) The term “areas of critical environmental concern” means areas within the public lands where special management attention is required (when such areas are developed or used or where no development is required) to protect and prevent irreparable damage to important historic, cultural, or scenic values, fish and wildlife resources

or other natural systems or processes, or to protect life and safety from natural hazards.

(b) The term “holder” means any State or local governmental entity, individual, partnership, corporation, association, or other business entity receiving or using a right-of-way under title V of this Act.

(c) The term “multiple use” means the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people; making the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some land for less than all of the resources; a combination of balanced and diverse resource uses that takes into account the long-term needs of future generations for renewable and nonrenewable resources, including, but not limited to, recreation, range, timber, minerals, watershed, wildlife and fish, and natural scenic, scientific and historical values; and harmonious and coordinated management of the various resources without permanent impairment of the productivity of the land and the quality of the environment with consideration being given to the relative values of the resources and not necessarily to the combination of uses that will give the greatest economic return or the greatest unit output.

(d) The term “public involvement” means the opportunity for participation by affected citizens in rule making, decisionmaking, and planning with respect to the public lands, including public meetings or hearings held at locations near the affected lands, or advisory mechanisms, or such other procedures as may be necessary to provide public comment in a particular instance.

(e) The term “public lands” means any land and interest in land owned by the United States within the several States and administered by the Secretary of the Interior through the Bureau of

Land Management, without regard to how the United States acquired ownership, except—

(1) lands located on the Outer Continental Shelf; and

(2) lands held for the benefit of Indians, Aleuts, and Eskimos.

(f) The term “right-of-way” includes an easement, lease, permit, or license to occupy, use, or traverse public lands granted for the purpose listed in title V of this Act.

(g) The term “Secretary”, unless specifically designated otherwise, means the Secretary of the Interior.

(h) The term “sustained yield” means the achievement and maintenance in perpetuity of a high-level annual or regular periodic output of the various renewable resources of the public lands consistent with multiple use.

(i) The term “wilderness” as used in section 603 shall have the same meaning as it does in section 1131(c) of title 16.

(j) The term “withdrawal” means withholding an area of Federal land from settlement, sale, location, or entry, under some or all of the general land laws, for the purpose of limiting activities under those laws in order to maintain other public values in the area or reserving the area for a particular public purpose or program; or transferring jurisdiction over an area of Federal land, other than “property” governed by the Federal Property and Administrative Services Act, as amended (40 U.S.C. 472) from one department, bureau or agency to another department, bureau or agency.

(k) An “allotment management plan” means a document prepared in consultation with the lessees or permittees involved, which applies to livestock operations on the public lands or on lands within National Forests in the eleven contiguous Western States and which:

(1) prescribes the manner in, and extent to, which livestock operations will be conducted

in order to meet the multiple-use, sustained-yield, economic and other needs and objectives as determined for the lands by the Secretary concerned; and

(2) describes the type, location, ownership, and general specifications for the range improvements to be installed and maintained on the lands to meet the livestock grazing and other objectives of land management; and

(3) contains such other provisions relating to livestock grazing and other objectives found by the Secretary concerned to be consistent with the provisions of this Act and other applicable law.

(l) The term “principal or major uses” includes, and is limited to, domestic livestock grazing, fish and wildlife development and utilization, mineral exploration and production, rights-of-way, outdoor recreation, and timber production.

(m) The term “department” means a unit of the executive branch of the Federal Government which is headed by a member of the President’s Cabinet and the term “agency” means a unit of the executive branch of the Federal Government which is not under the jurisdiction of a head of a department.

(n) The term “Bureau[”] means the Bureau of Land Management.

(o) The term “eleven contiguous Western States” means the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

[The term “sixteen contiguous Western States,” found in sections 401(b)(1), 402(a) and 403(a), refers to: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington and Wyoming. This term is defined by Pub. L. No. 95-514, § 3(i), 92 Stat. 1803, 1805 (1978).]

(p) The term “grazing permit and lease” means any document authorizing use of public lands or lands in National Forests in the eleven contiguous Western States for the purpose of grazing domestic livestock.

**Cooperative action and sharing of resources
by Secretaries of the Interior and Agriculture**

[43 U.S.C. 1703] [Pub. L. No. 106–291, title III, § 330, Oct. 11, 2000, 114 Stat. 996; Pub. L. No. 109–54, title IV, § 428, Aug. 2, 2005, 119 Stat. 555; Pub. L. No. 111–8, div. E, title IV, § 418, Mar. 11, 2009, 123 Stat. 747; Pub. L. No. 112–74, div. E, title IV, § 422, Dec. 23, 2011, 125 Stat. 1045; Pub. L. No. 113–76, div. G, title IV, § 430, Jan. 17, 2014, 128 Stat. 345].

In fiscal year 2012 and each fiscal year thereafter, the Secretaries of the Interior and Agriculture, subject to annual review of Congress, may establish programs to conduct projects, planning, permitting, leasing, contracting and other activities, either jointly or on behalf of one another; may co-locate in Federal offices and facilities leased by an agency of either Department; and may promulgate special rules as needed to test the feasibility of issuing unified permits, applications, and leases. The Secretaries of the Interior and Agriculture may make reciprocal

delegations of their respective authorities, duties and responsibilities in support of the “Service First” initiative agency-wide to promote customer service and efficiency. Nothing herein shall alter, expand or limit the applicability of any public law or regulation to lands administered by the Bureau of Land Management, National Park Service, Fish and Wildlife Service, or the Forest Service or matters under the purview of other bureaus or offices of either Department. To facilitate the sharing of resources under the Service First initiative, the Secretaries of the Interior and Agriculture may make transfers of funds and reimbursement of funds on an annual basis, including transfers and reimbursements for multi-year projects, except that this authority may not be used to circumvent requirements and limitations imposed on the use of funds.

TITLE II

LAND USE PLANNING; LAND ACQUISITION AND DISPOSITION

Continuing Inventory and Identification of Public Lands; Preparation and Maintenance

Sec. 201 [43 U.S.C. 1711].

(a) The Secretary shall prepare and maintain on a continuing basis an inventory of all public lands and their resource and other values (including, but not limited to, outdoor recreation and scenic values), giving priority to areas of critical environmental concern. This inventory shall be kept current so as to reflect changes in conditions and to identify new and emerging resource and other values. The preparation and maintenance of such inventory or the identification of such areas shall not, of itself, change or prevent change of the management or use of public lands.

(b) As funds and manpower are made available, the Secretary shall ascertain the boundaries of the public lands; provide means of public identification thereof including, where appropriate, signs and maps; and provide State and local governments with data from the inventory for the purpose of planning and regulating the uses of non-Federal lands in proximity of such public lands.

Land Use Plans

Sec. 202 [43 U.S.C. 1712].

(a) Development, maintenance, and revision by Secretary

The Secretary shall, with public involvement and consistent with the terms and conditions of this Act, develop, maintain, and, when appropriate, revise land use plans which provide by tracts or areas for the use of the public lands. Land use plans shall be developed for the public lands regardless of whether such lands previously have been classified, withdrawn, set aside, or otherwise designated for one or more uses.

(b) Coordination of plans for National Forest System lands with Indian land use planning and management programs for purposes of development and revision

In the development and revision of land use plans, the Secretary of Agriculture shall coordinate land use plans for lands in the National Forest System with the land use planning and management programs of and for Indian tribes by, among other things, considering the policies of approved tribal land resource management programs.

(c) Criteria for development and revision

In the development and revision of land use plans, the Secretary shall—

- (1) use and observe the principles of multiple use and sustained yield set forth in this and other applicable law;

- (2) use a systematic interdisciplinary approach to achieve integrated consideration of physical, biological, economic, and other sciences;
- (3) give priority to the designation and protection of areas of critical environmental concern;
- (4) rely, to the extent it is available, on the inventory of the public lands, their resources, and other values;
- (5) consider present and potential uses of the public lands;
- (6) consider the relative scarcity of the values involved and the availability of alternative means (including recycling) and sites for realization of those values;
- (7) weigh long-term benefits to the public against short-term benefits;
- (8) provide for compliance with applicable pollution control laws, including State and Federal air, water, noise, or other pollution standards or implementation plans; and
- (9) to the extent consistent with the laws governing the administration of the public lands, coordinate the land use inventory, planning, and management activities of or for such lands with the land use planning and management programs of other Federal departments and agencies and of the States and local governments within which the lands are located, including, but not limited to, the statewide outdoor recreation plans developed under *chapter 2003 of title 54, United States Code* [Pub. L. No. 113-287, 2014] and of or for Indian tribes by, among other things, considering the policies of approved State and tribal land resource management programs. In implementing this directive, the Secretary shall, to the extent [he or she] finds practical, keep apprised of State, local, and tribal land use plans; assure that consideration is given to those State, local, and tribal plans that are germane in the development of land use plans for public lands; assist in resolving, to the extent

practical, inconsistencies between Federal and non-Federal Government plans, and shall provide for meaningful public involvement of State and local government officials, both elected and appointed, in the development of land use programs, land use regulations, and land use decisions for public lands, including early public notice of proposed decisions which may have a significant impact on non-Federal lands. Such officials in each State are authorized to furnish advice to the Secretary with respect to the development and revision of land use plans, land use guidelines, land use rules, and land use regulations for the public lands within such State and with respect to such other land use matters as may be referred to them by [the Secretary]. Land use plans of the Secretary under this section shall be consistent with State and local plans to the maximum extent [the Secretary] finds consistent with Federal law and the purposes of this Act.

(d) Review and inclusion of classified public lands; review of existing land use plans; modification and termination of classifications

Any classification of public lands or any land use plan in effect on October 21, 1976 is subject to review in the land use planning process conducted under this section, and all public lands, regardless of classification, are subject to inclusion in any land use plan developed pursuant to this section. The Secretary may modify or terminate any such classification consistent with such land use plans.

(e) Management decisions for implementation of developed or revised plans

The Secretary may issue management decisions to implement land use plans developed or revised under this section in accordance with the following:

- (1) Such decisions, including but not limited to exclusions (that is, total elimination) of one or more of the principal or major uses made by a management decision shall remain subject to reconsideration, modification, and termination through revision by the Secretary or [the Secretary's] delegate, under the provisions of this section, of the land use plan involved.

(2) Any management decision or action pursuant to a management decision that excludes (that is, totally eliminates) one or more of the principal or major uses for two or more years with respect to a tract of land of one hundred thousand acres or more shall be reported by the Secretary to the House of Representatives and the Senate. If within ninety days from the giving of such notice (exclusive of days on which either House has adjourned for more than three consecutive days), the Congress adopts a concurrent resolution of nonapproval of the management decision or action, then the management decision or action shall be promptly terminated by the Secretary. If the committee to which a resolution has been referred during the said ninety day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to the management decision or action. A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same management decision or action. When the committee has reprinted, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(3) Withdrawals made pursuant to section 204 of this Act may be used in carrying out management decisions, but public lands shall be removed from or restored to the operation of the Mining Law of 1872, as amended (R.S. 2318–2352; 30 U.S.C. 21 et seq.) or transferred to another department, bureau, or agency only by withdrawal action pursuant to section 204 or other action pursuant to applicable law: *Provided*, That nothing in this section shall prevent a wholly owned Government corporation from acquiring and holding rights as a citizen under the Mining Law of 1872.

(f) Procedures applicable to formulation of plans and programs for public land management

The Secretary shall allow an opportunity for public involvement and by regulation shall establish procedures, including public hearings where appropriate, to give Federal, State, and local governments and the public, adequate notice and opportunity to comment upon and participate in the formulation of plans and programs relating to the management of the public lands.

Sales of Public Land Tracts

Sec. 203 [43 U.S.C. 1713].

(a) Criteria for disposal; excepted lands

A tract of the public lands (except land in units of the National Wilderness Preservation System, National Wild and Scenic Rivers Systems, and National System of Trails) may be sold under this Act where, as a result of land use planning required under section 202 of this Act, the Secretary determines that the sale of such tract meets the following disposal criteria:

- (1)** such tract because of its location or other characteristics is difficult and uneconomic to manage as part of the public lands, and is not suitable for management by another Federal department or agency; or
- (2)** such tract was acquired for a specific purpose and the tract is no longer required for that or any other Federal purpose; or

(3) disposal of such tract will serve important public objectives, including but not limited to, expansion of communities and economic development, which cannot be achieved prudently or feasibly on land other than public land and which outweigh other public objectives and values, including, but not limited to, recreation and scenic values, which would be served by maintaining such tract in Federal ownership.

(b) Conveyance of land of agricultural value and desert in character

Where the Secretary determines that land to be conveyed under clause (3) of subsection (a) of this section is of agricultural value and is desert in character, such land shall be conveyed either under the sale authority of this section or in accordance with other existing law.

(c) Congressional approval procedures applicable to tracts in excess of two thousand five hundred acres

Where a tract of the public lands in excess of two thousand five hundred acres has been designated for sale, such sale may be made only after the end of the ninety days (not counting days on which the House of Representatives or the Senate has adjourned for more than three consecutive days) beginning on the day the Secretary has submitted notice of such designation to the Senate and the House of Representatives, and then only if the Congress has not adopted a concurrent resolution stating that such House does not approve of such designation. If the committee to which a resolution has been referred during the said ninety day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to the designation. A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider

the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same designation. When the committee has reprinted, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(d) Sale price

Sales of public lands shall be made at a price not less than their fair market value as determined by the Secretary.

(e) Maximum size of tracts

The Secretary shall determine and establish the size of tracts of public lands to be sold on the basis of the land use capabilities and development requirements of the lands; and, where any such tract which is judged by the Secretary to be chiefly valuable for agriculture is sold, its size shall be no larger than necessary to support a family-sized farm.

(f) Competitive bidding requirements

Sales of public lands under this section shall be conducted under competitive bidding procedures to be established by the Secretary. However, where the Secretary determines it necessary and proper in order (1) to assure equitable distribution among purchasers of lands, or (2) to recognize equitable considerations or public policies, including but not limited to, a preference to users, [the Secretary] may sell those lands with modified competitive bidding or without competitive bidding. In recognizing public policies, the Secretary shall give consideration to the following potential purchasers:

- (1)** the State in which the land is located;
- (2)** the local government entities in such State which are in the vicinity of the land;
- (3)** adjoining landowners;

(4) individuals; and

(5) any other person.

(g) Acceptance or rejection of offers to purchase

The Secretary shall accept or reject, in writing, any offer to purchase made through competitive bidding at [the Secretary's] invitation no later than thirty days after the receipt of such offer or, in the case of a tract in excess of two thousand five hundred acres, at the end of thirty days after the end of the ninety-day period provided in subsection (c) of this section, whichever is later, unless the offeror waives [his or her] right to a decision within such thirty-day period. Prior to the expiration of such periods the Secretary may refuse to accept any offer or may withdraw any land or interest in land from sale under this section when [the Secretary] determines that consummation of the sale would not be consistent with this Act or other applicable law.

Withdrawals of Lands

Sec. 204 [43 U.S.C. 1714].

(a) Authorization and limitation; delegation of authority

On and after the effective date of this Act the Secretary is authorized to make, modify, extend, or revoke withdrawals but only in accordance with the provisions and limitations of this section. The Secretary may delegate this withdrawal authority only to individuals in the Office of the Secretary who have been appointed by the President, by and with the advice and consent of the Senate.

(b) Application and procedures applicable subsequent to submission of application

(1) Within thirty days of receipt of an application for withdrawal, and whenever [the Secretary] proposes a withdrawal on [his or her] own motion, the Secretary shall publish a notice in the Federal Register stating that the application has been submitted for filing or the proposal has been made and the extent to which the land is

to be segregated while the application is being considered by the Secretary. Upon publication of such notice the land shall be segregated from the operation of the public land laws to the extent specified in the notice. The segregative effect of the application shall terminate upon (a) rejection of the application by the Secretary, (b) withdrawal of lands by the Secretary, or (c) the expiration of two years from the date of the notice.

(2) The publication provisions of this subsection are not applicable to withdrawals under subsection (e) hereof.

(c) Congressional approval procedures applicable to withdrawals aggregating five thousand acres or more

(1) On and after October 21, 1976, a withdrawal aggregating five thousand acres or more may be made (or such a withdrawal or any other withdrawal involving in the aggregate five thousand acres or more which terminates after such date of approval may be extended) only for a period of not more than twenty years by the Secretary on [his or her] own motion or upon request by a department or agency head. The Secretary shall notify both Houses of Congress of such a withdrawal no later than its effective date and the withdrawal shall terminate and become ineffective at the end of ninety days (not counting days on which the Senate or the House of Representatives has adjourned for more than three consecutive days) beginning on the day notice of such withdrawal has been submitted to the Senate and the House of Representatives, if the Congress has adopted a concurrent resolution stating that such House does not approve the withdrawal. If the committee to which a resolution has been referred during the said ninety day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to the Presidential recommendation.

A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same Presidential recommendation. When the committee has reprinted, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(2) With the notices required by subsection (c) (1) of this section and within three months after filing the notice under subsection (e) of this section, the Secretary shall furnish to the committees—

(1) a clear explanation of the proposed use of the land involved which led to the withdrawal;

(2) an inventory and evaluation of the current natural resource uses and values of the site and adjacent public and nonpublic land and how it appears they will be affected by the proposed use, including particularly aspects of use that might cause degradation of the environment, and also the economic impact of the change in use on individuals, local communities, and the Nation;

(3) an identification of present users of the land involved, and how they will be affected by the proposed use;

(4) an analysis of the manner in which existing and potential resource uses are incompatible with or in conflict with the proposed use, together with a statement of the provisions to be made for continuation or termination of existing uses, including an economic analysis of such continuation or termination;

(5) an analysis of the manner in which such lands will be used in relation to the specific requirements for the proposed use;

(6) a statement as to whether any suitable alternative sites are available (including cost estimates) for the proposed use or for uses such a withdrawal would displace;

(7) a statement of the consultation which has been or will be had with other Federal departments and agencies, with regional, State, and local government bodies, and with other appropriate individuals and groups;

(8) a statement indicating the effect of the proposed uses, if any, on State and local government interests and the regional economy;

(9) a statement of the expected length of time needed for the withdrawal;

(10) the time and place of hearings and of other public involvement concerning such withdrawal;

(11) the place where the records on the withdrawal can be examined by interested parties; and

(12) a report prepared by a qualified mining engineer, engineering geologist, or geologist which shall include but not be limited to information on: general geology, known mineral deposits, past and present mineral production, mining claims, mineral leases, evaluation of future mineral potential, present and potential market demands.

(d) Withdrawals aggregating less than five thousand acres; procedure applicable

A withdrawal aggregating less than five thousand acres may be made under this subsection by the

Secretary on [his or her] own motion or upon request by a department or an agency head—

(1) for such period of time as [the Secretary] deems desirable for a resource use; or

(2) for a period of not more than twenty years for any other use, including but not limited to use for administrative sites, location of facilities, and other proprietary purposes; or

(3) for a period of not more than five years to preserve such tract for a specific use then under consideration by the Congress.

(e) Emergency withdrawals; procedure applicable; duration

When the Secretary determines, or when the *Committee on Natural Resources of the House of Representatives or the Committee on Energy and Natural Resources of the Senate* [Pub. L. No. 103-437, 1994] notifies the Secretary, that an emergency situation exists and that extraordinary measures must be taken to preserve values that would otherwise be lost, the Secretary notwithstanding the provisions of subsections (c)(1) and (d) of this section, shall immediately make a withdrawal and file notice of such emergency withdrawal with *both of those Committees* [Pub. L. No. 103-437, 1994]. Such emergency withdrawal shall be effective when made but shall last only for a period not to exceed three years and may not be extended except under the provisions of subsection (c)(1) or (d), whichever is applicable, and (b)(1) of this section. The information required in subsection (c)(2) of this subsection shall be furnished the committees within three months after filing such notice.

(f) Review of existing withdrawals and extensions; procedure applicable to extensions; duration

All withdrawals and extensions thereof, whether made prior to or after October 21, 1976, having a specific period shall be reviewed by the Secretary toward the end of the withdrawal period and may be extended or further extended only upon compliance with the provisions of subsection (c)(1) or (d) of this section, whichever is applicable, and only if the Secretary determines that the purpose for which the withdrawal was first

made requires the extension, and then only for a period no longer than the length of the original withdrawal period. The Secretary shall report on such review and extensions to the *Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate* [Pub. L. No. 103-437, 1994].

(g) Processing and adjudication of existing applications

All applications for withdrawal pending on October 21, 1976 shall be processed and adjudicated to conclusion within fifteen years of October 21, 1976, in accordance with the provisions of this section. The segregative effect of any application not so processed shall terminate on that date.

(h) Public hearing required for new withdrawals

All new withdrawals made by the Secretary under this section (except an emergency withdrawal made under subsection (e) of this section) shall be promulgated after an opportunity for a public hearing.

(i) Consent for withdrawal of lands under administration of department or agency other than Department of the Interior

In the case of lands under the administration of any department or agency other than the Department of the Interior, the Secretary shall make, modify, and revoke withdrawals only with the consent of the head of the department or agency concerned, except when the provisions of subsection (e) of this section apply.

(j) Applicability of other Federal laws withdrawing lands as limiting authority

The Secretary shall not make, modify, or revoke any withdrawal created by Act of Congress; make a withdrawal which can be made only by Act of Congress; modify or revoke any withdrawal creating national monuments under *chapter 3203 of title 54, United States Code* [Pub. L. No. 113-287, 2014]; or modify, or revoke any withdrawal which added lands to the National Wildlife Refuge System prior to October 21, 1976, or which thereafter adds lands to that System under the terms of this Act. Nothing in this Act is intended to modify or

change any provision of the Act of February 27, 1976 (90 Stat. 199; 16 U.S.C. 668dd(a)).

(k) Authorization of appropriations for processing applications

There is hereby authorized to be appropriated the sum of \$10,000,000 for the purpose of processing withdrawal applications pending on the effective date of this Act, to be available until expended.

(l) Review of existing withdrawals in certain States; procedure applicable for determination of future status of lands; authorization of appropriations

(1) The Secretary shall, within fifteen years of the date of October 21, 1976, review withdrawals existing on October 21, 1976, in the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming of (1) all Federal lands other than withdrawals of the public lands administered by the Bureau of Land Management and of lands which, on October 21, 1976, were part of Indian reservations and other Indian holdings, the National Forest System, the National Park System, the National Wildlife Refuge System, other lands administered by the Fish and Wildlife Service or the Secretary through the Fish and Wildlife Service, the National Wild and Scenic Rivers System, and the National System of Trails; and (2) all public lands administered by the Bureau of Land Management and of lands in the National Forest System (except those in wilderness areas, and those areas formally identified as primitive or natural areas or designated as national recreation areas) which closed the lands to appropriation under the Mining Law of 1872 (17 Stat. 91, as amended; 30 U.S.C. 22 et seq.) or to leasing under the Mineral Leasing Act of 1920 (41 Stat. 437, as amended; 30 U.S.C. 181 et seq.).

(2) In the review required by paragraph (1) of this subsection, the Secretary shall determine whether, and for how long, the continuation of the existing withdrawal of the lands would be, in [the Secretary's] judgment, consistent with the statutory objectives of the programs for which the lands were dedicated and of the other

relevant programs. The Secretary shall report [his or her] recommendations to the President, together with statements of concurrence or nonconcurrence submitted by the heads of the departments or agencies which administer the lands. The President shall transmit this report to the President of the Senate and the Speaker of the House of Representatives, together with [the President's] recommendations for action by the Secretary, or for legislation. The Secretary may act to terminate withdrawals other than those made by Act of the Congress in accordance with the recommendations of the President unless before the end of ninety days (not counting days on which the Senate and the House of Representatives has adjourned for more than three consecutive days) beginning on the day the report of the President has been submitted to the Senate and the House of Representatives the Congress has adopted a concurrent resolution indicating otherwise. If the committee to which a resolution has been referred during the said ninety day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to the Presidential recommendation. A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same Presidential recommendation. When the committee has reprinted, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall

be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(3) There are hereby authorized to be appropriated not more than \$10,000,000 for the purpose of paragraph (1) of this subsection to be available until expended to the Secretary and to the heads of other departments and agencies which will be involved.

Acquisitions of Public Lands and Access Over Non-Federal Lands to National Forest System Units

Sec. 205 [43 U.S.C. 1715].

(a) Authorization and limitations on authority of Secretary of the Interior and Secretary of Agriculture

Notwithstanding any other provisions of law, the Secretary, with respect to the public lands and the Secretary of Agriculture, with respect to the acquisition of access over non-Federal lands to units of the National Forest System, are authorized to acquire pursuant to this Act by purchase, exchange, donation, or eminent domain, lands or interests therein: *Provided*, That with respect to the public lands, the Secretary may exercise the power of eminent domain only if necessary to secure access to public lands, and then only if the lands so acquired are confined to as narrow a corridor as is necessary to serve such purpose. Nothing in this subsection shall be construed as expanding or limiting the authority of the Secretary of Agriculture to acquire land by eminent domain within the boundaries of units of the National Forest System.

(b) Conformity to departmental policies and land-use plan of acquisitions

Acquisitions pursuant to this section shall be consistent with the mission of the department involved and with applicable departmental land-use plans.

(c) Status of lands and interests in lands upon acquisition by Secretary of the Interior; transfers to Secretary of Agriculture of lands and interests in lands acquired within National Forest System boundaries

Except as provided in subsection (e) of this section [Pub. L. No. 99-632, 1986], lands and interests in lands acquired by the Secretary pursuant to this section or section 206 shall, upon acceptance of title, become public lands, and, for the administration of public land laws not repealed by this Act, shall remain public lands. If such acquired lands or interests in lands are located within the exterior boundaries of a grazing district established pursuant to section 315 of this title, they shall become a part of that district. Lands and interests in lands acquired pursuant to this section which are within boundaries of the National Forest System may be transferred to the Secretary of Agriculture and shall then become National Forest System lands and subject to all the laws, rules, and regulations applicable thereto.

(d) Status of lands and interests in lands upon acquisition by Secretary of Agriculture

Lands and interests in lands acquired by the Secretary of Agriculture pursuant to this section shall, upon acceptance of title, become National Forest System lands subject to all the laws, rules, and regulations applicable thereto.

(e) Status and administration of lands acquired in exchange for lands revested in or reconveyed to United States

Lands acquired by the Secretary pursuant to this section or section 206 [43 U.S.C. 1716] *in exchange for lands which were revested in the United States pursuant to the provisions of the Act of June 9, 1916* (39 Stat. 218) *or reconveyed to the United States*

pursuant to the provisions of the Act of February 26, 1919 (40 Stat. 1179) [16 U.S.C. 342], shall be considered for all purposes to have the same status as, and shall be administered in accordance with the same provisions of law applicable to, the revested or reconveyed lands exchanged for the lands acquired by the Secretary [Pub. L. No. 99-632, 1986].

Exchanges of Public Lands or Interests Therein within the National Forest System

Sec. 206 [43 U.S.C. 1716].

(a) Authorization and limitations on authority of Secretary of the Interior and Secretary of Agriculture

A tract of public land or interests therein may be disposed of by exchange by the Secretary under this Act and a tract of land or interests therein within the National Forest System may be disposed of by exchange by the Secretary of Agriculture under applicable law where the Secretary concerned determines that the public interest will be well served by making that exchange: *Provided*, That when considering public interest the Secretary concerned shall give full consideration to better Federal land management and the needs of State and local people, including needs for lands for the economy, community expansion, recreation areas, food, fiber, minerals, and fish and wildlife and the Secretary concerned finds that the values and the objectives which Federal lands or interests to be conveyed may serve if retained in Federal ownership are not more than the values of the non-Federal lands or interests and the public objectives they could serve if acquired.

(b) Implementation requirements; cash equalization waiver

In exercising the exchange authority granted by subsection (a) of this section or by section 205(a) of this Act, the Secretary concerned [Pub. L. No. 100-409, 1988] may accept title to any non-Federal land or interests therein in exchange for such land, or interests therein which [the

Secretary] finds proper for transfer out of Federal ownership and which are located in the same State as the non-Federal land or interest to be acquired. For the purposes of this subsection, unsurveyed school sections which, upon survey by the Secretary, would become State lands, shall be considered as "non-Federal lands". The values of the lands exchanged by the Secretary under this Act and by the Secretary of Agriculture under applicable law relating to lands within the National Forest System either shall be equal, or if they are not equal, the values shall be equalized by the payment of money to the grantor or to the Secretary concerned as the circumstances require so long as payment does not exceed 25 per centum of the total value of the lands or interests transferred out of Federal ownership. *The Secretary concerned and the other party or parties involved in the exchange may mutually agree to waive the requirement for the payment of money to equalize values where the Secretary concerned determines that the exchange will be expedited thereby and that the public interest will be better served by such a waiver of cash equalization payments and where the amount to be waived is no more than 3 per centum of the value of the lands being transferred out of Federal ownership or \$15,000, whichever is less, except that the Secretary of Agriculture shall not agree to waive any such requirement for payment of money to the United States [Pub. L. No. 100-409, 1988].* The Secretary concerned shall try to reduce the amount of the payment of money to as small an amount as possible.

(c) Status of lands acquired upon exchange by Secretary of the Interior

Lands acquired by the Secretary by exchange under this section which are within the boundaries of any unit of the National Forest System, National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, or any other system established by Act of Congress, or the boundaries of the California Desert Conservation Area, or the boundaries of any national conservation area or national recreation area established by Act of Congress, upon acceptance of title by the United States shall immediately be reserved for and become

a part of the unit or area within which they are located, without further action by the Secretary, and shall thereafter be managed in accordance with all laws, rules, and regulations applicable to such unit or area [Pub. L. No. 100-409, 1988].

(d) Appraisal of land; submission to arbitrator; determination to proceed or withdraw from exchange; use of other valuation process; suspension of deadlines

(1) No later than ninety days after entering into an agreement to initiate an exchange of land or interests therein pursuant to this Act or other applicable law, the Secretary concerned and other party or parties involved in the exchange shall arrange for appraisal (to be completed within a time frame and under such terms as are negotiated by the parties) of the lands or interests therein involved in the exchange in accordance with subsection (f) of this section.

(2) If within one hundred and eighty days after the submission of an appraisal or appraisals for review and approval by the Secretary concerned, the Secretary concerned and the other party or parties involved cannot agree to accept the findings of an appraisal or appraisals, the appraisal or appraisals shall be submitted to an arbitrator appointed by the Secretary from a list of arbitrators submitted to [the Secretary] by the American Arbitration Association for arbitration to be conducted in accordance with the real estate valuation arbitration rules of the American Arbitration Association. Such arbitration shall be binding for a period of not to exceed two years on the Secretary concerned and the other party or parties involved in the exchange insofar as concerns the value of the lands which were the subject of the appraisal or appraisals.

(3) Within thirty days after the completion of the arbitration, the Secretary concerned and the other party or parties involved in the exchange shall determine whether to proceed with the exchange, modify the exchange to reflect the findings of the arbitration or any other factors, or to withdraw from the exchange. A decision to withdraw from the exchange may be made by either the Secretary concerned or the other party or parties involved.

(4) Instead of submitting the appraisal to an arbitrator, as provided in paragraph (2) of this section, the Secretary concerned and the other party or parties involved in an exchange may mutually agree to employ a process of bargaining or some other process to determine the values of the properties involved in the exchange.

(5) The Secretary concerned and the other party or parties involved in an exchange may mutually agree to suspend or modify any of the deadlines contained in this subsection.

(e) Simultaneous issue of patents or titles

Unless mutually agreed otherwise by the Secretary concerned and the other party or parties involved in an exchange pursuant to this Act or other applicable law, all patents or titles to be issued for lands or interests therein to be acquired by the Federal Government and lands or interests therein to be transferred out of Federal ownership shall be issued simultaneously after the Secretary concerned has taken any necessary steps to assure that the United States will receive acceptable title.

(f) New rules and regulations; appraisal rules and regulations; “costs and other responsibilities or requirements” defined

(1) Within one year after August 20, 1988, the Secretaries of the Interior and Agriculture shall promulgate new and comprehensive rules and regulations governing exchanges of land and interests therein pursuant to this Act and other applicable law. Such rules and regulations shall fully reflect the changes in law made by subsections (d) through (i) of this section and shall include provisions pertaining to appraisals of lands and interests therein involved in such exchanges.

(2) The provisions of the rules and regulations issued pursuant to paragraph (1) of this subsection governing appraisals shall reflect nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisitions: Provided, however, That the provisions of such rules and regulations shall –

(A) ensure that the same nationally approved appraisal standards are used in appraising lands or interests therein being acquired by the Federal Government and appraising lands or interests therein being transferred out of Federal ownership; and

(B) with respect to costs or other responsibilities or requirements associated with land exchanges –

(i) recognize that the parties involved in an exchange may mutually agree that one party (or parties) will assume, without compensation, all or part of certain costs or other responsibilities or requirements ordinarily borne by the other party or parties; and

(ii) also permit the Secretary concerned, where such Secretary determines it is in the public interest and it is in the best interest of consummating an exchange pursuant to this Act or other applicable law, and upon mutual agreement of the parties, to make adjustments to the relative values involved in an exchange transaction in order to compensate a party or parties to the exchange for assuming costs or other responsibilities or requirements which would ordinarily be borne by the other party or parties.

As used in this subparagraph, the term “costs or other responsibilities or requirements” shall include, but not be limited to, costs or other requirements associated with land surveys and appraisals, mineral examinations, title searches, archeological surveys and salvage, removal of encumbrances, arbitration pursuant to subsection (d) of this section, curing deficiencies preventing highest and best use, and other costs to comply with laws, regulations and policies applicable to exchange transactions, or which are necessary to bring the Federal or non-Federal lands or interests involved in the exchange to their highest and best use for the appraisal and exchange purposes. Prior to making any adjustments pursuant to this subparagraph, the Secretary concerned shall be satisfied that the amount of such adjustment is reasonable and accurately reflects the approximate

value of any costs or services provided or any responsibilities or requirements assumed.

(g) Exchanges to proceed under existing laws and regulations pending new rules and regulations

Until such time as new and comprehensive rules and regulations governing exchange of land and interests therein are promulgated pursuant to subsection (f) of this section, land exchanges may proceed in accordance with existing laws and regulations, and nothing in the Act shall be construed to require any delay in, or otherwise hinder, the processing and consummation of land exchanges pending the promulgation of such new and comprehensive rules and regulations. Where the Secretary concerned and the party or parties involved in an exchange have agreed to initiate an exchange of land or interests therein prior to the day of enactment of such subsections, subsections (d) through (i) of this section shall not apply to such exchanges unless the Secretary concerned and the party or parties involved in the exchange mutually agree otherwise.

(h) Exchange of lands or interests of approximately equal value; conditions; “approximately equal value” defined

(1) Notwithstanding the provisions of this Act and other applicable laws which require that exchanges of land or interests therein be for equal value, where the Secretary concerned determines it is in the public interest and that the consummation of a particular exchange will be expedited thereby, the Secretary concerned may exchange lands or interests therein which are of approximately equal value in cases where –

(A) the combined value of the lands or interests therein to be transferred from Federal ownership by the Secretary concerned in such exchange is not more than \$150,000; and

(B) the Secretary concerned finds in accordance with the regulations to be promulgated pursuant to subsection (f) of this section that a determination of approximately equal value can be made without formal appraisals, as based on a statement of value made by a qualified appraiser and approved by an authorized officer; and

(C) *the definition of and procedure for determining “approximately equal value” has been set forth in regulations by the Secretary concerned and the Secretary concerned documents how such determination was made in the case of the particular exchange involved.*

(2) *As used in this subsection, the term “approximately equal value” shall have the same meaning with respect to lands managed by the Secretary of Agriculture as it does in the Act of January 22, 1983 (commonly known as the “Small Tracts Act”).*

(i) Segregation from appropriation under mining and public land laws

(1) *Upon receipt of an offer to exchange lands or interests in lands pursuant to this Act or other applicable laws, at the request of the head of the department or agency having jurisdiction over the lands involved, the Secretary of the Interior may temporarily segregate the Federal lands under consideration for exchange from appropriation under the mining laws. Such temporary segregation may only be made for a period of not to exceed five years. Upon a decision not to proceed with the exchange or upon deletion of any particular parcel from the exchange offer, the Federal lands involved or deleted shall be promptly restored to their former status under the mining laws. Any segregation pursuant to this paragraph shall be subject to valid existing rights as of the date of such segregation.*

(2) *All non-Federal lands which are acquired by the United States through exchange pursuant to this Act or pursuant to other law applicable to lands managed by the Secretary of Agriculture shall be automatically segregated from appropriation under the public land law, including the mining laws, for ninety days after acceptance of title by the United States. Such segregation shall be subject to valid existing rights as of the date of such acceptance of title. At the end of such ninety day period, such segregation shall end and such lands*

shall be open to operation of the public land laws and to entry, location, and patent under the mining laws except to the extent otherwise provided by this Act or other applicable law, or appropriate actions pursuant thereto [Pub. L. No. 100-409, 1988].

[A statement of congressional findings and purposes related to this section is found, alongside various amendments to the section, in Pub. L. No. 100-409, § 2, 102 Stat. 1086, 1086-1087 (1988).]

Qualifications of Conveyees

Sec. 207 [43 U.S.C. 1717]. No tract of land may be disposed of under this Act, whether by sale, exchange, or donation, to any person who is not a citizen of the United States, or in the case of a corporation, is not subject to the laws of any State or of the United States.

Documents of Conveyance; Terms, Covenants, etc.

Sec. 208 [43 U.S.C. 1718]. The Secretary shall issue all patents or other documents of conveyance after any disposal authorized by this Act. The Secretary shall insert in any such patent or other document of conveyance [he or she] issues, except in the case of land exchanges, for which the provisions of subsection 206 (b) of this Act shall apply, such terms, covenants, conditions, and reservations as [the Secretary] deems necessary to insure proper land use and protection of the public interest: *Provided*, That a conveyance of lands by the Secretary, subject to such terms, covenants, conditions, and reservations, shall not exempt the grantee from compliance with applicable Federal or State law or State land use plans: *Provided further*, That the Secretary shall not make conveyances of public lands containing terms and conditions which would, at the time of the conveyance, constitute a violation of any law or regulation pursuant to State and local land use plans, or programs.

Mineral Interests; Reservation and Conveyance Requirements and Procedures

Sec. 209 [43 U.S.C. 1719].

(a) All conveyances of title issued by the Secretary, except those involving land exchanges provided for in section 206 of this Act, shall reserve to the United States all minerals in the lands, together with the right to prospect for, mine, and remove the minerals under applicable law and such regulations as the Secretary may prescribe, except that if the Secretary makes the findings specified in subsection (b) of this section, the minerals may then be conveyed together with the surface to the prospective surface owner as provided in subsection (b) of this section.

(b) (1) The Secretary, after consultation with the appropriate department or agency head, may convey mineral interests owned by the United States where the surface is or will be in non-Federal ownership, regardless of which Federal entity may have administered the surface, if [the Secretary] finds (1) that there are no known mineral values in the land, or (2) that the reservation of the mineral rights in the United States is interfering with or precluding appropriate non-mineral development of the land and that such development is a more beneficial use of the land than mineral development.

(2) Conveyance of mineral interests pursuant to this section shall be made only to the existing or proposed record owner of the surface, upon payment of administrative costs and the fair market value of the interests being conveyed.

(3) Before considering an application for conveyance of mineral interests pursuant to this section—

(i) the Secretary shall require the deposit by the applicant of a sum of money which [the Secretary] deems sufficient to cover

administrative costs including, but not limited to, costs of conducting an exploratory program to determine the character of the mineral deposits in the land, evaluating the data obtained under the exploratory program to determine the fair market value of the mineral interests to be conveyed, and preparing and issuing the documents of conveyance: *Provided, That*, if the administrative costs exceed the deposit, the applicant shall pay the outstanding amount; and, if the deposit exceeds the administrative costs, the applicant shall be given a credit for or refund of the excess; or

(ii) the applicant, with the consent of the Secretary, shall have conducted, and submitted to the Secretary the results of, such an exploratory program, in accordance with standards promulgated by the Secretary.

(4) Moneys paid to the Secretary for administrative costs pursuant to this subsection shall be paid to the agency which rendered the service and deposited to the appropriation then current.

Coordination by Secretary of the Interior with State and Local Governments

Sec. 210 [43 U.S.C. 1720]. At least sixty days prior to offering for sale or otherwise conveying public lands under this Act, the Secretary shall notify the Governor of the State within which such lands are located and the head of the governing body of any political subdivision of the State having zoning or other land use regulatory jurisdiction in the geographical area within which such lands are located, in order to afford the appropriate body the opportunity to zone or otherwise regulate, or change or amend existing zoning or other regulations concerning the use of such lands prior to such conveyance. The Secretary shall also promptly notify such public officials of the issuance of the patent or other document of conveyance for such lands.

Conveyances of Public Lands to States, Local Governments, etc.

Sec. 211 [43 U.S.C. 1721].

(a) Unsurveyed islands; authorization and limitations on authority

The Secretary is hereby authorized to convey to States or their political subdivisions under the Recreation and Public Purposes Act (44 Stat. 741 as amended; 43 U.S.C. 869 et seq.), as amended, but without regard to the acreage limitations contained therein, unsurveyed islands determined by the Secretary to be public lands of the United States. The conveyance of any such island may be made without survey: *Provided, however,* That such island may be surveyed at the request of the applicant State or its political subdivision if such State or subdivision donates money or services to the Secretary for such survey, the Secretary accepts such money or services, and such services are conducted pursuant to criteria established by the Director of the Bureau of Land Management. Any such island so surveyed shall not be conveyed without approval of such survey by the Secretary prior to the conveyance.

(b) Omitted lands; authorization and limitations on authority

(1) The Secretary is authorized to convey to States and their political subdivisions under the Recreation and Public Purposes Act [43 U.S.C. 869 to 869-4], but without regard to the acreage limitations contained therein, lands other than islands determined by [the Secretary] after survey to be public lands of the United States erroneously or fraudulently omitted from the original surveys (hereinafter referred to as “omitted lands”). Any such conveyance shall not be made without a survey: *Provided,* That the prospective recipient may donate money or services to the Secretary for the surveying necessary prior to conveyance if the Secretary accepts such money or services, such services are conducted pursuant to criteria established by the Director of the Bureau of Land Management, and such survey is approved by the Secretary prior to the conveyance.

(2) The Secretary is authorized to convey to the occupant of any omitted lands which, after survey, are found to have been occupied and developed for a five-year period prior to January 1, 1975, if the Secretary determines that such conveyance is in the public interest and will serve objectives which outweigh all public objectives and values which would be served by retaining such lands in Federal ownership. Conveyance under this subparagraph shall be made at not less than the fair market value of the land, as determined by the Secretary, and upon payment in addition of administrative costs, including the cost of making the survey, the cost of appraisal, and the cost of making the conveyance.

(c) Conformity with land use plans and programs and coordination with State and local governments of conveyances

(1) No conveyance shall be made pursuant to this section until the relevant State government, local government, and areawide planning agency designated pursuant to section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (80 Stat. 1255, 1262) [42 U.S.C. 3334] and/or section 6506 of title 31 have notified the Secretary as to the consistency of such conveyance with applicable State and local government land use plans and programs.

(2) The provisions of section 210 of this Act shall be applicable to all conveyances under this section.

(d) Applicability of other statutory requirements for authorized use of conveyed lands

The final sentence of section 1(c) of the Recreation and Public Purposes Act [43 U.S.C. 869(c)] shall not be applicable to conveyances under this section.

(e) Limitations on uses of conveyed lands

No conveyance pursuant to this section shall be used as the basis for determining the baseline between Federal and State ownership, the boundary of any State for purposes of determining the extent of a State’s submerged lands or the line of demarcation of Federal jurisdiction, or any similar or related purpose.

(f) Applicability to lands within National Forest System, National Park System, National Wildlife Refuge System, and National Wild and Scenic Rivers System

The provisions of this section shall not apply to any lands within the National Forest System, defined in the Act of August 17, 1974 (88 Stat. 476; 16 U.S.C. 1601), the National Park System, the National Wildlife Refuge System, and the National Wild and Scenic Rivers System.

(g) Applicability to other statutory provisions authorizing sale of specific omitted lands

Nothing in this section shall supersede the provisions of the Act of December 22, 1928 (45 Stat. 1069; 43 U.S.C. 1068), as amended, and the Act of May 31, 1962 (76 Stat. 89), or any other Act authorizing the sale of specific omitted lands.

Recreation and Public Purposes Act

Sec. 212. The Recreation and Public Purposes Act of 1926 (44 Stat. 741, as amended; 43 U.S.C. 869-4), as amended, is further amended as follows:

(a) The second sentence of subsection (a) of the first section of that Act (43 U.S.C. 869(a)) is amended to read as follows: "Before the land may be disposed of under this Act it must be shown to the satisfaction of the Secretary that the land is to be used for an established or definitely proposed project, that the land involved is not of national significance nor more than is reasonably necessary for the proposed use, and that for proposals of over 640 acres comprehensive land use plans and zoning regulations applicable to the area in which the public lands to be disposed of are located have been adopted by the appropriate State or local authority. The Secretary shall provide an opportunity for participation by affected citizens in disposals under this Act, including public hearings or meetings where [the Secretary] deems it appropriate to provide public comments, and shall hold at least one public meeting on any proposed disposal of more than six hundred forty acres under this Act."

(b) Subsection (b)(i) of the first section of that Act (43 U.S.C. 869(b)) is amended to read as follows:

"(b) Conveyances made in any one calendar year shall be limited as follows:

"(i) For recreational purposes:

"(A) To any State or the State park agency or any other agency having jurisdiction over the State park system of such State designated by the Governor of that State as its sole representative for acceptance of lands under this provision, hereinafter referred to as the State, or to any political subdivision of such State, six thousand four hundred acres, and such additional acreage as may be needed for small roadside parks and rest sites of not more than ten acres each.

"(B) To any nonprofit corporation or nonprofit association, six hundred and forty acres.

"(C) No more than twenty-five thousand six hundred acres may be conveyed for recreational purposes under this Act in any one State per calendar year. Should any State or political subdivision, however, fail to secure, in any one year, six thousand four hundred acres, not counting lands for small roadside parks and rest sites, conveyances may be made thereafter if pursuant to an application on file with the Secretary of the Interior on or before the last day of said year and to the extent that the conveyance would not have exceeded the limitations of said year."

(c) Section 2(a) of that Act (43 U.S.C. 869-1) is amended by inserting "or recreational purposes" immediately after "historic-monument purposes".

(d) Section 2(b) of that Act (43 U.S.C. 869-1) is amended by adding "; except that leases of such lands for recreational purposes shall be made without monetary consideration" after the phrase "reasonable annual rental".

National Forest Townsites

Sec. 213. The Act of July 31, 1958 (72 Stat. 438, 7 U.S.C. 1012a, 16 U.S.C. 478a), is amended to read as follows: "When the Secretary of Agriculture

determines that a tract of National Forest System land in Alaska or in the eleven contiguous Western States is located adjacent to or contiguous to an established community, and that transfer of such land would serve indigenous community objectives that outweigh the public objectives and values which would be served by maintaining such tract in Federal ownership, [the Secretary] may, upon application, set aside and designate as a townsite an area of not to exceed six hundred and forty acres of National Forest System land for any one application. After public notice, and satisfactory showing of need therefor by any county, city, or other local governmental subdivision, the Secretary may offer such area for sale to a governmental subdivision at a price not less than the fair market value thereof: *Provided, however,* That the Secretary may condition conveyances of townsites upon the enactment, maintenance, and enforcement of a valid ordinance which assures any land so conveyed will be controlled by the governmental subdivision so that use of the area will not interfere with the protection, management, and development of adjacent or contiguous National Forest System lands.”

Sale of Public Lands Subject to Unintentional Trespass

Sec. 214 [43 U.S.C. 1722].

(a) Preference right of contiguous landowners; offering price

Notwithstanding the provisions of the Act of September 26, 1968 (82 Stat. 870; 43 U.S.C. 1431–1435), hereinafter called the “1968 Act,” with respect to applications under the 1968 Act which were pending before the Secretary as of the effective date of this subsection and which [he or she] approves for sale under the criteria prescribed by the 1968 Act, [the Secretary] shall give the right of first refusal to those having a preference right under section 2 of the 1968 Act [43 U.S.C. 1432]. The Secretary shall offer such lands to such preference right holders at their fair market value (exclusive of any values added to the land by such holders and their predecessors in interest) as determined by the Secretary as of September 26, 1973.

(b) Procedures applicable

Within three years after October 21, 1976, the Secretary shall notify the filers of applications subject to paragraph (a) of this section whether [the Secretary] will offer them the lands applied for and at what price; that is, their fair market value as of September 26, 1973, excluding any value added to the lands by the applicants or their predecessors in interest. [The Secretary] will also notify the President of the Senate and the Speaker of the House of Representatives of the lands which [the Secretary] has determined not to sell pursuant to paragraph (a) of this section and the reasons therefor. With respect to such lands which the Secretary determined not to sell, [he or she] shall take no other action to convey those lands or interests in them before the end of ninety days (not counting days on which the House of Representatives or the Senate has adjourned for more than three consecutive days) beginning on the date the Secretary has submitted such notice to the Senate and House of Representatives. If, during that ninety-day period, the Congress adopts a concurrent resolution stating the length of time such suspension of action should continue, [the Secretary] shall continue such suspension for the specified time period. If the committee to which a resolution has been referred during the said ninety-day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to the suspension of action. A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same suspension of action. When the committee has

reprinted, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(c) Time for processing of applications and sales

Within five years after October 21, 1976, the Secretary shall complete the processing of all applications filed under the 1968 Act and hold sales covering all lands which [the Secretary] has determined to sell thereunder.

Temporary Revocation Authority

Sec. 215 [43 U.S.C. 1723].

(a) Exchange involved

When the sole impediment to consummation of an exchange of lands or interests therein (hereinafter referred to as an exchange) determined to be in the public interest, is the inability of the Secretary of the Interior to revoke, modify, or terminate part or all of a withdrawal or classification because of the order (or subsequent modification or continuance thereof) of the United States District Court for the District of Columbia dated February 10, 1986, in Civil Action No. 85-2238 (National Wildlife Federation v. Robert E. Burford, et al.), the Secretary of the Interior is hereby authorized, notwithstanding such order (or subsequent modification or continuance thereof), to use the authority contained herein, in lieu of other authority provided in this Act including section 204, to revoke, modify, or terminate in whole or in part, withdrawals or classifications to the extent deemed necessary by the Secretary to enable the United States to transfer land or interests therein out of Federal ownership pursuant to an exchange.

(b) Requirements

The authority specified in subsection (a) of this section may be exercised only in cases where –

(1) *a particular exchange is proposed to be carried out pursuant to this Act, as amended, or other applicable law authorizing such an exchange;*

(2) *the proposed exchange has been prepared in compliance with all laws applicable to such exchange;*

(3) *the head of each Federal agency managing the lands proposed for such transfer has submitted to the Secretary of the Interior a statement of concurrence with the proposed revocation, modification, or termination;*

(4) *at least sixty days have elapsed since the Secretary of the Interior has published in the Federal Register a notice of the proposed revocation, modification, or termination; and*

(5) *at least sixty days have elapsed since the Secretary of the Interior has transmitted to the Committee on Natural Resources [Pub. L. No. 103-437, 1994] of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate a report which includes –*

(A) *a justification for the necessity of exercising such authority in order to complete an exchange;*

(B) *an explanation of the reasons why the continuation of the withdrawal or a classification or portion thereof proposed for revocation, modification, or termination is no longer necessary for the purposes of the statutory or other program or programs for which the withdrawal or classification was made or other relevant programs;*

(C) *assurances that all relevant documents concerning the proposed exchange or purchase for which such authority is proposed to be exercised (including documents related to compliance with the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and all other applicable provisions of law) are available for public inspection in the office of the Secretary concerned located nearest to the lands proposed for transfer out of Federal ownership in furtherance of such exchange and that the relevant portions of such documents are also available in the offices of the Secretary concerned in Washington, District of Columbia; and*

(D) *an explanation of the effect of the revocation, modification, or termination of a withdrawal or classification or portion thereof and the transfer of lands out of Federal ownership pursuant to the particular proposed exchange, on the objectives of the land management plan which is applicable at the time of such transfer to the land to be transferred out of Federal ownership.*

(c) Limitations

(1) *Nothing in this section shall be construed as affirming or denying any of the allegations made by any party in the civil action specified in subsection (a) of this section, or as constituting an expression of congressional opinion with respect to the merits of any allegation, contention, or argument made or issue raised by any party in such action, or as expanding or diminishing the jurisdiction of the United States District Court for the District of Columbia.*

(2) *Except as specifically provided in this section, nothing in this section shall be construed as*

modifying, terminating, revoking, or otherwise affecting any provision of law applicable to land exchanges, withdrawals, or classifications.

(3) *The availability or exercise of the authority granted in subsection (a) of this section may not be considered by the Secretary of the Interior in making a determination pursuant to this Act or other applicable law as to whether or not any proposed exchange is in the public interest.*

(d) Termination

The authority specified in subsection (a) of this section shall expire either (1) on December 31, 1990, or (2) when the Court order (or subsequent modification or continuation thereof) specified in subsection (a) of this section is no longer in effect, whichever occurs first [Pub. L. No. 100-409, 1988].

[The termination clause in subsection (d) was satisfied on November 4, 1988, when the 1986 preliminary injunction order specified in subsection (a) was vacated by the District Court in *National Wildlife Federation v. Burford*, 699 F. Supp. 327, 332 (D.D.C. 1988).]

TITLE III ADMINISTRATION

Bureau of Land Management

Sec. 301 [43 U.S.C. 1731].

(a) Director; appointment, qualifications, functions, and duties

The Bureau of Land Management established by Reorganization Plan Numbered 3, of 1946 [11 Fed. Reg. 7875 (July 20, 1946), 60 Stat. 1097, 5 U.S.C. App.] shall have as its head a Director. Appointments to the position of Director shall hereafter be made by the President, by and with the advice and consent of the Senate. The Director of the Bureau shall have a broad background and substantial experience in public land and natural resource management. [The Director] shall carry out such functions and shall perform such duties as the Secretary may prescribe with respect to the management of lands and resources under [the Secretary's] jurisdiction according to the applicable provisions of this Act and any other applicable law.

(b) Statutory transfer of functions, powers and duties relating to administration of laws

Subject to the discretion granted to [the Secretary] by Reorganization Plan Numbered 3 of 1950 [15 Fed. Reg. 3174 (May 29, 1950), 64 Stat. 1262, 43 U.S.C. 1451 note], the Secretary shall carry out through the Bureau all functions, powers, and duties vested in [him or her] and relating to the administration of laws which, on October 21, 1976, were carried out by [the Secretary] through the Bureau of Land Management established by section 403 of Reorganization Plan Numbered 3 of 1946. The Bureau shall administer such laws according to the provisions thereof existing as of October 21, 1976, as modified by the provisions of this Act or by subsequent law.

(c) Associate Director, Assistant Directors, and other employees; appointment and compensation

In addition to the Director, there shall be an Associate Director of the Bureau and so many Assistant Directors, and other employees, as may be necessary, who shall be appointed by the Secretary subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(d) Existing regulations relating to administration of laws

Nothing in this section shall affect any regulation of the Secretary with respect to the administration of laws administered by [him or her] through the Bureau on October 21, 1976.

[Congress has specified that “appropriations . . . made [for the BLM], in fiscal year 1993 and thereafter, may be expended for surveys of Federal lands and on a reimbursable basis for surveys of Federal lands and for protection of lands for the State of Alaska.” Pub. L. No. 102-381, tit. I, 106 Stat. 1374, 1378 (1992), *codified* at 43 U.S.C. § 1731 note.]

Management of Use, Occupancy, and Development of Public Lands

Sec. 302 [43 U.S.C. 1732].

(a) Multiple use and sustained yield requirements applicable; exception

The Secretary shall manage the public lands under principles of multiple use and sustained yield, in accordance with the land use plans developed by [the Secretary] under section 202 of this Act

when they are available, except that where a tract of such public land has been dedicated to specific uses according to any other provisions of law it shall be managed in accordance with such law.

(b) Easements, permits, etc., for utilization through habitation, cultivation, and development of small trade or manufacturing concerns; applicable statutory requirements

In managing the public lands, the Secretary shall, subject to this Act and other applicable law and under such terms and conditions as are consistent with such law, regulate, through easements, permits, leases, licenses, published rules, or other instruments as the Secretary deems appropriate, the use, occupancy, and development of the public lands, including, but not limited to, long-term leases to permit individuals to utilize public lands for habitation, cultivation, and the development of small trade or manufacturing concerns: *Provided*, That unless otherwise provided for by law, the Secretary may permit Federal departments and agencies to use, occupy, and develop public lands only through rights-of-way under section 507 of this Act, withdrawals under section 204 of this Act, and, where the proposed use and development are similar or closely related to the programs of the Secretary for the public lands involved, cooperative agreements under subsection (b) of section 307 of this Act: *Provided further*, That nothing in this Act shall be construed as authorizing the Secretary concerned to require Federal permits to hunt and fish on public lands or on lands in the National Forest System and adjacent waters or as enlarging or diminishing the responsibility and authority of the States for management of fish and resident wildlife. However, the Secretary concerned may designate areas of public land and of lands in the National Forest System where, and establish periods when, no hunting or fishing will be permitted for reasons of public safety, administration, or compliance with provisions of applicable law. Except in emergencies, any regulations of the Secretary concerned relating to hunting and fishing pursuant to this section shall be put into effect only after consultation with the appropriate State fish and game department. Nothing in this

Act shall modify or change any provision of Federal law relating to migratory birds or to endangered or threatened species. Except as provided in section 314, section 603, and subsection (f) of section 601 of this Act and in the last sentence of this paragraph, no provision of this section or any other section of this Act shall in any way amend the Mining Law of 1872 or impair the rights of any locators or claims under that Act, including, but not limited to, rights of ingress and egress. In managing the public lands the Secretary shall, by regulation or otherwise, take any action necessary to prevent unnecessary or undue degradation of the lands.

(c) Revocation or suspension provision in instrument authorizing use, occupancy or development; violation of provision; procedure applicable

The Secretary shall insert in any instrument providing for the use, occupancy, or development of the public lands a provision authorizing revocation or suspension, after notice and hearing, of such instrument upon a final administrative finding of a violation of any term or condition of the instrument, including, but not limited to, terms and conditions requiring compliance with regulations under Acts applicable to the public lands and compliance with applicable State or Federal air or water quality standard or implementation plan: *Provided*, That such violation occurred on public lands covered by such instrument and occurred in connection with the exercise of rights and privileges granted by it: *Provided further*, That the Secretary shall terminate any such suspension no later than the date upon which [he or she] determines the cause of said violation has been rectified: *Provided further*, That the Secretary may order an immediate temporary suspension prior to a hearing or final administrative finding if [he or she] determines that such a suspension is necessary to protect health or safety or the environment: *Provided further*, That, where other applicable law contains specific provisions for suspension, revocation, or cancellation of a permit, license, or other authorization to use, occupy, or develop the public lands, the specific provisions of such law shall prevail.

(d) Authorization to utilize certain public lands in Alaska for military purposes

(1) *The Secretary of the Interior, after consultation with the Governor of Alaska, may issue to the Secretary of Defense or to the Secretary of a military department within the Department of Defense or to the Commandant of the Coast Guard a nonrenewable general authorization to utilize public lands in Alaska (other than within a conservation system unit or the Steese National Conservation Area or the White Mountains National Recreation Area) for purposes of military maneuvering, military training, or equipment testing not involving artillery firing, aerial or other gunnery, or other use of live ammunition or ordnance.*

(2) *Use of public lands pursuant to a general authorization under this subsection shall be limited to areas where such use would not be inconsistent with the plans prepared pursuant to section 202 of this Act. Each such use shall be subject to a requirement that the using department shall be responsible for any necessary cleanup and decontamination of the lands used, and to such other terms and conditions (including but not limited to restrictions on use of off-road or all-terrain vehicles) as the Secretary of the Interior may require to –*

(A) *minimize adverse impacts on the natural, environmental, scientific, cultural, and other resources and values (including fish and wildlife habitat) of the public lands involved; and*

(B) *minimize the period and method of such use and the interference with or restrictions on other uses of the public lands involved.*

(3) (A) *A general authorization issued pursuant to this subsection shall not be for a term of more than three years and shall be revoked in whole*

or in part, as the Secretary of the Interior finds necessary, prior to the end of such term upon a determination by the Secretary of the Interior that there has been a failure to comply with its terms and conditions or that activities pursuant to such an authorization have had or might have a significant adverse impact on the resources or values of the affected lands.

(B) *Each specific use of a particular area of public lands pursuant to a general authorization under this subsection shall be subject to specific authorization by the Secretary and to appropriate terms and conditions, including such as are described in paragraph (2) of this subsection.*

(4) *Issuance of a general authorization pursuant to this subsection shall be subject to the provisions of section 1712(f) of this title, section 3120 of title 16, and all other applicable provisions of law. The Secretary of a military department (or the Commandant of the Coast Guard) requesting such authorization shall reimburse the Secretary of the Interior for the costs of implementing this paragraph. An authorization pursuant to this subsection shall not authorize the construction of permanent structures or facilities on the public lands.*

(5) *To the extent that public safety may require closure to public use of any portion of the public lands covered by an authorization issued pursuant to this subsection, the Secretary of the military Department concerned or the Commandant of the Coast Guard shall take appropriate steps to notify the public concerning such closure and to provide appropriate warnings of risks to public safety.*

(6) *For purposes of this subsection, the term “conservation system unit” has the same meaning as specified in section 3102 of title 16 [Pub. L. No. 100-586, 1988].*

Enforcement Authority

Sec. 303 [43 U.S.C. 1733].

(a) Regulations for implementation of management, use, and protection requirements; violations; criminal penalties

The Secretary shall issue regulations necessary to implement the provisions of this Act with respect to the management, use, and protection of the public lands, including the property located thereon. Any person who knowingly and willfully violates any such regulation which is lawfully issued pursuant to this Act shall be fined no more than \$1,000 or imprisoned no more than twelve months, or both. Any person charged with a violation of such regulation may be tried and sentenced by any United States magistrate judge [Pub. L. No. 101-650, 1990] designated for that purpose by the court by which [the magistrate judge] was appointed, in the same manner and subject to the same conditions and limitations as provided for in section 3401 of title 18 of the United States Code.

[The \$1,000 maximum fine under subsection (a) has been superseded by 18 U.S.C. 3571. That statute provides a maximum fine of \$100,000 for an individual or \$200,000 for an organization, or twice the gross gain to the perpetrator or the gross loss to the victim, whichever is higher. Penalties may be even higher if the violation results in death.]

(b) Civil actions by Attorney General for violations of regulations; nature of relief; jurisdiction

At the request of the Secretary, the Attorney General may institute a civil action in any United States district court for an injunction or other appropriate order to prevent any person from utilizing public lands in violation of regulations issued by the Secretary under this Act.

(c) Contracts for enforcement of Federal laws and regulations by local law enforcement officials; procedure applicable; contract requirements and implementation

(1) When the Secretary determines that assistance is necessary in enforcing Federal laws and regulations relating to the public lands or their resources [the Secretary] shall offer a contract to appropriate local officials

having law enforcement authority within their respective jurisdictions with the view of achieving maximum feasible reliance upon local law enforcement officials in enforcing such laws and regulations. The Secretary shall negotiate on reasonable terms with such officials who have authority to enter into such contracts to enforce such Federal laws and regulations. In the performance of their duties under such contracts such officials and their agents are authorized to carry firearms; execute and serve any warrant or other process issued by a court or officer of competent jurisdiction; make arrests without warrant or process for a misdemeanor [they have] reasonable grounds to believe is being committed in [their] presence or view, or for a felony if [they have] reasonable grounds to believe that the person to be arrested has committed or is committing such felony; search without warrant or process any person, place, or conveyance according to any Federal law or rule of law; and seize without warrant or process any evidentiary item as provided by Federal law. The Secretary shall provide such law enforcement training as [he or she] deems necessary in order to carry out the contracted for responsibilities. While exercising the powers and authorities provided by such contract pursuant to this section, such law enforcement officials and their agents shall have all the immunities of Federal law enforcement officials.

(2) The Secretary may authorize Federal personnel or appropriate local officials to carry out [his or her] law enforcement responsibilities with respect to the public lands and their resources. Such designated personnel shall receive the training and have the responsibilities and authority provided for in paragraph (1) of this subsection.

(d) Cooperation with regulatory and law enforcement officials of any State or political subdivision in enforcement of laws or ordinances

In connection with the administration and regulation of the use and occupancy of the public lands, the Secretary is authorized to cooperate with the regulatory and law enforcement officials of any State or political subdivision thereof in the enforcement of the laws or ordinances of

such State or subdivision. Such cooperation may include reimbursement to a State or its subdivision for expenditures incurred by it in connection with activities which assist in the administration and regulation of use and occupancy of the public lands.

(e) Uniformed desert ranger force in California Desert Conservation Area; establishment; enforcement of Federal laws and regulations

Nothing in this section shall prevent the Secretary from promptly establishing a uniformed desert ranger force in the California Desert Conservation Area established pursuant to section 601 of this Act for the purpose of enforcing Federal laws and regulations relating to the public lands and resources managed by [the Secretary] in such area. The officers and members of such ranger force shall have the same responsibilities and authority as provided for in paragraph (1) of subsection (c) of this section.

(f) Applicability of other Federal enforcement provisions

Nothing in this Act shall be construed as reducing or limiting the enforcement authority vested in the Secretary by any other statute.

(g) Unlawful activities

The use, occupancy, or development of any portion of the public lands contrary to any regulation of the Secretary or other responsible authority, or contrary to any order issued pursuant to any such regulation, is unlawful and prohibited.

Fees, Charges, and Commissions

Sec. 304 [43 U.S.C. 1734].

(a) Authority to establish and modify

Notwithstanding any other provision of law, the Secretary may establish reasonable filing and service fees and reasonable charges, and commissions with respect to applications and other documents relating to the public lands and may change and abolish such fees, charges, and commissions.

(b) Deposits for payments to reimburse reasonable costs of United States

The Secretary is authorized to require a deposit of any payments intended to reimburse the United States for reasonable costs with respect to applications and other documents relating to such lands. The moneys received for reasonable costs under this subsection shall be deposited with the Treasury in a special account and are hereby authorized to be appropriated and made available until expended. As used in this section “reasonable costs” include, but are not limited to, the costs of special studies; environmental impact statements; monitoring construction, operation, maintenance, and termination of any authorized facility; or other special activities. In determining whether costs are reasonable under this section, the Secretary may take into consideration actual costs (exclusive of management overhead), the monetary value of the rights or privileges sought by the applicant, the efficiency to the government processing involved, that portion of the cost incurred for the benefit of the general public interest rather than for the exclusive benefit of the applicant, the public service provided, and other factors relevant to determining the reasonableness of the costs.

(c) Refunds

In any case where it shall appear to the satisfaction of the Secretary that any person has made a payment under any statute relating to the sale, lease, use, or other disposition of public lands which is not required or is in excess of the amount required by applicable law and the regulations issued by the Secretary, the Secretary, upon application or otherwise, may cause a refund to be made from applicable funds.

Availability of excess fees [43 U.S.C. 1734a] [Pub. L. No. 104–208, div. A, title I, § 101(d) [title I], Sept. 30, 1996, 110 Stat. 3009–181, 3009–182]. In fiscal year 1997 and thereafter, all fees, excluding mining claim fees, in excess of the fiscal year 1996 collections established by the Secretary of the Interior under the authority of section 1734 of this title for processing, recording, or documenting authorizations to use public

lands or public land natural resources (including cultural, historical, and mineral) and for providing specific services to public land users, and which are not presently being covered into any Bureau of Land Management appropriation accounts, and not otherwise dedicated by law for a specific distribution, shall be made immediately available for program operations in this account and remain available until expended.

Forfeitures and Deposits

Sec. 305 [43 U.S.C. 1735].

(a) Credit to separate account in Treasury; appropriation and availability

Any moneys received by the United States as a result of the forfeiture of a bond or other security by a resource developer or purchaser or permittee who does not fulfill the requirements of [his or her] contract or permit or does not comply with the regulations of the Secretary; or as a result of a compromise or settlement of any claim whether sounding in tort or in contract involving present or potential damage to the public lands shall be credited to a separate account in the Treasury and are hereby authorized to be appropriated and made available, until expended as the Secretary may direct, to cover the cost to the United States of any improvement, protection, or rehabilitation work on those public lands which has been rendered necessary by the action which has led to the forfeiture, compromise, or settlement.

(b) Expenditure of moneys collected administering Oregon and California Railroad and Coos Bay Wagon Road Grant lands

Any moneys collected under this Act in connection with lands administered under the Act of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181a- 1181j), shall be expended for the benefit of such land only.

(c) Refunds

If any portion of a deposit or amount forfeited under this Act is found by the Secretary to be in excess of the cost of doing the work authorized under this Act, the Secretary, upon application or otherwise, may cause a refund of the amount in excess to be made from applicable funds.

[Congress has frequently included provisions in the BLM's annual appropriations clarifying the purposes for which funds collected under this section may be used. A typical rider is found in Pub L. No. 113-235, div. F, title I, 128 Stat. 2130, 2398 (2014), and reads: "[N]otwithstanding any provision to the contrary of [subsection (a)], any moneys that have been or will be received pursuant to [this] section, whether as a result of forfeiture, compromise, or settlement, if not appropriate for refund pursuant to [subsection (c)], shall be available and may be expended . . . by the Secretary to improve, protect, or rehabilitate any public lands administered through the Bureau of Land Management which have been damaged by the action of a resource developer, purchaser, permittee, or any unauthorized person, without regard to whether all moneys collected from each such action are used on the exact lands damaged which led to the action: *Provided further*, That any such moneys that are in excess of amounts needed to repair damage to the exact land for which funds were collected may be used to repair other damaged public lands." Users should consult the most recent BLM appropriations act.]

Working Capital Fund

Sec. 306 [43 U.S.C. 1736].

(a) Establishment; availability of fund

There is hereby established a working capital fund for the management of the public lands. This fund shall be available without fiscal year limitation for expenses necessary for furnishing, in accordance with chapters 1 to 11 of title 40 and division C (except sections 3302, 3307(e), 3501(b), 3509, 3906, 4710, and 4711) of subtitle I of title 41 and regulations promulgated thereunder, supplies and equipment services in support of Bureau programs, including but not limited to, the purchase or construction of storage facilities, equipment yards, and related improvements and the purchase, lease, or rent of motor vehicles, aircraft, heavy equipment, and fire control and other resource management equipment within the limitations set forth in appropriations made to the Secretary for the Bureau.

(b) Initial funding; subsequent transfers

The initial capital of the fund shall consist of appropriations made for that purpose together with the fair and reasonable value at the fund's inception of the inventories, equipment, receivables, and other assets, less the liabilities, transferred to the fund. The Secretary is authorized to make such subsequent transfers to the fund as [the Secretary] deems appropriate in connection with the functions to be carried on through the fund.

(c) Payments credited to fund; amount; advancement or reimbursement

The fund shall be credited with payments from appropriations, and funds of the Bureau, other agencies of the Department of the Interior, other Federal agencies, and other sources, as authorized by law, at rates approximately equal to the cost of furnishing the facilities, supplies, equipment, and services (including depreciation and accrued annual leave). Such payments may be made in advance in connection with firm orders, or by way of reimbursement.

(d) Authorization of appropriations

There is hereby authorized to be appropriated a sum not to exceed \$3,000,000 as initial capital of the working capital fund.

Revolving fund derived from disposal of salvage timber [43 U.S.C. 1736a] [Pub. L. No. 102-381, title I,

Oct. 5, 1992, 106 Stat. 1376]. There is hereby established in the Treasury of the United States a special fund to be derived on and after October 5, 1992, from the Federal share of moneys received from the disposal of salvage timber prepared for sale from the lands under the jurisdiction of the Bureau of Land Management, Department of the Interior. The money in this fund shall be immediately available to the Bureau of Land Management without further appropriation, for the purposes of planning and preparing salvage timber for disposal, the administration of salvage timber sales, and subsequent site preparation and reforestation.

[The provision enacting this section further provided that “[n]othing in this provision shall alter the formulas currently in existence by law for the distribution of receipts for the applicable lands and timber resources.” See Pub. L. No. 102-381, tit. I, 106 Stat. 1374, 1376 (1992).]

Implementation Provisions

Sec. 307 [43 U.S.C. 1737].

(a) Investigations, studies, and experiments

The Secretary may conduct investigations, studies, and experiments, on [his or her] own initiative or in cooperation with others, involving the management, protection, development, acquisition, and conveying of the public lands.

(b) Contracts and cooperative agreements

Subject to the provisions of applicable law, the Secretary may enter into contracts and cooperative agreements involving the management, protection, development, and sale of public lands.

(c) Contributions and donations of money, services, and property

The Secretary may accept contributions or donations of money, services, and property, real, personal, or mixed, for the management, protection, development, acquisition, and conveying of the public lands, including the acquisition of rights-of-way for such purposes. [The Secretary] may accept contributions for cadastral surveying performed on federally controlled or intermingled lands. Moneys received hereunder shall be credited to a separate account in the Treasury and are hereby authorized to be appropriated and made available until expended, as the Secretary may direct, for payment of expenses incident to the function toward the administration of which the contributions were made and for refunds to depositors of amounts contributed by them in specific instances where contributions are in excess of their share of the cost.

(d) Recruitment of volunteers

The Secretary may recruit, without regard to the civil service classification laws, rules, or regulations, the services of individuals contributed without compensation as volunteers for aiding in or facilitating the activities administered by the Secretary through the Bureau of Land Management.

(e) Restrictions on activities of volunteers

In accepting such services of individuals as volunteers, the Secretary –

(1) shall not permit the use of volunteers in hazardous duty or law enforcement work, or in policymaking processes or to displace any employee; and

(2) may provide for services or costs incidental to the utilization of volunteers, including transportation, supplies, lodging, subsistence, recruiting, training, and supervision.

(f) Federal employment status of volunteers

Volunteers shall not be deemed employees of the United States except for the purposes of

[Pub. L. No. 98-540, 1984] –

(1) *the tort claims provisions of title 28;*

(2) *subchapter 1 of chapter 81 of title 5; and*

(3) *claims relating to damage to, or loss of, personal property of a volunteer incident to volunteer service, in which case the provisions of section 3721 of title 31 shall apply* [Pub. L. No. 101-286, 1990].

(g) Authorization of appropriations

Effective with fiscal years beginning after September 30, 1984, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of subsection (d) of this section, but not more than \$250,000 may be appropriated for any one fiscal year

[Pub. L. No. 98-540, 1984].

Contracts for Surveys and Resource Protection; Renewals; Funding Requirements

Sec. 308 [43 U.S.C. 1738].

(a) The Secretary is authorized to enter into contracts for the use of aircraft, and for supplies and services, prior to the passage of an appropriation therefor, for airborne cadastral survey and resource protection operations of the Bureau. [The Secretary] may renew such contracts annually, not more than twice, without additional competition. Such contracts shall obligate funds for the fiscal years in which the costs are incurred.

(b) Each such contract shall provide that the obligation of the United States for the ensuing fiscal years is contingent upon the passage of an applicable appropriation, and that no payment shall be made under the contract for the ensuing fiscal years until such appropriation becomes available for expenditure.

Advisory Councils

Sec. 309 [43 U.S.C. 1739].**(a) Establishment; membership; operation**

The Secretary *shall* [Pub. L. No. 95-514, 1978] establish advisory councils of not less than ten and not more than fifteen members appointed by [the Secretary] from among persons who are representative of the various major citizens' interests concerning the problems relating to land use planning or the management of the public lands located within the area for which an advisory council is established. At least one member of each council shall be an elected official of general purpose government serving the people of such area. To the extent practicable there shall be no overlap or duplication of such councils. Appointments shall be made in accordance with rules prescribed by the Secretary. The establishment and operation of an advisory council established under this section shall conform to the requirements of the Federal Advisory Committee Act (86 Stat. 770) [5 U.S.C. App. §§ 1-16].

(b) Meetings

Notwithstanding the provisions of subsection (a) of this section, each advisory council established by the Secretary under this section shall meet at least once a year with such meetings being called by the Secretary.

(c) Travel and per diem payments

Members of advisory councils shall serve without pay, except travel and per diem will be paid each member for meetings called by the Secretary.

(d) Functions

An advisory council may furnish advice to the Secretary with respect to the land use planning, classification, retention, management, and disposal of the public lands within the area for which the advisory council is established and such other matters as may be referred to it by the Secretary.

(e) Public participation; procedures applicable

In exercising [his or her] authorities under this Act, the Secretary, by regulation, shall establish procedures, including public hearings where

appropriate, to give the Federal, State, and local governments and the public adequate notice and an opportunity to comment upon the formulation of standards and criteria for, and to participate in, the preparation and execution of plans and programs for, and the management of, the public lands.

Rules and Regulations

Sec. 310 [43 U.S.C. 1740]. The Secretary, with respect to the public lands, shall promulgate rules and regulations to carry out the purposes of this Act and of other laws applicable to the public lands, and the Secretary of Agriculture, with respect to lands within the National Forest System, shall promulgate rules and regulations to carry out the purposes of this Act. The promulgation of such rules and regulations shall be governed by the provisions of chapter 5 of title 5 of the United States Code, without regard to section 553(a)(2). Prior to the promulgation of such rules and regulations, such lands shall be administered under existing rules and regulations concerning such lands to the extent practical.

Annual Reports

Sec. 311 [43 U.S.C. 1741].

(a) Purpose; time for submission

For the purpose of providing information that will aid Congress in carrying out its oversight responsibilities for public lands programs and for other purposes, the Secretary shall prepare a report in accordance with subsections (b) and (c) of this section and submit it to the Congress no later than one hundred and twenty days after the end of each fiscal year beginning with the report for fiscal year 1979.

(b) Format

A list of programs and specific information to be included in the report as well as the format of the report shall be developed by the Secretary after consulting with the *Committee on Natural*

Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate [Pub. L. No. 103-437, 1994] and shall be provided to the committees prior to the end of the second quarter of each fiscal year.

(c) Contents

The report shall include, but not be limited to, program identification information, program evaluation information, and program budgetary information for the preceding current and succeeding fiscal years.

Search, Rescue, and Protection Forces; Emergency Situations Authorizing Hiring

Sec. 312 [43 U.S.C. 1742]. Where in [the Secretary's] judgment sufficient search, rescue, and protection forces are not otherwise available, the Secretary is authorized in cases of emergency to incur such expenses as may be necessary

(a) in searching for and rescuing, or in cooperating in the search for and rescue of, persons lost on the public lands,

(b) in protecting or rescuing, or in cooperating in the protection and rescue of, persons or animals endangered by an act of God, and

(c) in transporting deceased persons or persons seriously ill or injured to the nearest place where interested parties or local authorities are located.

Disclosure of Financial Interests by Officers or Employees

Sec. 313 [43 U.S.C. 1743].

(a) Annual written statement; availability to public

Each officer or employee of the Secretary and the Bureau who—

(1) performs any function or duty under this Act; and

(2) has any known financial interest in any person who

(A) applies for or receives any permit, lease, or right-of-way under, or

(B) applies for or acquires any land or interests therein under, or

(C) is otherwise subject to the provisions of, this Act, shall, beginning on February 1, 1977, annually file with the Secretary a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) Implementation of requirements

The Secretary shall—

(1) act within ninety days after October 21, 1976—

(A) to define the term “known financial interests” for the purposes of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) Exempted personnel

In the rules prescribed in subsection (b) of this section, the Secretary may identify specific positions within the Department of the Interior which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees

occupying such positions shall be exempt from the requirements of this section.

(d) Violations; criminal penalties

Any officer or employee who is subject to, and knowingly violates, this section, shall be fined not more than \$2,500 or imprisoned not more than one year, or both.

Recordation of Mining Claims

Sec. 314 [43 U.S.C. 1744].

(a) Filing requirements

The owner of an unpatented lode or placer mining claim located prior to October 21, 1976, shall, within the three-year period following October 21, 1976 and prior to December 31 of each year thereafter, file the instruments required by paragraphs (1) and (2) of this subsection. The owner of an unpatented lode or placer mining claim located after October 21, 1976 shall, prior to December 31 of each year following the calendar year in which the said claim was located, file the instruments required by paragraphs (1) and (2) of this subsection:

(1) File for record in the office where the location notice or certificate is recorded either a notice of intention to hold the mining claim (including but not limited to such notices as are provided by law to be filed when there has been a suspension or deferment of annual assessment work), an affidavit of assessment work performed thereon, [or] a detailed report provided by section 28-1 of title 30, relating thereto.

(2) File in the office of the Bureau designated by the Secretary a copy of the official record of the instrument filed or recorded pursuant to paragraph (1) of this subsection, including a description of the location of the mining claim sufficient to locate the claimed lands on the ground.

(b) Additional filing requirements

The owner of an unpatented lode or placer mining claim or mill or tunnel site located prior to October 21, 1976 shall, within the three-year period following October 21, 1976, file in the office

of the Bureau designated by the Secretary a copy of the official record of the notice of location or certificate of location, including a description of the location of the mining claim or mill or tunnel site sufficient to locate the claimed lands on the ground. The owner of an unpatented lode or placer mining claim or mill or tunnel site located after October 21, 1976 shall, within ninety days after the date of location of such claim, file in the office of the Bureau designated by the Secretary a copy of the official record of the notice of location or certificate of location, including a description of the location of the mining claim or mill or tunnel site sufficient to locate the claimed lands on the ground.

(c) Failure to file as constituting abandonment; defective or untimely filing

The failure to file such instruments as required by subsections (a) and (b) of this section shall be deemed conclusively to constitute an abandonment of the mining claim or mill or tunnel site by the owner; but it shall not be considered a failure to file if the instrument is defective or not timely filed for record under other Federal laws permitting filing or recording thereof, or if the instrument is filed for record by or on behalf of some but not all of the owners of the mining claim or mill or tunnel site.

(d) Validity of claims, waiver of assessment, etc., as unaffected

Such recordation or application by itself shall not render valid any claim which would not be otherwise valid under applicable law. Nothing in this section shall be construed as a waiver of the assessment and other requirements of such law.

Disclaimer of Interest in Lands

Sec. 315 [43 U.S.C. 1745].

(a) Issuance of recordable document; criteria

After consulting with any affected Federal agency, the Secretary is authorized to issue a document of disclaimer of interest or interests in any lands in any form suitable for recordation, where the disclaimer will help remove a cloud on the title of such lands and where [the Secretary] determines

(1) a record interest of the United States in lands has terminated by operation of law or is otherwise invalid; or

(2) the lands lying between the meander line shown on a plat of survey approved by the Bureau or its predecessors and the actual shoreline of a body of water are not lands of the United States; or

(3) accreted, relicted, or avulsed lands are not lands of the United States.

(b) Procedures applicable

No document or disclaimer shall be issued pursuant to this section unless the applicant therefor has filed with the Secretary an application in writing and notice of such application setting forth the grounds supporting such application has been published in the Federal Register at least ninety days preceding the issuance of such disclaimer and until the applicant therefor has paid to the Secretary the administrative costs of issuing the disclaimer as determined by the Secretary. All receipts shall be deposited to the then-current appropriation from which expended.

(c) Construction as quit-claim deed from United States

Issuance of a document of disclaimer by the Secretary pursuant to the provisions of this section and regulations promulgated hereunder shall have the same effect as a quit-claim deed from the United States.

Correction of Conveyance Documents

Sec. 316 [43 U.S.C. 1746]. The Secretary may correct patents or documents of conveyance issued pursuant to section 208 of this Act or to other Acts relating to the disposal of public lands where necessary in order to eliminate errors. In addition, the Secretary may make corrections of errors in any documents of conveyance which have heretofore been issued by the Federal Government to dispose of public lands. *Any corrections authorized by this section which affect the boundaries of, or jurisdiction*

over, land administered by another Federal agency shall be made only after consultation with, and the approval of, the head of such other agency

[Pub. L. No. 108-7, 2003].

Mineral Revenues

Sec. 317. [This section has been codified in two separate sections of the United States Code, 30 U.S.C. 191 and 43 U.S.C. 1747, each of which has been subsequently amended. For ease of reference, the two sections are presented here separately, with their respective subdivisions.]

Disposition of moneys received [30 U.S.C. 191].

(a) In general

All money received from sales, bonuses, royalties including interest charges collected under the Federal Oil and Gas Royalty Management Act of 1982 [30 U.S.C. 1701 *et seq.*], and rentals of the public lands under the provisions of this chapter and the Geothermal Steam Act of 1970 [30 U.S.C. 1001 *et seq.*], shall be paid into the Treasury of the United States; and, subject to the provisions of subsection (b) of this section, 50 per centum thereof shall be paid by the Secretary of the Treasury to the State other than Alaska within the boundaries of which the leased lands or deposits are or were located; said moneys paid to any of such States on or after January 1, 1976, to be used by such State and its subdivisions, as the legislature of the State may direct giving priority to those subdivisions of the State socially or economically impacted by development of minerals leased under this Act, for (i) planning, (ii) construction and maintenance of public facilities, and (iii) provision of public service; and excepting those from Alaska, 40 per centum thereof shall be paid into, reserved, appropriated, as part of the reclamation fund created by the Act of Congress known as the Reclamation Act [43 U.S.C. 391 *note.*], approved June 17, 1902, and of those from Alaska, 90 per centum thereof shall be paid to the State of Alaska for disposition by the legislature thereof: *Provided*, That all moneys which may accrue to the United States under the provisions of this Act and the Geothermal Steam Act of 1970 from lands within the naval petroleum

reserves shall be deposited in the Treasury as "miscellaneous receipts," as provided by section 7433(b) of title 10. All moneys received under the provisions of this Act and the Geothermal Steam Act of 1970 not otherwise disposed of by this section shall be credited to miscellaneous receipts. *Payments to States under this section with respect to any moneys received by the United States, shall be made not later than the last business day of the month in which such moneys are warranted by the United States Treasury to the Secretary as having been received, except for any portion of such moneys which is under challenge and placed in a suspense account pending resolution of a dispute. Such warrants shall be issued by the United States Treasury not later than 10 days after receipt of such moneys by the Treasury. Moneys placed in a suspense account which are determined to be payable to a State shall be made not later than the last business day of the month in which such dispute is resolved. Any such amount placed in a suspense account pending resolution shall bear interest until the dispute is resolved.*

(b) Deduction for administrative costs

In determining the amount of payments to the States under this section, beginning in fiscal year 2014 and for each year thereafter, the amount of such payments shall be reduced by 2 percent for any administrative or other costs incurred by the United States in carrying out the program authorized by this Act, and the amount of such reduction shall be deposited to miscellaneous receipts of the Treasury.

(c) Rentals received on or after August 8, 2005

(1) *Notwithstanding the first sentence of subsection (a) of this section, any rentals received from leases in any State (other than the State of Alaska) on or after August 8, 2005 shall be deposited in the Treasury, to be allocated in accordance with paragraph (2).*

(2) *Of the amounts deposited in the Treasury under paragraph (1)—*

(A) *50 percent shall be paid by the Secretary of the Treasury to the State within the boundaries of*

which the leased land is located or the deposits were derived; and

(B) 50 percent shall be deposited in a special fund in the Treasury, to be known as the “BLM Permit Processing Improvement Fund” (referred to in this subsection as the “Fund”).

(3) Use of fund

(A) In general

The Fund shall be available to the Secretary of the Interior for expenditure, without further appropriation and without fiscal year limitation, for the coordination and processing of oil and gas use authorizations on onshore Federal and Indian trust mineral estate land.

(B) Accounts

The Secretary shall divide the Fund into—

(i) a Rental Account (referred to in this subsection as the “Rental Account”) comprised of rental receipts collected under this section; and

(ii) a Fee Account (referred to in this subsection as the “Fee Account”) comprised of fees collected under subsection (d).

(4) Rental account

(A) In general

The Secretary shall use the Rental Account for—

(i) the coordination and processing of oil and gas use authorizations on onshore Federal and Indian trust mineral estate land under the jurisdiction of the Project offices identified under section 365(d) of the Energy Policy Act of 2005 (42 U.S.C. 15924(d)); and

(ii) training programs for development of expertise related to coordinating and processing oil and gas use authorizations.

(B) Allocation

In determining the allocation of the Rental Account among Project offices for a fiscal year, the Secretary shall consider—

(i) the number of applications for permit to drill received in a Project office during the previous fiscal year;

(ii) the backlog of applications described in clause (i) in a Project office;

(iii) publicly available industry forecasts for development of oil and gas resources under the jurisdiction of a Project office; and

(iv) any opportunities for partnership with local industry organizations and educational institutions in developing training programs to facilitate the coordination and processing of oil and gas use authorizations.

(5) Fee account

(A) In general

The Secretary shall use the Fee Account for the coordination and processing of oil and gas use authorizations on onshore Federal and Indian trust mineral estate land.

(B) Allocation

The Secretary shall transfer not less than 75 percent of the revenues collected by an office for the processing of applications for permits to the State office of the State in which the fees were collected.

(d) BLM oil and gas permit processing fee

(1) In general

Notwithstanding any other provision of law, for each of fiscal years 2016 through 2026, the Secretary, acting through the Director of the Bureau of Land Management, shall collect a fee for each new application for a permit to drill that is submitted to the Secretary.

(2) Amount

The amount of the fee shall be \$ 9,500 for each new application, as indexed for United States dollar inflation from October 1, 2015 (as measured by the Consumer Price Index).

(3) Use

Of the fees collected under this subsection for a fiscal year, the Secretary shall transfer—

(A) *for each of fiscal years 2016 through 2019—*

(i) *15 percent to the field offices that collected the fees and used to process protests, leases, and permits under this Act, subject to appropriation; and*

(ii) *85 percent to the BLM Permit Processing Improvement Fund established under subsection (c)(2)(B) (referred to in this subsection as the "Fund"); and*

(B) *for each of fiscal years 2020 through 2026, all of the fees to the Fund.*

(4) Additional costs

During each of fiscal years of 2016 through 2026, the Secretary shall not implement a rulemaking that would enable an increase in fees to recover additional costs related to processing applications for permits to drill [Pub. L. No. 97-451, 1983; Pub. L. No. 100-203, 1987; Pub. L. No. 100-443, 1988; Pub. L. No. 103-66, 1993; Pub. L. No. 106-393, 2000; Pub. L. No. 109-58, 2005; Pub. L. No. 113-67, 2013; Pub. L. No. 113-291, 2014].

Loans to States and political subdivisions

[43 U.S.C. 1747].

(1) Purposes

The Secretary is authorized to make loans to States and their political subdivisions in order to relieve social or economic impacts occasioned by the development of minerals leased in such States pursuant to the Act of February 25, 1920, as amended [30 U.S.C. 181 et seq.]. Such loans shall be confined to the uses specified for the 50 per centum of mineral leasing revenues to be received by such States and subdivisions pursuant to section 35 of such Act [30 U.S.C. 191].

(2) Amounts

The total amount of loans outstanding pursuant to this section for any State and political subdivisions thereof in any year shall be not more than the anticipated mineral leasing revenues to be received

by that State pursuant to section 35 of the Act of February 25, 1920, as amended [30 U.S.C. 191], for the ten years following.

(3) Allocation

The Secretary, after consultation with the Governors of the affected States, shall allocate such loans among the States and their *political* subdivisions in a fair and equitable manner, giving priority to those States and subdivisions suffering the most severe impacts.

(4) Terms and conditions

Loans made pursuant to this section shall be subject to such terms and conditions as the Secretary determines necessary to assure the achievement of the purpose of this section. The Secretary shall promulgate such regulations as may be necessary to carry out the provisions of this section no later than three months after August 20, 1978.

(5) Interest rate

Loans made pursuant to this subsection shall bear interest equivalent to the lowest interest rate paid on an issue of at least \$1,000,000 of tax exempt bonds of such State or any agency thereof within the preceding calendar year.

(6) Security

Any loan made pursuant to this subsection shall be secured only by a pledge of the revenues received by the State or the political subdivision thereof pursuant to section 35 of the Act of February 25, 1920, as amended [30 U.S.C. 191], and shall not constitute an obligation upon the general property or taxing authority of such unit of government.

(7) Limitations

Notwithstanding any other provision of law, loans made pursuant to this subsection may be used for the non-Federal share of the aggregate cost of any project or program otherwise funded by the Federal Government which requires a non-Federal share for such project or program and which provides planning or public facilities otherwise eligible for assistance under this section.

(8) Forebearance for benefit of borrowers

Nothing in this subsection shall be construed to

preclude any forbearance for the benefit of the borrower including loan restructuring, which may be determined by the Secretary as justified by the failure of anticipated mineral development or related revenues to materialize as expected when the loan was made pursuant to this section.

(9) Recordkeeping requirements

Recipients of loans made pursuant to this section shall keep such records as the Secretary shall prescribe by regulation, including records which fully disclose the disposition of the proceeds of such assistance and such other records as the Secretary may require to facilitate an effective audit. The Secretary and the Comptroller General of the United States or their duly authorized representatives shall have access, for the purpose of audit, to such records.

(10) Discrimination prohibited

No person in the United States shall, on the grounds of race, color, religion, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or part with funds made available under this section.

(11) Deposit of receipts

All amounts collected in connection with loans made pursuant to this section, including interest payments or repayments of principal on loans, fees, and other moneys, derived in connection with this section, shall be deposited in the Treasury as miscellaneous receipts [Pub. L. No. 95-352, 1978].

[The official 43 U.S.C. 1747 contains a section heading and 11 subsection headings displayed together. For ease of reading, these headings were divided up and placed with the appropriate text in each subsection.]

Funding Requirements

Sec. 318 [43 U.S.C. 1748].

(a) Authorization of appropriations

There are authorized to be appropriated such sums as are necessary to carry out the purposes and provisions of this Act, but no amounts shall be appropriated to carry out after *October 1, 2002* [Pub. L. No. 104-333, 1996], any program, function,

or activity of the Bureau under this or any other Act unless such sums are specifically authorized to be appropriated as of October 21, 1976, or are authorized to be appropriated in accordance with the provisions of subsection (b) of this section.

(b) Procedure applicable for authorization of appropriations

Consistent with section 1110 of title 31, beginning May 15, 1977, and not later than May 15 of each second even numbered year thereafter, the Secretary shall submit to the Speaker of the House of Representatives and the President of the Senate a request for the authorization of appropriations for all programs, functions, and activities of the Bureau to be carried out during the four-fiscal-year period beginning on October 1 of the calendar year following the calendar year in which such request is submitted. The Secretary shall include in [his or her] request, in addition to the information contained in [the Secretary's] budget request and justification statement to the Office of Management and Budget, the funding levels which [the Secretary] determines can be efficiently and effectively utilized in the execution of [his or her] responsibilities for each such program, function, or activity, notwithstanding any budget guidelines or limitations imposed by any official or agency of the executive branch.

(c) Distribution of receipts from Bureau from disposal of lands, etc.

Nothing in this section shall apply to the distribution of receipts of the Bureau from the disposal of lands, natural resources, and interests in lands in accordance with applicable law, nor to the use of contributed funds, private deposits for public survey work, and townsite trusteeships, nor to fund allocations from other Federal agencies, reimbursements from both Federal and non-Federal sources, and funds expended for emergency firefighting and rehabilitation.

(d) Purchase of certain public lands from Land and Water Conservation Fund

In exercising the authority to acquire by purchase granted by subsection (a) of section 205 of this Act, the Secretary may use the Land and Water Conservation Fund to purchase lands which are necessary for proper management of public lands which are primarily of value for outdoor recreation purposes.

FLAME Wildfire Suppression Reserve Funds

[43 U.S.C. 1748a] [Pub. L. 111–88, div. A, title V, § 502, Oct. 30, 2009, 123 Stat. 2968].

(a) Definitions

In this section:

(1) Federal land

The term “Federal land” means—

- (A)** public land, as defined in section 1702 of this title;
- (B)** units of the National Park System;
- (C)** refuges of the National Wildlife Refuge System;
- (D)** land held in trust by the United States for the benefit of Indian tribes or members of an Indian tribe; and
- (E)** land in the National Forest System, as defined in section 1609(a) of title 16.

(2) FLAME Fund

The term “FLAME Fund” means a FLAME Wildfire Suppression Reserve Fund established by subsection (b).

(3) Relevant congressional committees

The term “relevant congressional committees” means the Committee on Appropriations, the Committee on Natural Resources, and the Committee on Agriculture of the House of Representatives and the Committee on Appropriations, the Committee on Energy and Natural Resources, and the Committee on Indian Affairs of the Senate.

(4) Secretary concerned

The term “Secretary concerned” means—

- (A)** the Secretary of the Interior, with respect to—
 - (i)** Federal land described in subparagraphs (A), (B), (C), and (D) of paragraph (1); and
 - (ii)** the FLAME Fund established for the Department of the Interior; and

(B) the Secretary of Agriculture, with respect to—

- (i)** National Forest System land; and
- (ii)** the FLAME Fund established for the Department of the Agriculture.

(b) Establishment of FLAME Funds

There is established in the Treasury of the United States the following accounts:

- (1)** The FLAME Wildfire Suppression Reserve Fund for the Department of the Interior.
- (2)** The FLAME Wildfire Suppression Reserve Fund for the Department of Agriculture.

(c) Purpose of FLAME Funds

The FLAME Funds shall be available to cover the costs of large or complex wildfire events and as a reserve when amounts provided for wildfire suppression and Federal emergency response in the Wildland Fire Management appropriation accounts are exhausted.

(d) Funding**(1) Credits to funds**

A FLAME Fund shall consist of the following:

- (A)** Such amounts as are appropriated to that FLAME Fund.
- (B)** Such amounts as are transferred to that FLAME Fund under paragraph (5).

(2) Authorization of appropriations**(A) Authorization of appropriations**

There are authorized to be appropriated to the FLAME Funds such amounts as are necessary to carry out this section.

(B) Congressional intent

It is the intent of Congress that, for fiscal year 2011 and each fiscal year thereafter, the amounts requested by the President for a FLAME Fund should be not less than the amount estimated by the Secretary concerned as the amount necessary for that fiscal year for wildfire

suppression activities of the Secretary that meet the criteria specified in subsection (e)(2)(B)(i).

(C) Sense of Congress on designation of flame fund appropriations, supplemental funding request, and supplement to other suppression funding

It is the sense of Congress that for fiscal year 2011 and each fiscal year thereafter—

- (i) amounts appropriated to a FLAME Fund in excess of the amount estimated by the Secretary concerned as the amount necessary for that fiscal year for wildfire suppression activities of the Secretary that meet the criteria specified in subsection (e)(2)(B)(i) should be designated as amounts necessary to meet emergency needs;
- (ii) the Secretary concerned should promptly make a supplemental request for additional funds to replenish the FLAME Fund if the Secretary determines that the FLAME Fund will be exhausted within 30 days; and
- (iii) funding made available through the FLAME Fund should be used to supplement the funding otherwise appropriated to the Secretary concerned for wildfire suppression and Federal emergency response in the Wildland Fire Management appropriation accounts.

(3) Availability

Amounts in a FLAME Fund shall remain available to the Secretary concerned until expended.

(4) Notice of insufficient funds

The Secretary concerned shall notify the relevant congressional committees if the Secretary estimates that only 60 days worth of funds remain in the FLAME Fund administered by that Secretary.

(5) Transfer authority

If a FLAME Fund has insufficient funds, the Secretary concerned administering the other FLAME Fund may transfer amounts to the FLAME Fund with insufficient funds. Not more than \$100,000,000 may be transferred from a FLAME Fund during any fiscal year under this authority.

(e) Use of FLAME Fund

(1) In general

Subject to paragraphs (2) and (3), amounts in a FLAME Fund shall be available to the Secretary concerned to transfer to the Wildland Fire Management appropriation account of that Secretary to pay the costs of wildfire suppression activities of that Secretary that are separate from amounts for wildfire suppression activities annually appropriated to that Secretary under the Wildland Fire Management appropriation account of that Secretary.

(2) Declaration required

(A) In general

Amounts in a FLAME Fund shall be available for transfer under paragraph (1) only after that Secretary concerned issues a declaration that a wildfire suppression event is eligible for funding from the FLAME Fund.

(B) Declaration criteria

A declaration by the Secretary concerned under subparagraph (A) may be issued only if—

- (i) in the case of an individual wildfire incident—
 - (I) the fire covers 300 or more acres; or
 - (II) the Secretary concerned determines that the fire has required an emergency Federal response based on the significant complexity, severity, or threat posed by the fire to human life, property, or resources; or
- (ii) the cumulative costs of wildfire suppression and Federal emergency response activities for the Secretary concerned will exceed, within 30 days, all of the amounts previously appropriated (including amounts appropriated under an emergency designation, but excluding amounts appropriated to the FLAME Fund) to the Secretary concerned for wildfire suppression and Federal emergency response.

(3) State, private, and tribal land

Use of a FLAME Fund for emergency wildfire suppression activities on State land, private land, and tribal land shall be consistent with any existing agreements in which the Secretary concerned has agreed to assume responsibility for wildfire suppression activities on the land.

(f) Treatment of anticipated and predicted activities

For fiscal year 2011 and subsequent fiscal years, the Secretary concerned shall request funds within the Wildland Fire Management appropriation account of that Secretary for regular wildfire suppression activities that do not meet the criteria specified in subsection (e)(2)(B)(i).

(g) Prohibition on other transfers

The Secretary concerned may not transfer funds from non-fire accounts to the Wildland Fire Management appropriation account of that Secretary unless amounts in the FLAME Fund of that Secretary and any amounts appropriated to that Secretary for the purpose of wildfire suppression will be exhausted within 30 days.

(h) Accounting and reports**(1) Accounting and reporting requirements**

The Secretary concerned shall account and report on amounts transferred from the respective FLAME Fund in a manner that is consistent with existing National Fire Plan reporting procedures.

(2) Annual report

The Secretary concerned shall submit to the relevant congressional committees and make available to the public an annual report that—

(A) describes the obligation and expenditure of amounts transferred from the FLAME Fund; and

(B) includes any recommendations that the Secretary concerned may have to improve the administrative control and oversight of the FLAME Fund.

(3) Estimates of wildfire suppression costs to improve budgeting and funding**(A) In general**

Consistent with the schedule provided in subparagraph (C), the Secretary concerned shall submit to the relevant congressional committees an estimate of anticipated wildfire suppression costs for the applicable fiscal year.

(B) Independent review

The methodology for developing the estimates under subparagraph (A) shall be subject to periodic independent review to ensure compliance with subparagraph (D).

(C) Schedule

The Secretary concerned shall submit an estimate under subparagraph (A) during—

- (i)** the first week of March of each year;
- (ii)** the first week of May of each year;
- (iii)** the first week of July of each year; and

(iv) if a bill making appropriations for the Department of the Interior and the Forest Service for the following fiscal year has not been enacted by September 1, the first week of September of each year.

(D) Requirements

An estimate of anticipated wildfire suppression costs shall be developed using the best available—

- (i)** climate, weather, and other relevant data; and
- (ii)** models and other analytic tools.

(i) Termination of authority

The authority of the Secretary concerned to use the FLAME Fund established for that Secretary shall terminate at the end of the third fiscal year in which no appropriations to, or withdrawals from, that FLAME Fund have been made for a period of three consecutive fiscal years. Upon termination

of such authority, any amounts remaining in the affected FLAME Fund shall be transferred to, and made a part of, the Wildland Fire Management appropriation account of the Secretary concerned for wildland suppression activities.

Cohesive wildfire management strategy

[43 U.S.C. 1748b] [Pub. L. 111-88, div. A, title V, § 503, Oct. 30, 2009, 123 Stat. 2971].

(a) Strategy required

Not later than one year after October 30, 2009, the Secretary of the Interior and the Secretary of Agriculture, acting jointly, shall submit to Congress a report that contains a cohesive wildfire management strategy, consistent with the recommendations described in recent reports of the Government Accountability Office regarding management strategies.

(b) Elements of strategy

The strategy required by subsection (a) shall provide for—

- (1) the identification of the most cost-effective means for allocating fire management budget resources;
- (2) the reinvestment in non-fire programs by the Secretary of the Interior and the Secretary of Agriculture;

(3) employing the appropriate management response to wildfires;

(4) assessing the level of risk to communities;

(5) the allocation of hazardous fuels reduction funds based on the priority of hazardous fuels reduction projects;

(6) assessing the impacts of climate change on the frequency and severity of wildfire; and

(7) studying the effects of invasive species on wildfire risk.

(c) Revision

At least once during each five-year period beginning on the date of the submission of the cohesive wildfire management strategy under subsection (a), the Secretary of the Interior and the Secretary of Agriculture shall revise the strategy to address any changes affecting the strategy, including changes with respect to landscape, vegetation, climate, and weather.

TITLE IV

RANGE MANAGEMENT

Grazing Fees

Sec. 401 [43 U.S.C. 1751].

(a) Feasibility study; contents; submission of report

The Secretary of Agriculture and the Secretary of the Interior shall jointly cause to be conducted a study to determine the value of grazing on the lands under their jurisdiction in the eleven Western States with a view to establishing a fee to be charged for domestic livestock grazing on such lands which is equitable to the United States and to the holders of grazing permits and leases on such lands. In making such study, the Secretaries shall take into consideration the costs of production normally associated with domestic livestock grazing in the eleven Western States, differences in forage values, and such other factors as may relate to the reasonableness of such fees. The Secretaries shall report the result of such study to the Congress not later than one year from and after October 21, 1976, together with recommendations to implement a reasonable grazing fee schedule based upon such study. If the report required herein has not been submitted to the Congress within one year after October 21, 1976, the grazing fee charge then in effect shall not be altered and shall remain the same until such report has been submitted to the Congress. Neither Secretary shall increase the grazing fee in the 1977 grazing year.

(b) Annual distribution and use of range betterment funds; nature of distributions

(1) Congress finds that a substantial amount of the Federal range lands is deteriorating

in quality, and that installation of additional range improvements could arrest much of the continuing deterioration and could lead to substantial betterment of forage conditions with resulting benefits to wildlife, watershed protection, and livestock production. Congress therefore directs that 50 per centum or *\$10,000,000 per annum, whichever is greater* [Pub. L. No. 95-514, 1978] of all moneys received by the United States as fees for grazing domestic livestock on public lands (other than from ceded Indian lands) under the Taylor Grazing Act (48 Stat. 1269; 43 U.S.C. 315 et seq.) and the Act of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181d), and on lands in National Forests in the *sixteen* [Pub. L. No. 95-514, 1978] contiguous Western States under the provisions of this section shall be credited to a separate account in the Treasury, one-half of which is authorized to be appropriated and made available for use in the district, region, or national forest from which such moneys were derived, as the respective Secretary may direct after consultation with district, regional, or national forest user representatives, for the purpose of on-the-ground range rehabilitation, protection, and improvements on such lands, and the remaining one-half shall be used for on-the-ground range rehabilitation, protection, and improvements as the Secretary concerned directs. Any funds so appropriated shall be in addition to any other appropriations made to the respective Secretary for planning and administration of the range betterment program and for other range management. Such rehabilitation, protection, and improvements shall include all forms of range land betterment including, but not limited to, seeding and reseeding, fence construction,

weed control, water development, and fish and wildlife habitat enhancement as the respective Secretary may direct after consultation with user representatives. The annual distribution and use of range betterment funds authorized by this paragraph shall not be considered a major Federal action requiring a detailed statement pursuant to section 4332(c) of title 42 of the United States Code.

(2) All distributions of moneys made under subsection (b) (1) of this section shall be in addition to distributions made under section 10 of the Taylor Grazing Act [43 U.S.C. 315i] and shall not apply to distribution of moneys made under section 11 of that Act [43 U.S.C. 315j]. The remaining moneys received by the United States as fees for grazing domestic livestock on the public lands shall be deposited in the Treasury as miscellaneous receipts.

[The original 43 U.S.C. 1751 contains a section heading and multiple subheadings displayed together. For ease of reading, these headings were divided up and placed with the appropriate text.]

Grazing Leases and Permits

Sec. 402 [43 U.S.C. 1752].

(a) Terms and conditions

Except as provided in subsection (b) of this section, permits and leases for domestic livestock grazing on public lands issued by the Secretary under the Act of June 28, 1934 (48 Stat. 1269, as amended; 43 U.S.C. 315 et seq.) or the Act of August 28, 1937 (50 Stat. 874, as amended; 43 U.S.C. 1181a-1181j), or by the Secretary of Agriculture, with respect to lands within National Forests in the *sixteen* [Pub. L. No. 95-514, 1978] contiguous Western States, shall be for a term of ten years subject to such terms and conditions the Secretary concerned deems appropriate and consistent with the governing law, including, but not limited to, the authority of the Secretary concerned to cancel, suspend, or modify a grazing permit or lease, in whole or in part, pursuant to the terms and conditions thereof, or to cancel or suspend a grazing permit or lease for any violation of a grazing regulation or of any term or condition of such grazing permit or lease.

(b) Terms of lesser duration

Permits or leases may be issued by the Secretary concerned for a period shorter than ten years where the Secretary concerned determines that—

- (1) the land is pending disposal; or
- (2) the land will be devoted to a public purpose prior to the end of ten years; or
- (3) it will be in the best interest of sound land management to specify a shorter term: *Provided*, That the absence from an allotment management plan of details the Secretary concerned would like to include but which are undeveloped shall not be the basis for establishing a term shorter than ten years: *Provided further*, That the absence of completed land use plans or court ordered environmental statements shall not be the sole basis for establishing a term shorter than ten years unless the Secretary determines on a case-by-case basis that the information to be contained in such land use plan or court ordered environmental impact statement is necessary to determine whether a shorter term should be established for any of the reasons set forth in items (1) through (3) of this subsection [Pub. L. No. 95-514, 1978].

(c) First priority for renewal of expiring permit or lease

(1) Renewal of expiring or transferred permit or lease

During any period in which (A) [Pub. L. No. 113-291, 2014] the lands for which the permit or lease is issued remain available for domestic livestock grazing in accordance with land use plans prepared pursuant to section 1712 of this title or section 1604 of title 16, (B) [Pub. L. No. 113-291, 2014] the permittee or lessee is in compliance with the rules and regulations issued and the terms and conditions in the permit or lease specified by the Secretary concerned, and (C) [Pub. L. No. 113-291, 2014] the permittee or lessee accepts the terms and conditions to be included by the Secretary concerned in the new permit or lease, the holder of the expiring permit or lease shall be given first priority for receipt of the new permit or lease.

(2) Continuation of terms under new permit or lease

The terms and conditions in a grazing permit or lease that has expired, or was terminated due to a grazing preference transfer, shall be continued under a new permit or lease until the date on which the Secretary concerned completes any environmental analysis and documentation for the permit or lease required under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and other applicable laws.

(3) Completion of processing

As of the date on which the Secretary concerned completes the processing of a grazing permit or lease in accordance with paragraph (2), the permit or lease may be canceled, suspended, or modified, in whole or in part.

(4) Environmental reviews

The Secretary concerned shall seek to conduct environmental reviews on an allotment or multiple allotment basis, to the extent practicable, if the allotments share similar ecological conditions, for purposes of compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and other applicable laws [Pub. L. No. 113-291, 2014].

(d) Allotment management plan requirements

All permits and leases for domestic livestock grazing issued pursuant to this section may incorporate an allotment management plan developed by the Secretary concerned. However, nothing in this subsection shall be construed to supersede any requirement for completion of court ordered environmental impact statements prior to development and incorporation of allotment management plans. If the Secretary concerned elects to develop an allotment management plan for a given area, [the Secretary] shall do so in careful and considered consultation, cooperation and coordination with the lessees, permittees, and landowners involved, the district grazing advisory boards established pursuant to section 403 of this Act, and any State or States having lands within the area to be covered by such allotment management plan. Allotment management plans shall be tailored to the specific range condition of the area to be covered by such plan, and shall be reviewed on a

periodic basis to determine whether they have been effective in improving the range condition of the lands involved or whether such lands can be better managed under the provisions of subsection (e) of this section. The Secretary concerned may revise or terminate such plans or develop new plans from time to time after such review and careful and considered consultation, cooperation and coordination with the parties involved. As used in this subsection, the terms "court ordered environmental impact statement" and "range condition" shall be defined as in the "Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 et seq.)" [Pub. L. No. 95-514, 1978].

(e) Omission of allotment management plan requirements and incorporation of appropriate terms and conditions; reexamination of range conditions

In [Pub. L. No. 95-514, 1978] all cases where the Secretary concerned has not completed an allotment management plan or determines that an allotment management plan is not necessary for management of livestock operations and will not be prepared, the Secretary concerned shall incorporate in grazing permits and leases such terms and conditions as [he or she] deems appropriate for management of the permitted or leased lands pursuant to applicable law. The Secretary concerned shall also specify therein the numbers of animals to be grazed and the seasons of use and that [the Secretary] may reexamine the condition of the range at any time and, if [he or she] finds on reexamination that the condition of the range requires adjustment in the amount or other aspect of grazing use, that the permittee or lessee shall adjust [his or her] use to the extent the Secretary concerned deems necessary. Such readjustment shall be put into full force and effect on the date specified by the Secretary concerned.

(f) Allotment management plan applicability to non-Federal lands; appeal rights

Allotment management plans shall not refer to livestock operations or range improvements on non-Federal lands except where the non-Federal lands are intermingled with, or, with the consent of the permittee or lessee involved, associated with, the Federal lands subject to the plan. The Secretary concerned under appropriate regulations shall grant to lessees and permittees the right of appeal

from decisions which specify the terms and conditions of allotment management plans. The preceding sentence of this subsection shall not be construed as limiting any other right of appeal from decisions of such officials.

(g) Cancellation of permit or lease; determination of reasonable compensation; notice

Whenever a permit or lease for grazing domestic livestock is canceled in whole or in part, in order to devote the lands covered by the permit or lease to another public purpose, including disposal, the permittee or lessee shall receive from the United States a reasonable compensation for the adjusted value, to be determined by the Secretary concerned, of [his or her] interest in authorized permanent improvements placed or constructed by the permittee or lessee on lands covered by such permit or lease, but not to exceed the fair market value of the terminated portion of the permittee's or lessee's interest therein. Except in cases of emergency, no permit or lease shall be canceled under this subsection without two years' prior notification.

(h) National Environmental Policy Act of 1969

(1) In general

The issuance of a grazing permit or lease by the Secretary concerned may be categorically excluded from the requirement to prepare an environmental assessment or an environmental impact statement under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) if—

(A) *the issued permit or lease continues the current grazing management of the allotment; and*

(B) *the Secretary concerned—*

(i) *has assessed and evaluated the grazing allotment associated with the lease or permit; and*

(ii) *based on the assessment and evaluation under clause (i), has determined that the allotment—*

(I) *with respect to public land administered by the Secretary of the Interior—*

(aa) *is meeting land health standards; or*

(bb) *is not meeting land health standards due to factors other than existing livestock grazing; or*

(II) *with respect to National Forest System land administered by the Secretary of Agriculture—*

(aa) *is meeting objectives in the applicable land and resource management plan; or*

(bb) *is not meeting the objectives in the applicable land resource management plan due to factors other than existing livestock grazing.*

(2) Trailing and crossing

The trailing and crossing of livestock across public land and National Forest System land and the implementation of trailing and crossing practices by the Secretary concerned may be categorically excluded from the requirement to prepare an environmental assessment or an environmental impact statement under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(i) Priority and timing for completion of environmental analyses

The Secretary concerned, in the sole discretion of the Secretary concerned, shall determine the priority and timing for completing each required environmental analysis with respect to a grazing allotment, permit, or lease based on—

(1) *the environmental significance of the grazing allotment, permit, or lease; and*

(2) *the available funding for the environmental analysis [Pub. L. No. 113–291, 2014].*

(j) [Pub. L. No. 113–291, 2014] Applicability of provisions to rights, etc., in or to public lands or lands in National Forests

Nothing in this Act shall be construed as modifying in any way law existing on October 21, 1976 with respect to the creation of right, title, interest or estate in or to public lands or lands in National Forests by issuance of grazing permits and leases.

Grazing Advisory Boards

[As indicated in subsection (f), this section has expired, and the Department no longer maintains grazing advisory boards. Resource advisory councils are addressed separately, in section 309.]

Sec. 403 [43 U.S.C. 1753].

(a) Establishment; maintenance

For each Bureau district office and National Forest headquarters office in the *sixteen* [Pub. L. No. 95-514, 1978] contiguous Western States having jurisdiction over more than five hundred thousand acres of lands subject to commercial livestock grazing (hereinafter in this section referred to as “office”), the Secretary and the Secretary of Agriculture, upon the petition of a simple majority of the livestock lessees and permittees under the jurisdiction of such office, shall establish and maintain at least one grazing advisory board of not more than fifteen advisers.

(b) Functions

The function of grazing advisory boards established pursuant to this section shall be to offer advice and make recommendations to the head of the office involved concerning the development of allotment management plans and the utilization of range-betterment funds.

(c) Appointment and terms of members

The number of advisers on each board and the number of years an adviser may serve shall be determined by the Secretary concerned in [his or her] discretion. Each board shall consist of livestock representatives who shall be lessees or permittees in the area administered by the office concerned and shall be chosen by the lessees and permittees in the area through an election prescribed by the Secretary concerned.

(d) Meetings

Each grazing advisory board shall meet at least once annually.

(e) Federal Advisory Committee Act applicability

Except as may be otherwise provided by this section, the provisions of the Federal Advisory Committee Act (86 Stat. 770) [5 U.S.C. App. §§ 1-16] shall apply to grazing advisory boards.

(f) Expiration date

The provisions of this section shall expire December 31, 1985.

Transportation of Captured Animals; Procedures and Prohibitions Applicable

Sec. 404 [16 U.S.C. 1338a]. In administering this chapter [i.e., the Wild Free-Roaming Horses and Burros Act], the Secretary may use or contract for the use of helicopters or, for the purpose of transporting captured animals, motor vehicles. Such use shall be undertaken only after a public hearing and under the direct supervision of the Secretary or of a duly authorized official or employee of the Department. The provisions of section 47(a) of title 18 shall not be applicable to such use. Such use shall be in accordance with humane procedures prescribed by the Secretary. *Nothing in this chapter shall be deemed to limit the authority of the Secretary in the management of units of the National Park System, and the Secretary may, without regard either to the provisions of this chapter, or the provisions of section 47(a) of title 18, use motor vehicles, fixed-wing aircraft, or helicopters, or to contract for such use, in furtherance of the management of the National Park System, and section 47(a) of title 18 shall be applicable to such use* [Pub. L. No. 104-333, 1996].

TITLE V RIGHTS-OF-WAY

Grant, Issue, or Renewal of Rights-of-Way

Sec. 501 [43 U.S.C. 1761].

(a) Authorized purposes

The Secretary, with respect to the public lands (including public lands, as defined in section 103(e) of this Act, which are reserved from entry pursuant to section 24 of the Federal Power Act (16 U.S.C. 818))

[Pub. L. No. 102-486, 1992] and, the Secretary of Agriculture, with respect to lands within the National Forest System (except in each case land designated as wilderness), are authorized to grant, issue, or renew rights-of-way over, upon, under, or through such lands for—

(1) reservoirs, canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other facilities and systems for the impoundment, storage, transportation, or distribution of water;

(2) pipelines and other systems for the transportation or distribution of liquids and gases, other than water and other than oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom, and for storage and terminal facilities in connection therewith;

(3) pipelines, slurry and emulsion systems, and conveyor belts for transportation and distribution of solid materials, and facilities for the storage of such materials in connection therewith;

(4) systems for generation, transmission, and distribution of electric energy, except that the

applicant shall also comply with all applicable requirements of the Federal Energy Regulatory Commission under the Federal Power Act, including part I thereof (41 Stat. 1063, 16 U.S.C. 791a-825r)

[Pub. L. No. 102-486, 1992];

(5) systems for transmission or reception of radio, television, telephone, telegraph, and other electronic signals, and other means of communication;

(6) roads, trails, highways, railroads, canals, tunnels, tramways, airways, livestock driveways, or other means of transportation except where such facilities are constructed and maintained in connection with commercial recreation facilities on lands in the National Forest System; or

(7) such other necessary transportation or other systems or facilities which are in the public interest and which require rights-of-way over, upon, under, or through such lands.

(b) Procedures applicable; administration

(1) The Secretary concerned shall require, prior to granting, issuing, or renewing a right-of-way, that the applicant submit and disclose those plans, contracts, agreements, or other information reasonably related to the use, or intended use, of the right-of-way, including its effect on competition, which [the Secretary] deems necessary to a determination, in accordance with the provisions of this Act, as to whether a right-of-way shall be granted, issued, or renewed and the terms and conditions which should be included in the right-of-way.

(2) If the applicant is a partnership, corporation, association, or other business entity, the Secretary concerned, prior to granting a right-of-way pursuant to this title, shall require the applicant to disclose the identity of the participants in the entity, when [the Secretary] deems it necessary to a determination, in accordance with the provisions of this title, as to whether a right-of-way shall be granted, issued, or renewed and the terms and conditions which should be included in the right-of-way. Such disclosures shall include, where applicable:

(A) the name and address of each partner;

(B) the name and address of each shareholder owning 3 per centum or more of the shares, together with the number and percentage of any class of voting shares of the entity which such shareholder is authorized to vote; and

(C) the name and address of each affiliate of the entity together with, in the case of an affiliate controlled by the entity, the number of shares and the percentage of any class of voting stock of that affiliate owned, directly or indirectly, by that entity, and, in the case of an affiliate which controls that entity, the number of shares and the percentage of any class of voting stock of that entity owned, directly or indirectly, by the affiliate.

(3) *The Secretary of Agriculture shall have the authority to administer all rights-of-way granted or issued under authority of previous Acts with respect to lands under the jurisdiction of the Secretary of Agriculture, including rights-of-way granted or issued pursuant to authority given to the Secretary of the Interior by such previous Acts* [Pub. L. No. 99-545, 1986].

(c) Permanent easement for water systems; issuance, preconditions, etc.

(1) *Upon receipt of a written application pursuant to paragraph (2) of this subsection from an applicant meeting the requirements of this subsection, the Secretary of Agriculture shall issue a permanent easement, without a requirement for reimbursement, for a water system as described in*

subsection (a)(1) of this section, traversing Federal lands within the National Forest System ("National Forest Lands"), constructed and in operation or placed into operation prior to October 21, 1976, if –

(A) *the traversed National Forest lands are in a State where the appropriation doctrine governs the ownership of water rights;*

(B) *at the time of submission of the application the water system is used solely for agricultural irrigation or livestock watering purposes;*

(C) *the use served by the water system is not located solely on Federal lands;*

(D) *the originally constructed facilities comprising such system have been in substantially continuous operation without abandonment;*

(E) *the applicant has a valid existing right, established under applicable State law, for water to be conveyed by the water system;*

(F) *a recordable survey and other information concerning the location and characteristics of the system as necessary for proper management of National Forest lands is provided to the Secretary of Agriculture by the applicant for the easement; and*

(G) *the applicant submits such application on or before December 31, 1996.*

(2) (A) *Nothing in this subsection shall be construed as affecting any grants made by any previous Act. To the extent any such previous grant of right-of-way is a valid existing right, it shall remain in full force and effect unless an owner thereof notifies the Secretary of Agriculture that such owner elects to have a water system on such right-of-way governed by the provisions of this subsection and submits a written application for issuance of an easement pursuant to this subsection, in which case upon the issuance of an easement pursuant to this subsection such previous grant shall be deemed to have been relinquished and shall terminate.*

(B) Easements issued under the authority of this subsection shall be fully transferable with all existing conditions and without the imposition of fees or new conditions or stipulations at the time of transfer. The holder shall notify the Secretary of Agriculture within sixty days of any address change of the holder or change in ownership of the facilities.

(C) Easements issued under the authority of this subsection shall include all changes or modifications to the original facilities in existence as of October 21, 1976, the date of enactment of this Act.

(D) Any future extension or enlargement of facilities after October 21, 1976, shall require the issuance of a separate authorization, not authorized under this subsection.

(3) (A) Except as otherwise provided in this subsection, the Secretary of Agriculture may terminate or suspend an easement issued pursuant to this subsection in accordance with the procedural and other provisions of section 506 of this Act. An easement issued pursuant to this subsection shall terminate if the water system for which such easement was issued is used for any purpose other than agricultural irrigation or livestock watering use. For purposes of subparagraph (D) of paragraph (1) of this subsection, non-use of a water system for agricultural irrigation or livestock watering purposes for any continuous five-year period shall constitute a rebuttable presumption of abandonment of the facilities comprising such system.

(B) Nothing in this subsection shall be deemed to be an assertion by the United States of any right or claim with regard to the reservation, acquisition, or use of water. Nothing in this subsection shall be deemed to confer on the Secretary of Agriculture any power or authority to regulate or control in any manner the appropriation, diversion, or use of water for any purpose (nor to diminish any such power or authority of such Secretary under applicable law) or to require the conveyance or transfer to the United States of any right or claim to the appropriation, diversion, or use of water.

(C) Except as otherwise provided in this subsection, all rights-of-way issued pursuant to this subsection are subject to all conditions and requirements of this Act.

(D) In the event a right-of-way issued pursuant to this subsection is allowed to deteriorate to the point of threatening persons or property and the holder of the right-of-way, after consultation with the Secretary of Agriculture, refuses to perform the repair and maintenance necessary to remove the threat to persons or property, the Secretary shall have the right to undertake such repair and maintenance on the right-of-way and to assess the holder for the costs of such repair and maintenance, regardless of whether the Secretary had required the holder to furnish a bond or other security pursuant to subsection (i) of this section [Pub. L. No. 99-545, 1986].

(d) Rights-of-way on certain Federal lands

With respect to any project or portion thereof that was licensed pursuant to, or granted an exemption from, part I of the Federal Power Act [16 U.S.C. 791a et seq.] which is located on lands subject to a reservation under section 24 of the Federal Power Act [16 U.S.C. 818] and which did not receive a permit, right-of-way or other approval under this section prior to October 24, 1992, no such permit, right-of-way, or other approval shall be required for continued operation, including continued operation pursuant to section 15 of the Federal Power Act [16 U.S.C. 808], of such project unless the Commission determines that such project involves the use of any additional public lands or National Forest lands not subject to such reservation [Pub. L. No. 102-486, 1992].

Roads

Sec. 502 [43 U.S.C. 1762].

(a) Authority to acquire, construct, and maintain; financing arrangements

The Secretary, with respect to the public lands, is authorized to provide for the acquisition, construction, and maintenance of roads within and near the public lands in locations and according to specifications which will permit maximum

economy in harvesting timber from such lands tributary to such roads and at the same time meet the requirements for protection, development, and management of such lands for utilization of the other resources thereof. Financing of such roads may be accomplished

(1) by the Secretary utilizing appropriated funds,

(2) by requirements on purchasers of timber and other products from the public lands, including provisions for amortization of road costs in contracts,

(3) by cooperative financing with other public agencies and with private agencies or persons, or

(4) by a combination of these methods: *Provided*, That, where roads of a higher standard than that needed in the harvesting and removal of the timber and other products covered by the particular sale are to be constructed, the purchaser of timber and other products from public lands shall not, except when the provisions of the second proviso of this subsection apply, be required to bear that part of the costs necessary to meet such higher standard, and the Secretary is authorized to make such arrangements to this end as may be appropriate: *Provided further*, That when timber is offered with the condition that the purchaser thereof will build a road or roads in accordance with standards specified in the offer, the purchaser of the timber will be responsible for paying the full costs of construction of such roads.

(b) Recordation of copies of affected instruments

Copies of all instruments affecting permanent interests in land executed pursuant to this section shall be recorded in each county where the lands are located.

(c) Maintenance or reconstruction of facilities by users

The Secretary may require the user or users of a road, trail, land, or other facility administered by [the Secretary] through the Bureau, including purchasers of Government timber and other products, to maintain such facilities in a satisfactory condition commensurate with the particular use requirements of each. Such

maintenance to be borne by each user shall be proportionate to total use. The Secretary may also require the user or users of such a facility to reconstruct the same when such reconstruction is determined to be necessary to accommodate such use. If such maintenance or reconstruction cannot be so provided or if the Secretary determines that maintenance or reconstruction by a user would not be practical, then the Secretary may require that sufficient funds be deposited by the user to provide [his or her] portion of such total maintenance or reconstruction. Deposits made to cover the maintenance or reconstruction of roads are hereby made available until expended to cover the cost to the United States of accomplishing the purposes for which deposited: *Provided*, That deposits received for work on adjacent and overlapping areas may be combined when it is the most practicable and efficient manner of performing the work, and cost thereof may be determined by estimates: *And provided further*, That unexpended balances upon accomplishment of the purpose for which deposited shall be transferred to miscellaneous receipts or refunded.

(d) Fund for user fees for delayed payment to grantor

Whenever the agreement under which the United States has obtained for the use of, or in connection with, the public lands a right-of-way or easement for a road or an existing road or the right to use an existing road provides for delayed payments to the Government's grantor, any fees or other collections received by the Secretary for the use of the road may be placed in a fund to be available for making payments to the grantor.

Right-of-Way Corridors; Criteria and Procedures Applicable for Designation

Sec. 503 [43 U.S.C. 1763]. In order to minimize adverse environmental impacts and the proliferation of separate rights-of-way, the utilization of rights-of-way in common shall be required to the extent practical, and each right-of-way or permit shall reserve to the Secretary concerned the right to grant additional rights-of-way or permits for compatible

uses on or adjacent to rights-of-way granted pursuant to this Act. In designating right-of-way corridors and in determining whether to require that rights-of-way be confined to them, the Secretary concerned shall take into consideration national and State land use policies, environmental quality, economic efficiency, national security, safety, and good engineering and technological practices. The Secretary concerned shall issue regulations containing the criteria and procedures [he or she] will use in designating such corridors. Any existing transportation and utility corridors may be designated as transportation and utility corridors pursuant to this subsection without further review.

General Requirements

Sec. 504 [43 U.S.C. 1764].

(a) Boundary specifications; criteria; temporary use of additional lands

The Secretary concerned shall specify the boundaries of each right-of-way as precisely as is practical. Each right-of-way shall be limited to the ground which the Secretary concerned determines

- (1) will be occupied by facilities which constitute the project for which the right-of-way is granted, issued, or renewed,
- (2) to be necessary for the operation or maintenance of the project,
- (3) to be necessary to protect the public safety, and
- (4) will do no unnecessary damage to the environment. The Secretary concerned may authorize the temporary use of such additional lands as [he or she] determines to be reasonably necessary for the construction, operation, maintenance, or termination of the project or a portion thereof, or for access thereto.

(b) Terms and conditions of right-of-way or permit

Each right-of-way or permit granted, issued, or renewed pursuant to this section shall be limited to a reasonable term in light of all circumstances concerning the project. In determining the duration of a right-of-way the Secretary concerned

shall, among other things, take into consideration the cost of the facility, its useful life, and any public purpose it serves. The right-of-way shall specify whether it is or is not renewable and the terms and conditions applicable to the renewal.

(c) Applicability of regulations or stipulations

Rights-of-way shall be granted, issued, or renewed pursuant to this title under such regulations or stipulations, consistent with the provisions of this title or any other applicable law, and shall also be subject to such terms and conditions as the Secretary concerned may prescribe regarding extent, duration, survey, location, construction, maintenance, transfer or assignment, and termination.

(d) Submission of plan of construction, operation, and rehabilitation by new project applicants; plan requirements

The Secretary concerned prior to granting or issuing a right-of-way pursuant to this title for a new project which may have a significant impact on the environment, shall require the applicant to submit a plan of construction, operation, and rehabilitation for such right-of-way which shall comply with stipulations or with regulations issued by that Secretary, including the terms and conditions required under section 505 of this Act.

(e) Regulatory requirements for terms and conditions; revision and applicability of regulations

The Secretary concerned shall issue regulations with respect to the terms and conditions that will be included in rights-of-way pursuant to section 505 of this title. Such regulations shall be regularly revised as needed. Such regulations shall be applicable to every right-of-way granted or issued pursuant to this title and to any subsequent renewal thereof, and may be applicable to rights-of-way not granted or issued, but renewed pursuant to this title.

(f) Removal or use of mineral and vegetative materials

Mineral and vegetative materials, including timber, within or without a right-of-way, may be used or disposed of in connection with construction or other purposes only if authorization to remove or use such materials has been obtained pursuant

to applicable laws or for emergency repair work necessary for those rights-of-way authorized under section 501(c) of this Act [Pub. L. No. 99- 545, 1986].

(g) Rental payments; amount, waiver, etc.

The holder of a right-of-way shall pay in advance the fair market value thereof, as determined by the Secretary granting, issuing, or renewing such right-of-way. The Secretary concerned may require either annual payment or a payment covering more than one year at a time except that private individuals may make at their option either annual payments or payments covering more than one year if the annual fee is greater than one hundred dollars. The Secretary concerned may waive rentals where a right-of-way is granted, issued or renewed in consideration of a right-of-way conveyed to the United States in connection with a cooperative cost share program between the United States and the holder [Pub. L. No. 99- 545, 1986]. The Secretary concerned may, by regulation or prior to promulgation of such regulations, as a condition of a right-of-way, require an applicant for or holder of a right-of-way to reimburse the United States for all reasonable administrative and other costs incurred in processing an application for such right-of-way and in inspection and monitoring of construction, operation, and termination of the facility pursuant to such right-of-way: *Provided, however,* That the Secretary concerned need not secure reimbursement in any situation where there is in existence a cooperative cost share right-of-way program between the United States and the holder of a right-of-way. Rights-of-way may be granted, issued, or renewed to a Federal, State, or local government or any agency or instrumentality thereof, to nonprofit associations or nonprofit corporations which are not themselves controlled or owned by profitmaking corporations or business enterprises, or to a holder where [he or she] provides without or at reduced charges a valuable benefit to the public or to the programs of the Secretary concerned, or to a holder in connection with the authorized use or occupancy of Federal land for which the United States is already receiving compensation for such lesser charge, including free use as the Secretary concerned finds equitable and in the public interest. Such rights-of-way issued at less than fair market value are not assignable except with

the approval of the Secretary issuing the right-of-way. The moneys received for reimbursement of reasonable costs shall be deposited with the Treasury in a special account and are hereby authorized to be appropriated and made available until expended. *Rights-of-way shall be granted, issued, or renewed, without rental fees, for electric or telephone facilities, eligible for financing pursuant to the Rural Electrification Act of 1936, as amended [7 U.S.C. 901 et seq.], determined without regard to any application requirement under that Act,* [Pub. L. No. 104-333, 1996] *or any extensions from such facilities: Provided, That nothing in this sentence shall be construed to affect the authority of the Secretary granting, issuing, or renewing the right-of-way to require reimbursement of reasonable administrative and other costs pursuant to the second sentence of this subsection* [Pub. L. No. 98-300, 1984].

[43 U.S.C. 1764 note: The 1996 amendment incorporating the language “eligible for financing pursuant to the Rural Electrification Act of 1936, as amended, determined without regard to any application requirement under that Act” in subsection (g) also specified that the amended text applies “with respect to rights-of-way leases held on or after the date of enactment” of the amendment, in November 1996. See Pub. L. No. 104-333, § 1032(b), 110 Stat. 4093, 4239 (1996)]

(h) Liability for damage or injury incurred by United States for use and occupancy of rights-of-way; indemnification of United States; no-fault liability; amount of damages

(1) The Secretary concerned shall promulgate regulations specifying the extent to which holders of rights-of-way under this title shall be liable to the United States for damage or injury incurred by the United States caused by the use and occupancy of the rights-of-way. The regulations shall also specify the extent to which such holders shall indemnify or hold harmless the United States for liabilities, damages, or claims caused by their use and occupancy of the rights-of-way.

(2) Any regulation or stipulation imposing liability without fault shall include a maximum limitation on damages commensurate with the foreseeable risks or hazards presented. Any liability for damage or injury in excess of this amount shall be determined by ordinary rules of negligence.

(i) Bond or security requirements

Where [the Secretary] deems it appropriate, the Secretary concerned may require a holder of a right-of-way to furnish a bond, or other security, satisfactory to [the Secretary] to secure all or any of the obligations imposed by the terms and conditions of the right-of-way or by any rule or regulation of the Secretary concerned.

(j) Criteria for grant, issue, or renewal of right-of-way

The Secretary concerned shall grant, issue, or renew a right-of-way under this title only when [the Secretary] is satisfied that the applicant has the technical and financial capability to construct the project for which the right-of-way is requested, and in accord with the requirements of this title.

Terms and Conditions

Sec. 505 [43 U.S.C. 1765]. Each right-of-way shall contain—

(a) terms and conditions which will

(i) carry out the purposes of this Act and rules and regulations issued thereunder;

(ii) minimize damage to scenic and esthetic values and fish and wildlife habitat and otherwise protect the environment;

(iii) require compliance with applicable air and water quality standards established by or pursuant to applicable Federal or State law; and

(iv) require compliance with State standards for public health and safety, environmental protection, and siting, construction, operation, and maintenance of or for rights-of-way for similar purposes if those standards are more stringent than applicable Federal standards; and

(b) such terms and conditions as the Secretary concerned deems necessary to

(i) protect Federal property and economic interests;

(ii) manage efficiently the lands which are subject to the right-of-way or adjacent thereto and protect the other lawful users of the lands adjacent to or traversed by such right-of-way;

(iii) protect lives and property;

(iv) protect the interests of individuals living in the general area traversed by the right-of-way who rely on the fish, wildlife, and other biotic resources of the area for subsistence purposes;

(v) require location of the right-of-way along a route that will cause least damage to the environment, taking into consideration feasibility and other relevant factors; and

(vi) otherwise protect the public interest in the lands traversed by the right-of-way or adjacent thereto.

Suspension or Termination; Grounds; Procedures Applicable

Sec. 506 [43 U.S.C. 1766]. Abandonment of a right-of-way or noncompliance with any provision of this title, condition of the right-of-way, or applicable rule or regulation of the Secretary concerned may be grounds for suspension or termination of the right-of-way if, after due notice to the holder of the right-of-way, and with respect to easements, an appropriate administrative proceeding pursuant to section 554 of title 5 of the United States Code, the Secretary concerned determines that any such ground exists and that suspension or termination is justified. No administrative proceeding shall be required where the right-of-way by its terms provides that it terminates on the occurrence of a fixed or agreed-upon condition, event, or time. If the Secretary concerned determines that an immediate temporary suspension of activities within a right-of-way for violation of its terms and conditions

is necessary to protect public health or safety or the environment, [the Secretary] may abate such activities prior to an administrative proceeding. Prior to commencing any proceeding to suspend or terminate a right-of-way the Secretary concerned shall give written notice to the holder of the grounds for such action and shall give the holder a reasonable time to resume use of the right-of-way or to comply with this title, condition, rule, or regulation as the case may be. Failure of the holder of the right-of-way to use the right-of-way for the purpose for which it was granted, issued, or renewed, for any continuous five-year period, shall constitute a rebuttable presumption of abandonment of the right-of-way, except that where the failure of the holder to use the right-of-way for the purpose for which it was granted, issued, or renewed for any continuous five-year period is due to circumstances not within the holder's control, the Secretary concerned is not required to commence proceedings to suspend or terminate the right-of-way.

Rights-of-Way for Federal Departments and Agencies

Sec. 507 [43 U.S.C. 1767].

(a) The Secretary concerned may provide under applicable provisions of this title for the use of any department or agency of the United States a right-of-way over, upon, under or through the land administered by [the Secretary], subject to such terms and conditions as [he or she] may impose.

(b) Where a right-of-way has been reserved for the use of any department or agency of the United States, the Secretary shall take no action to terminate, or otherwise limit, that use without the consent of the head of such department or agency.

Conveyance of Lands Covered by Right-of-Way; Terms and Conditions

Sec. 508 [43 U.S.C. 1768]. If under applicable law the Secretary concerned decides to transfer out of

Federal ownership any lands covered in whole or in part by a right-of-way, including a right-of-way granted under the Act of November 16, 1973 (87 Stat. 576; 30 U.S.C. 185), the lands may be conveyed subject to the right-of-way; however, if the Secretary concerned determines that retention of Federal control over the right-of-way is necessary to assure that the purposes of this title will be carried out, the terms and conditions of the right-of-way complied with, or the lands protected, [the Secretary] shall

(a) reserve to the United States that portion of the lands which lies within the boundaries of the right-of-way, or

(b) convey the lands, including that portion within the boundaries of the right-of-way, subject to the right-of-way and reserving to the United States the right to enforce all or any of the terms and conditions of the right-of-way, including the right to renew it or extend it upon its termination and to collect rents.

Existing Right-of-Way or Right-of-Use Unaffected; Exceptions; Rights-of-Way for Railroad and Appurtenant Communication Facilities; Applicability of Existing Terms and Conditions

Sec. 509 [43 U.S.C. 1769].

(a) Nothing in this title shall have the effect of terminating any right-of-way or right-of-use heretofore issued, granted, or permitted. However, with the consent of the holder thereof, the Secretary concerned may cancel such a right-of-way or right-of-use and in its stead issue a right-of-way pursuant to the provisions of this title.

(b) When the Secretary concerned issues a right-of-way under this title for a railroad and appurtenant communication facilities in connection with a realignment of a railroad on lands under [the Secretary's] jurisdiction by virtue of a right-of-way granted by the United States, [the Secretary] may, when [he or she] considers it

to be in the public interest and the lands involved are not within an incorporated community and are of approximately equal value, notwithstanding the provisions of this title, provide in the new right-of-way the same terms and conditions as applied to the portion of the existing right-of-way relinquished to the United States with respect to the payment of annual rental, duration of the right-of-way, and the nature of the interest in lands granted. The Secretary concerned or [the Secretary's] delegate shall take final action upon all applications for the grant, issue, or renewal of rights-of-way under subsection (b) of this section no later than six months after receipt from the applicant of all information required from the applicant by this title.

Applicability of Provisions to Other Federal Laws

Sec. 510 [43 U.S.C. 1770].

(a) Right-of-way

Effective on and after October 21, 1976, no right-of-way for the purposes listed in this title shall be granted, issued, or renewed over, upon, under, or through such lands except under and subject to the provisions, limitations, and conditions of this title: *Provided*, That nothing in this title shall be construed as affecting or modifying the provisions of sections 532 to 538 of title 16 and in the event of conflict with, or inconsistency between, this subchapter and sections 532 to 538 of title 16, the latter shall prevail: *Provided further*, That nothing in this Act should be construed as making it mandatory that, with respect to forest roads, the Secretary of Agriculture limit rights-of-way grants or their term of years or require disclosure pursuant to section 1761(b) of this title or impose any other condition contemplated by this Act that is contrary to present practices of that Secretary under sections 532 to 538 of title 16. Any pending

application for a right-of-way under any other law on the effective date of this section shall be considered as an application under this title. The Secretary concerned may require the applicant to submit any additional information [the Secretary] deems necessary to comply with the requirements of this title.

(b) Highway use

Nothing in this title shall be construed to preclude the use of lands covered by this title for highway purposes pursuant to sections 107 and 317 of title 23 of the United States Code.

(c) Application of antitrust laws

(1) Nothing in this title shall be construed as exempting any holder of a right-of-way issued under this title from any provision of the antitrust laws of the United States.

(2) For the purposes of this subsection, the term "antitrust laws" includes the Act of July 2, 1890 (26 Stat. [209], 15 U.S.C. 1 et seq.); the Act of October 15, 1914 (38 Stat. 730, 15 U.S.C. 12 et seq.); the Federal Trade Commission Act (38 Stat. 717; 15 U.S.C. 41 et seq.); and sections 73 and 74 of the Act of August 27, 1894 [15 U.S.C. 8, 9].

Coordination of Applications

Sec. 511 [43 U.S.C. 1771]. Applicants before Federal departments and agencies other than the Department of the Interior or Agriculture seeking a license, certificate, or other authority for a project which involve[s] a right-of-way over, upon, under, or through public land or National Forest System lands must simultaneously apply to the Secretary concerned for the appropriate authority to use public lands or National Forest System lands and submit to the Secretary concerned all information furnished to the other Federal department or agency.

TITLE VI

DESIGNATED MANAGEMENT AREAS

[In 2009, Congress established the National Landscape Conservation System, which includes most of the areas addressed in this title, as well as numerous other areas. See Pub. L. No. 111-11, §§ 2001-2003, 123 Stat. 991, 1094-1096 (2009), codified at 16 U.S.C. 7201-7203.]

California Desert Conservation Area

Sec. 601 [43 U.S.C. 1781].

(a) Congressional findings

The Congress finds that—

- (1) the California desert contains historical, scenic, archeological, environmental, biological, cultural, scientific, educational, recreational, and economic resources that are uniquely located adjacent to an area of large population;
- (2) the California desert environment is a total ecosystem that is extremely fragile, easily scarred, and slowly healed;
- (3) the California desert environment and its resources, including certain rare and endangered species of wildlife, plants, and fishes, and numerous archeological and historic sites, are seriously threatened by air pollution, inadequate Federal management authority, and pressures of increased use, particularly recreational use, which are certain to intensify because of the rapidly growing population of southern California;
- (4) the use of all California desert resources can and should be provided for in a multiple use and sustained yield management [plan] to conserve these resources for future generations, and to provide present and future use and

enjoyment, particularly outdoor recreation uses, including the use, where appropriate, of off-road recreational vehicles;

(5) the Secretary has initiated a comprehensive planning process and established an interim management program for the public lands in the California desert; and

(6) to insure further study of the relationship of man and the California desert environment, preserve the unique and irreplaceable resources, including archeological values, and conserve the use of the economic resources of the California desert, the public must be provided more opportunity to participate in such planning and management, and additional management authority must be provided to the Secretary to facilitate effective implementation of such planning and management.

(b) Statement of purpose

It is the purpose of this section to provide for the immediate and future protection and administration of the public lands in the California desert within the framework of a program of multiple use and sustained yield, and the maintenance of environmental quality.

(c) Description of Area

(1) For the purpose of this section, the term “California desert” means the area generally depicted on a map entitled “California Desert Conservation Area—Proposed” dated April 1974, and described as provided in subsection (c)(2) of this section.

(2) As soon as practicable after October 21, 1976, the Secretary shall file a revised map and a legal description of the California Desert Conservation Area with the Committees on Interior and Insular Affairs of the United States Senate and the House of Representatives, and such map and description shall have the same force and effect as if included in this Act. Correction of clerical and typographical errors in such legal description and a map may be made by the Secretary. To the extent practicable, the Secretary shall make such legal description and map available to the public promptly upon request.

(d) Preparation and implementation of comprehensive long-range plan for management, use, etc.

The Secretary, in accordance with section 202 of this Act, shall prepare and implement a comprehensive, long-range plan for the management, use, development, and protection of the public lands within the California Desert Conservation Area. Such plan shall take into account the principles of multiple use and sustained yield in providing for resource use and development, including, but not limited to, maintenance of environmental quality, rights-of-way, and mineral development. Such plan shall be completed and implementation thereof initiated on or before September 30, 1980.

(e) Interim program for management, use, etc.

During the period beginning on October 21, 1976 and ending on the effective date of implementation of the comprehensive, long-range plan, the Secretary shall execute an interim program to manage, use, and protect the public lands, and their resources now in danger of destruction, in the California Desert Conservation Area, to provide for the public use of such lands in an orderly and reasonable manner such as through the development of campgrounds and visitor centers, and to provide for a uniformed desert ranger force.

(f) Applicability of mining laws

Subject to valid existing rights, nothing in this Act shall affect the applicability of the United States mining laws on the public lands within the California Desert Conservation Area, except

that all mining claims located on public lands within the California Desert Conservation Area shall be subject to such reasonable regulations as the Secretary may prescribe to effectuate the purposes of this section. Any patent issued on any such mining claim shall recite this limitation and continue to be subject to such regulations. Such regulations shall provide for such measures as may be reasonable to protect the scenic, scientific, and environmental values of the public lands of the California Desert Conservation Area against undue impairment, and to assure against pollution of the streams and waters within the California Desert Conservation Area.

(g) Advisory Committee; establishment; functions

(1) The Secretary, within sixty days after October 21, 1976, shall establish a California Desert Conservation Area Advisory Committee (hereinafter referred to as "advisory committee") in accordance with the provisions of section 309 of this Act.

(2) It shall be the function of the advisory committee to advise the Secretary with respect to the preparation and implementation of the comprehensive, long-range plan required under subsection (d) of this section.

(h) Management of lands under jurisdiction of Secretary of Agriculture and Secretary of Defense

The Secretary of Agriculture and the Secretary of Defense shall manage lands within their respective jurisdictions located in or adjacent to the California Desert Conservation Area, in accordance with the laws relating to such lands and wherever practicable, in a manner consonant with the purpose of this section. The Secretary, the Secretary of Agriculture, and the Secretary of Defense are authorized and directed to consult among themselves and take cooperative actions to carry out the provisions of this subsection, including a program of law enforcement in accordance with applicable authorities to protect the archeological and other values of the California Desert Conservation Area and adjacent lands.

(i) Omitted

[Subsection (i) previously required the Secretary to submit an annual report to Congress regarding the implementation of this section. This reporting requirement was sunsetted in 2000 pursuant to Pub. L. No. 105-66, § 3003, 109 Stat. 707, 734-735 (1995). See 43 U.S.C. 1781 note.]

(j) Authorization of appropriations

There are authorized to be appropriated for fiscal years 1977 through 1981 not to exceed \$40,000,000 for the purpose of this section, such amount to remain available until expended.

Acceptance of donation of certain existing permits or leases

[43 U.S.C. 1781a] [Pub. L. No. 112-74, div. E, title I, § 122(b), Dec. 23, 2011, 125 Stat. 1013].

(1) During fiscal year 2012 and thereafter, the Secretary of the Interior shall accept the donation of any valid existing permits or leases authorizing grazing on public lands within the California Desert Conservation Area. With respect to each permit or lease donated under this paragraph, the Secretary shall terminate the grazing permit or lease, ensure a permanent end (except as provided in paragraph (2)), to grazing on the land covered by the permit or lease, and make the land available for mitigation by allocating the forage to wildlife use consistent with any applicable Habitat Conservation Plan, section 10(a)(1)(B) permit, or section 7 consultation under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(2) If the land covered by a permit or lease donated under paragraph (1) is also covered by another valid existing permit or lease that is not donated under such paragraph, the Secretary of the Interior shall reduce the authorized grazing level on the land covered by the permit or lease to reflect the donation of the permit or lease under paragraph (1). To ensure that there is a permanent reduction in the level of grazing on the land covered by a permit or lease donated under paragraph (1), the Secretary shall not allow grazing use to exceed the authorized level under the remaining valid existing permit or lease that is not donated.

King Range

Sec. 602. Section 9 of the Act of October 21, 1970 (84 Stat. 1067), [16 U.S.C. 460y-8] is amended by adding a new subsection (c), as follows:“(c) In addition to the lands described in subsection (a) of this section [16 U.S.C. 460y-8(a)], the land identified as the Punta Gorda Addition and the Southern Additions on the map entitled ‘King Range National Conservation Area Boundary Map No. 2,’ dated July 29, 1975, is included in the survey and investigation area referred to in the first section of this Act [16 U.S.C. 460y].”

**Bureau of Land Management
Wilderness Study**

Sec. 603 [43 U.S.C. 1782].

(a) Lands subject to review and designation as wilderness

Within fifteen years after October 21, 1976, the Secretary shall review those roadless areas of five thousand acres or more and roadless islands of the public lands, identified during the inventory required by section 201(a) of this Act as having wilderness characteristics described in the Wilderness Act of September 3, 1964 (78 Stat. 890; 16 U.S.C. 1131 et seq.) and shall from time to time report to the President [his or her] recommendation as to the suitability or nonsuitability of each such area or island for preservation as wilderness: *Provided*, That prior to any recommendations for the designation of an area as wilderness the Secretary shall cause mineral surveys to be conducted by the *United States Geological Survey* [Pub. L. No. 102-154, 1991] and the *United States Bureau of Mines* [Pub. L. No. 102-285, 1992] to determine the mineral values, if any, that may be present in such areas: *Provided further*, That the Secretary shall report to the President by July 1, 1980, [his or her] recommendations on those areas which the Secretary has prior to November 1, 1975, formally identified as natural or primitive areas. The review required by this subsection shall be conducted in accordance with the procedure specified in section 3(d) of the Wilderness Act [16 U.S.C. 1132(d)].

[The authority of the U.S. Bureau of Mines described in this subsection has subsequently been transferred to the U.S. Geological Survey. See Pub. L. No. 104-134, tit. I, 110 Stat. 1321-156, 1321-165 (1996).]

(b) Presidential recommendation for designation as wilderness

The President shall advise the President of the Senate and the Speaker of the House of Representatives of [his or her] recommendations with respect to designation as wilderness of each such area, together with a map thereof and a definition of its boundaries. Such advice by the President shall be given within two years of the receipt of each report from the Secretary. A recommendation of the President for designation as wilderness shall become effective only if so provided by an Act of Congress.

(c) Status of lands during period of review and determination

During the period of review of such areas and until Congress has determined otherwise, the Secretary shall continue to manage such lands according to [his or her] authority under this Act and other applicable law in a manner so as not to impair the suitability of such areas for preservation as wilderness, subject, however, to the continuation of existing mining and grazing uses and mineral leasing in the manner and degree in which the same was being conducted on October 21, 1976: *Provided*, That, in managing the public lands the Secretary shall by regulation or otherwise take any action required to prevent unnecessary or undue degradation of the lands and their resources or to afford environmental protection. Unless previously withdrawn from appropriation under the mining laws, such lands shall continue to be subject to such appropriation during the period of review unless withdrawn by the Secretary under the procedures of section 204 of this Act for reasons other than preservation of their wilderness character. Once an area has been designated for

preservation as wilderness, the provisions of the Wilderness Act [16 U.S.C. 1131 et seq.] which apply to national forest wilderness areas shall apply with respect to the administration and use of such designated area, including mineral surveys required by section 4(d)(2) of the Wilderness Act, [16 U.S.C. 1133(d)(2)] and mineral development, access, exchange of lands, and ingress and egress for mining claimants and occupants.

Yaquina Head Outstanding Natural Area

[43 U.S.C. 1783] [(Pub. L. No. 96-199, title I, § 119, Mar. 5, 1980, 94 Stat. 71)].

(a) Establishment

In order to protect the unique scenic, scientific, educational, and recreational values of certain lands in and around Yaquina Head, in Lincoln County, Oregon, there is hereby established, subject to valid existing rights, the Yaquina Head Outstanding Natural Area (hereinafter referred to as the "area"). The boundaries of the area are those shown on the map entitled "Yaquina Head Area", dated July 1979, which shall be on file and available for public inspection in the Office of the Director, Bureau of Land Management, United States Department of the Interior, and the State Office of the Bureau of Land Management in the State of Oregon.

(b) Administration by Secretary of the Interior; management plan; quarrying permits

(1) The Secretary of the Interior (hereinafter referred to as the "Secretary") shall administer the Yaquina Head Outstanding Natural Area in accordance with the laws and regulations applicable to the public lands as defined in section 103(e) of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1702) [43 U.S.C. 1702(e)], in such a manner as will best provide for—

(A) the conservation and development of the scenic, natural, and historic values of the area;

(B) the continued use of the area for purposes of education, scientific study, and public recreation which do not substantially impair the purposes for which the area is established; and

(C) protection of the wildlife habitat of the area.

(2) The Secretary shall develop a management plan for the area which accomplishes the purposes and is consistent with the provisions of this section. This plan shall be developed in accordance with the provisions of section 202 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1712).

(3) Notwithstanding any other provision of this section, the Secretary is authorized to issue permits or to contract for the quarrying of materials from the area in accordance with the management plan for the area on condition that the lands be reclaimed and restored to the satisfaction of the Secretary. Such authorization to quarry shall require payment of fair market value for the materials to be quarried, as established by the Secretary, and shall also include any terms and conditions which the Secretary determines necessary to protect the values of such quarry lands for purposes of this section.

(c) Revocation of 1866 reservation of lands for lighthouse purposes; restoration to public lands status

The reservation of lands for lighthouse purposes made by Executive order of June 8, 1866, of certain lands totaling approximately 18.1 acres, as depicted on the map referred to in subsection (a) of this section, is hereby revoked. The lands referred to in subsection (a) of this section are hereby restored to the status of public lands as defined in section 103(e) of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1702) [43 U.S.C. 1702(e)], and shall be administered in accordance with the management plan for the area developed pursuant to subsection (b) of this section, except that such lands are hereby withdrawn from settlement,

sale, location, or entry, under the public land laws, including the mining laws (30 U.S.C., ch. 2), leasing under the mineral leasing laws (30 U.S.C. 181 et seq.), and disposals under the Materials Act of July 31, 1947, as amended (30 U.S.C. 601, 602) [30 U.S.C. 601 et seq.].

(d) Acquisition of lands not already in Federal ownership

The Secretary shall, as soon as possible but in no event later than twenty-four months following the date of enactment of this section [March 5, 1980], acquire by purchase, exchange, donation, or condemnation all or any part of the lands and waters and interests in lands and waters within the area referred to in subsection (a) of this section which are not in Federal ownership except that State land shall not be acquired by purchase or condemnation. Any lands or interests acquired by the Secretary pursuant to this section shall become public lands as defined in the Federal Land Policy and Management Act of 1976, as amended [43 U.S.C. 1701 et seq.]. Upon acquisition by the United States, such lands are automatically withdrawn under the provisions of subsection (c) of this section except that lands affected by quarrying operations in the area shall be subject to disposals under the Materials Act of July 31, 1947, as amended (30 U.S.C. 601, 602) [30 U.S.C. 601 et seq.]. Any lands acquired pursuant to this subsection shall be administered in accordance with the management plan for the area developed pursuant to subsection (b) of this section.

(e) Wind energy research

The Secretary is authorized to conduct a study relating to the use of lands in the area for purposes of wind energy research. If the Secretary determines after such study that the conduct of wind energy research activity will not substantially impair the values of the lands in the area for purposes of this section, the Secretary is further authorized to issue permits for the use of such lands as a site for installation and field testing of an experimental wind turbine generating system. Any permit issued pursuant to this subsection shall contain such terms and conditions as the Secretary determines necessary to protect the values of such lands for purposes of this section.

(f) Reclamation and restoration of lands affected by quarrying operations

The Secretary shall develop and administer, in addition to any requirements imposed pursuant to subsection (b) (3) of this section, a program for the reclamation and restoration of all lands affected by quarrying operations in the area acquired pursuant to subsection (d) of this section. All revenues received by the United States in connection with quarrying operations authorized by subsection (b)(3) of this section shall be deposited in a separate fund account which shall be established by the Secretary of the Treasury. Such revenues are hereby authorized to be appropriated to the Secretary as needed for reclamation and restoration of any lands acquired pursuant to subsection (d) of this section. After completion of such reclamation and restoration to the satisfaction of the Secretary, any unexpended revenues in such fund shall be returned to the general fund of the United States Treasury.

(g) Authorization of appropriations

There are hereby authorized to be appropriated in addition to that authorized by subsection (f) of this section, such sums as may be necessary to carry out the provisions of this section.

Lands in Alaska; designation as wilderness; management by Bureau of Land Management pending Congressional action [43 U.S.C. 1784]

[Pub. L. No. 96-487, title XIII, § 1320, Dec. 2, 1980, 94 Stat. 2487].

Notwithstanding any other provision of law, section 1782 of the Federal Land Policy and Management Act of 1976 shall not apply to any lands in Alaska. However, in carrying out [the Secretary's] duties under sections 1711 and 1712 of this title and other applicable laws, the Secretary may identify areas in Alaska which he [or she] determines are suitable as wilderness and may, from time to time, make recommendations to the Congress for inclusion of any such areas in the National Wilderness Preservation System, pursuant to the provisions of the Wilderness Act [16 U.S.C. 1131 et seq.]. In the absence of congressional action relating to any such recommendation of the Secretary, the Bureau of Land Management shall manage all such areas which are within its jurisdiction in accordance with the applicable land use plans and applicable provisions of law.

Fossil Forest Research Natural Area [43 U.S.C. 1785]

[Pub. L. No. 98-603, title I, § 103, Oct. 30, 1984, 98 Stat. 3156; Pub. L. No. 104-333, div. I, title X, § 1022(e), Nov. 12, 1996, 110 Stat. 4213; Pub. L. No. 106-176, title I, § 124, Mar. 10, 2000, 114 Stat. 30].

(a) Establishment

To conserve and protect natural values and to provide scientific knowledge, education, and interpretation for the benefit of future generations, there is established the Fossil Forest Research Natural Area (referred to in this section as the "Area"), consisting of the approximately 2,770 acres in the Farmington District of the Bureau of Land Management, New Mexico, as generally depicted on a map entitled "Fossil Forest", dated June 1983.

(b) Map and legal description

(1) In general

As soon as practicable after November 12, 1996, the Secretary of the Interior shall file a map and legal description of the Area with the Committee on Energy and Natural Resources [Pub. L. No. 106-176, 2000] of the Senate and the Committee on Resources of the House of Representatives.

(2) Force and effect

The map and legal description described in paragraph (1) shall have the same force and effect as if included in this Act.

(3) Technical corrections

The Secretary of the Interior may correct clerical, typographical, and cartographical errors in the map and legal description subsequent to filing the map pursuant to paragraph (1).

(4) Public inspection

The map and legal description shall be on file and available for public inspection in the Office of the Director of the Bureau of Land Management, Department of the Interior.

(c) Management

(1) In general

The Secretary of the Interior, acting through the Director of the Bureau of Land Management, shall manage the Area—

(A) to protect the resources within the Area; and

(B) in accordance with this Act, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable provisions of law.

(2) Mining

(A) Withdrawal

Subject to valid existing rights, the lands within the Area are withdrawn from all forms of appropriation under the mining laws and from disposition under all laws pertaining to mineral leasing, geothermal leasing, and mineral material sales.

(B) Coal preference rights

The Secretary of the Interior is authorized to issue coal leases in New Mexico in exchange for any preference right coal lease application within the Area. Such exchanges shall be made in accordance with applicable existing laws and regulations relating to coal leases after a determination has been made by the Secretary that the applicant is entitled to a preference right lease and that the exchange is in the public interest.

(C) Oil and gas leases

Operations on oil and gas leases issued prior to the date of enactment of this paragraph [November 12, 1996], shall be subject to the applicable provisions of Group 3100 of title 43, Code of Federal Regulations (including section 3162.5-1), and such other terms, stipulations, and conditions as the Secretary of the Interior considers necessary to avoid significant disturbance of the land surface or impairment of the natural, educational, and scientific research values of the Area in existence on November 12, 1996.

(3) Grazing

Livestock grazing on lands within the Area may not be permitted.

(d) Inventory

Not later than 3 full fiscal years after November 12, 1996, the Secretary of the Interior, acting through

the Director of the Bureau of Land Management, shall develop a baseline inventory of all categories of fossil resources within the Area. After the inventory is developed, the Secretary shall conduct monitoring surveys at intervals specified in the management plan developed for the Area in accordance with subsection (e) of this section.

(e) Management Plan

(1) In general

Not later than 5 years after November 12, 1996, the Secretary of the Interior shall develop and submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Resources [Pub. L. No. 106-176, 2000] of the House of Representatives a management plan that describes the appropriate use of the Area consistent with this subsection [Pub. L. No. 106-176, 2000].

(2) Contents

The management plan shall include—

(A) a plan for the implementation of a continuing cooperative program with other agencies and groups for—

(i) laboratory and field interpretation; and

(ii) public education about the resources and values of the Area (including vertebrate fossils);

(B) provisions for vehicle management that are consistent with the purpose of the Area and that provide for the use of vehicles to the minimum extent necessary to accomplish an individual scientific project;

(C) procedures for the excavation and collection of fossil remains, including botanical fossils, and the use of motorized and mechanical equipment to the minimum extent necessary to accomplish an individual scientific project; and

(D) mitigation and reclamation standards for activities that disturb the surface to the detriment of scenic and environmental values.

Piedras Blancas Historic Light Station

[43 U.S.C. 1786] [Pub. L. No. 110–229, title II, § 201, May 8, 2008, 122 Stat. 759; Pub. L. No. 113–287, § 5(l)(8), Dec. 19, 2014, 128 Stat. 3271].

(a) Definitions

In this section:

(1) Light Station

The term “Light Station” means Piedras Blancas Light Station.

(2) Outstanding Natural Area

The term “Outstanding Natural Area” means the Piedras Blancas Historic Light Station Outstanding Natural Area established pursuant to subsection (c).

(3) Public lands

The term “public lands” has the meaning stated in section 103(e) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. [1702](e)).

(4) Secretary

The term “Secretary” means the Secretary of the Interior.

(b) Findings

Congress finds as follows:

(1) The publicly owned Piedras Blancas Light Station has nationally recognized historical structures that should be preserved for present and future generations.

(2) The coastline adjacent to the Light Station is internationally recognized as having significant wildlife and marine habitat that provides critical information to research institutions throughout the world.

(3) The Light Station tells an important story about California’s coastal prehistory and history in the context of the surrounding region and communities.

(4) The coastal area surrounding the Light Station was traditionally used by Indian people, including the Chumash and Salinan Indian tribes.

(5) The Light Station is historically associated with the nearby world-famous Hearst Castle (Hearst San Simeon State Historical Monument), now administered by the State of California.

(6) The Light Station represents a model partnership where future management can be successfully accomplished among the Federal Government, the State of California, San Luis Obispo County, local communities, and private groups.

(7) Piedras Blancas Historic Light Station Outstanding Natural Area would make a significant addition to the National Landscape Conservation System administered by the Department of the Interior’s Bureau of Land Management.

(8) Statutory protection is needed for the Light Station and its surrounding Federal lands to ensure that it remains a part of our historic, cultural, and natural heritage and to be a source of inspiration for the people of the United States.

(c) Designation of the Piedras Blancas Historic Light Station Outstanding Natural Area

(1) In general

In order to protect, conserve, and enhance for the benefit and enjoyment of present and future generations the unique and nationally important historical, natural, cultural, scientific, educational, scenic, and recreational values of certain lands in and around the Piedras Blancas Light Station, in San Luis Obispo County, California, while allowing certain recreational and research activities to continue, there is established, subject to valid existing rights, the Piedras Blancas Historic Light Station Outstanding Natural Area.

(2) Maps and legal descriptions

The boundaries of the Outstanding Natural Area as those shown on the map entitled “Piedras Blancas Historic Light Station: Outstanding Natural Area”, dated May 5, 2004, which shall be on file and available for public inspection in the Office of the Director, Bureau of Land Management, United States Department of the

Interior, and the State office of the Bureau of Land Management in the State of California.

(3) Basis of management

The Secretary shall manage the Outstanding Natural Area as part of the National Landscape Conservation System to protect the resources of the area, and shall allow only those uses that further the purposes for the establishment of the Outstanding Natural Area, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable laws.

(4) Withdrawal

Subject to valid existing rights, and in accordance with the existing withdrawal as set forth in Public Land Order 7501 (Oct. 12, 2001, Vol. 66, No. 198, Federal Register 52149), the Federal lands and interests in lands included within the Outstanding Natural Area are hereby withdrawn from—

- (A)** all forms of entry, appropriation, or disposal under the public land laws;
- (B)** location, entry, and patent under the public land mining laws; and
- (C)** operation of the mineral leasing and geothermal leasing laws and the mineral materials laws.

(d) Management of the Piedras Blancas Historic Light Station Outstanding Natural Area

(1) In general

The Secretary shall manage the Outstanding Natural Area in a manner that conserves, protects, and enhances the unique and nationally important historical, natural, cultural, scientific, educational, scenic, and recreational values of that area, including an emphasis on preserving and restoring the Light Station facilities, consistent with the requirements of subsection (c)(3).

(2) Uses

Subject to valid existing rights, the Secretary shall only allow such uses of the Outstanding Natural Area as the Secretary finds are likely to further the purposes for which the Outstanding

Natural Area is established as set forth in subsection (c)(1).

(3) Management plan

Not later than 3 years [after] May 8, 2008, the Secretary shall complete a comprehensive management plan consistent with the requirements of section 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712) to provide long-term management guidance for the public lands within the Outstanding Natural Area and fulfill the purposes for which it is established, as set forth in subsection (c)(1). The management plan shall be developed in consultation with appropriate Federal, State, and local government agencies, with full public participation, and the contents shall include—

- (A)** provisions designed to ensure the protection of the resources and values described in subsection (c)(1);
- (B)** objectives to restore the historic Light Station and ancillary buildings;
- (C)** an implementation plan for a continuing program of interpretation and public education about the Light Station and its importance to the surrounding community;
- (D)** a proposal for minimal administrative and public facilities to be developed or improved at a level compatible with achieving the resources objectives for the Outstanding Natural Area as described in paragraph (1) and with other proposed management activities to accommodate visitors and researchers to the Outstanding Natural Area; and
- (E)** cultural resources management strategies for the Outstanding Natural Area, prepared in consultation with appropriate departments of the State of California, with emphasis on the preservation of the resources of the Outstanding Natural Area and the interpretive, education, and long-term scientific uses of the resources, giving priority to the enforcement of the Archaeological Resources Protection Act of 1979 (16 U.S.C. 470aa et seq.) and division A

of subtitle III of title 54 within the Outstanding Natural Area.

(4) Cooperative agreements

In order to better implement the management plan and to continue the successful partnerships with the local communities and the Hearst San Simeon State Historical Monument, administered by the California Department of Parks and Recreation, the Secretary may enter into cooperative agreements with the appropriate Federal, State, and local agencies pursuant to section 307(b) of the Federal Land [Policy] and Management Act of 1976 (43 U.S.C. 1737(b)).

(5) Research activities

In order to continue the successful partnership with research organizations and agencies and to assist in the development and implementation of the management plan, the Secretary may authorize within the Outstanding Natural Area appropriate research activities for the purposes identified in subsection (c)(1) and pursuant to section 307(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1737(a)).

(6) Acquisition

State and privately held lands or interests in lands adjacent to the Outstanding Natural Area and identified as appropriate for acquisition in the management plan may be acquired by the Secretary as part of the Outstanding Natural Area only by—

- (A) donation;
- (B) exchange with a willing party; or
- (C) purchase from a willing seller.

(7) Additions to the Outstanding Natural Area

Any lands or interest in lands adjacent to the Outstanding Natural Area acquired by the United States after May 8, 2008, shall be added to and administered as part of the Outstanding Natural Area.

(8) Overflights

Nothing in this section or the management plan shall be construed to—

(A) restrict or preclude overflights, including low level overflights, military, commercial, and general aviation overflights that can be seen or heard within the Outstanding Natural Area;

(B) restrict or preclude the designation or creation of new units of special use airspace or the establishment of military flight training routes over the Outstanding Natural Area; or

(C) modify regulations governing low-level overflights above the adjacent Monterey Bay National Marine Sanctuary.

(9) Law enforcement activities

Nothing in this section shall be construed to preclude or otherwise affect coastal border security operations or other law enforcement activities by the Coast Guard or other agencies within the Department of Homeland Security, the Department of Justice, or any other Federal, State, and local law enforcement agencies within the Outstanding Natural Area.

(10) Native American uses and interests

In recognition of the past use of the Outstanding Natural Area by Indians and Indian tribes for traditional cultural and religious purposes, the Secretary shall ensure access to the Outstanding Natural Area by Indians and Indian tribes for such traditional cultural and religious purposes. In implementing this subsection, the Secretary, upon the request of an Indian tribe or Indian religious community, shall temporarily close to the general public use of one or more specific portions of the Outstanding Natural Area in order to protect the privacy of traditional cultural and religious activities in such areas by the Indian tribe or Indian religious community. Any such closure shall be made to affect the smallest practicable area for the minimum period necessary for such purposes. Such access shall be consistent with the purpose and intent of Public Law 95–341 (42 U.S.C. 1996 et seq.; commonly referred to as the “American Indian Religious Freedom Act”).

(11) No buffer zones

The designation of the Outstanding Natural Area is not intended to lead to the creation of

protective perimeters or buffer zones around [the] area. The fact that activities outside the Outstanding Natural Area and not consistent with the purposes of this section can be seen or heard within the Outstanding Natural Area shall not, of itself, preclude such activities or uses up to the boundary of the Outstanding Natural Area.

(e) Authorization of appropriations

There are authorized to be appropriated such sums as are necessary to carry out this section.

Jupiter Inlet Lighthouse Outstanding Natural

Area [43 U.S.C. 1787] [(Pub. L. No. 110-229, title II, § 202, May 8, 2008, 122 Stat. 763)].

(a) Definitions

In this section:

(1) Commandant

The term “Commandant” means the Commandant of the Coast Guard.

(2) Lighthouse

The term “Lighthouse” means the Jupiter Inlet Lighthouse located in Palm Beach County, Florida.

(3) Local partners

The term “Local Partners” includes—

- (A)** Palm Beach County, Florida;
- (B)** the Town of Jupiter, Florida;
- (C)** the Village of Tequesta, Florida; and
- (D)** the Loxahatchee River Historical Society.

(4) Management plan

The term “management plan” means the management plan developed under subsection (c)(1).

(5) Map

The term “map” means the map entitled “Jupiter Inlet Lighthouse Outstanding Natural Area” and dated October 29, 2007.

(6) Outstanding Natural Area

The term “Outstanding Natural Area” means the Jupiter Inlet Lighthouse Outstanding Natural Area established by subsection (b)(1).

(7) Public land

The term “public land” has the meaning given the term “public lands” in section 103(e) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702(e)).

(8) Secretary

The term “Secretary” means the Secretary of the Interior.

(9) State

The term “State” means the State of Florida.

(b) Establishment of the Jupiter Inlet Lighthouse Outstanding Natural Area

(1) Establishment

Subject to valid existing rights, there is established for the purposes described in paragraph (2) the Jupiter Inlet Lighthouse Outstanding Natural Area, the boundaries of which are depicted on the map.

(2) Purposes

The purposes of the Outstanding Natural Area are to protect, conserve, and enhance the unique and nationally important historic, natural, cultural, scientific, educational, scenic, and recreational values of the Federal land surrounding the Lighthouse for the benefit of present generations and future generations of people in the United States, while—

- (A)** allowing certain recreational and research activities to continue in the Outstanding Natural Area; and
- (B)** ensuring that Coast Guard operations and activities are unimpeded within the boundaries of the Outstanding Natural Area.

(3) Availability of map

The map shall be on file and available for public inspection in appropriate offices of the Bureau of Land Management.

(4) Withdrawal**(A) In general**

Subject to valid existing rights, subsection (e), and any existing withdrawals under the Executive orders and public land order described in subparagraph (B), the Federal land and any interests in the Federal land included in the Outstanding Natural Area are withdrawn from—

- (i) all forms of entry, appropriation, or disposal under the public land laws;
- (ii) location, entry, and patent under the mining laws; and
- (iii) operation of the mineral leasing and geothermal leasing laws and the mineral materials laws.

(B) Description of Executive orders

The Executive orders and public land order described in subparagraph (A) are—

- (i) the Executive Order dated October 22, 1854;
- (ii) Executive Order No. 4254 (June 12, 1925); and
- (iii) Public Land Order No. 7202 (61 Fed. Reg. 29758).

(c) Management plan**(1) In general**

Not later than 3 years after May 8, 2008, the Secretary, in consultation with the Commandant, shall develop a comprehensive management plan in accordance with section 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712) to—

- (A) provide long-term management guidance for the public land in the Outstanding Natural Area; and
- (B) ensure that the Outstanding Natural Area fulfills the purposes for which the Outstanding Natural Area is established.

(2) Consultation; public participation

The management plan shall be developed—

- (A) in consultation with appropriate Federal, State, county, and local government agencies, the Commandant, the Local Partners, and other partners; and
- (B) in a manner that ensures full public participation.

(3) Existing plans

The management plan shall, to the maximum extent practicable, be consistent with existing resource plans, policies, and programs.

(4) Inclusions

The management plan shall include—

- (A) objectives and provisions to ensure—
 - (i) the protection and conservation of the resource values of the Outstanding Natural Area; and
 - (ii) the restoration of native plant communities and estuaries in the Outstanding Natural Area, with an emphasis on the conservation and enhancement of healthy, functioning ecological systems in perpetuity;
- (B) objectives and provisions to maintain or recreate historic structures;
- (C) an implementation plan for a program of interpretation and public education about the natural and cultural resources of the Lighthouse, the public land surrounding the Lighthouse, and associated structures;
- (D) a proposal for administrative and public facilities to be developed or improved that—

- (i) are compatible with achieving the resource objectives for the Outstanding Natural Area described in subsection (d)(1)(A)(ii); and
- (ii) would accommodate visitors to the Outstanding Natural Area;

(E) natural and cultural resource management strategies for the Outstanding Natural Area, to be developed in consultation with appropriate departments of the State, the Local Partners, and the Commandant, with an emphasis on resource conservation in the Outstanding Natural Area and the interpretive, educational, and long-term scientific uses of the resources; and

(F) recreational use strategies for the Outstanding Natural Area, to be prepared in consultation with the Local Partners, appropriate departments of the State, and the Coast Guard, with an emphasis on passive recreation.

(5) Interim plan

Until a management plan is adopted for the Outstanding Natural Area, the Jupiter Inlet Coordinated Resource Management Plan (including any updates or amendments to the Jupiter Inlet Coordinated Resource Management Plan) shall be in effect.

(d) Management of the Jupiter Inlet Lighthouse Outstanding Natural Area

(1) Management

(A) In general

The Secretary, in consultation with the Local Partners and the Commandant, shall manage the Outstanding Natural Area—

- (i)** as part of the National Landscape Conservation System;
- (ii)** in a manner that conserves, protects, and enhances the unique and nationally important historical, natural, cultural, scientific, educational, scenic, and recreational values of the Outstanding Natural Area, including an emphasis on the restoration of native ecological systems; and
- (iii)** in accordance with the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and other applicable laws.

(B) Limitation

In managing the Outstanding Natural Area, the Secretary shall not take any action that precludes, prohibits, or otherwise affects the conduct of ongoing or future Coast Guard operations or activities on lots 16 and 18, as depicted on the map.

(2) Uses

Subject to valid existing rights and subsection (e), the Secretary shall only allow uses of the Outstanding Natural Area that the Secretary, in consultation with the Commandant and Local Partners, determines would likely further the purposes for which the Outstanding Natural Area is established.

(3) Cooperative agreements

To facilitate implementation of the management plan and to continue the successful partnerships with local communities and other partners, the Secretary may, in accordance with section 307(b) of the Federal Land [Policy] and Management Act of 1976 (43 U.S.C. 1737(b)), enter into cooperative agreements with the appropriate Federal, State, county, other local government agencies, and other partners (including the Loxahatchee River Historical Society) for the long-term management of the Outstanding Natural Area.

(4) Research activities

To continue successful research partnerships, pursue future research partnerships, and assist in the development and implementation of the management plan, the Secretary may, in accordance with section 307(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1737(a)), authorize the conduct of appropriate research activities in the Outstanding Natural Area for the purposes described in subsection (b)(2).

(5) Acquisition of land

(A) In general

Subject to subparagraph (B), the Secretary may acquire for inclusion in the Outstanding Natural Area any State or private land or any interest in State or private land that is—

(i) adjacent to the Outstanding Natural Area; and

(ii) identified in the management plan as appropriate for acquisition.

(B) Means of acquisition

Land or an interest in land may be acquired under subparagraph (A) only by donation, exchange, or purchase from a willing seller with donated or appropriated funds.

(C) Additions to the Outstanding Natural Area

Any land or interest in land adjacent to the Outstanding Natural Area acquired by the United States after May 8, 2008, under subparagraph (A) shall be added to, and administered as part of, the Outstanding Natural Area.

(6) Law enforcement activities

Nothing in this section, the management plan, or the Jupiter Inlet Coordinated Resource Management Plan (including any updates or amendments to the Jupiter Inlet Coordinated Resource Management Plan) precludes, prohibits, or otherwise affects—

(A) any maritime security, maritime safety, or environmental protection mission or activity of the Coast Guard;

(B) any border security operation or law enforcement activity by the Department of Homeland Security or the Department of Justice; or

(C) any law enforcement activity of any Federal, State, or local law enforcement agency in the Outstanding Natural Area.

(7) Future disposition of Coast Guard facilities

If the Commandant determines, after May 8, 2008, that Coast Guard facilities within the Outstanding Natural Area exceed the needs of the Coast Guard, the Commandant may relinquish the facilities to the Secretary without removal, subject only to any environmental remediation that may be required by law.

(e) Effect on ongoing and future Coast Guard operations

Nothing in this section, the management plan, or the Jupiter Inlet Coordinated Resource Management Plan (including updates or amendments to the Jupiter Inlet Coordinated Resource Management Plan) precludes, prohibits, or otherwise affects ongoing or future Coast Guard operations or activities in the Outstanding Natural Area, including—

(1) the continued and future operation of, access to, maintenance of, and, as may be necessitated for Coast Guard missions, the expansion, enhancement, or replacement of, the Coast Guard High Frequency antenna site on lot 16;

(2) the continued and future operation of, access to, maintenance of, and, as may be necessitated for Coast Guard missions, the expansion, enhancement, or replacement of, the military family housing area on lot 18;

(3) the continued and future use of, access to, maintenance of, and, as may be necessitated for Coast Guard missions, the expansion, enhancement, or replacement of, the pier on lot 18;

(4) the existing lease of the Jupiter Inlet Lighthouse on lot 18 from the Coast Guard to the Loxahatchee River Historical Society; or

(5) any easements or other less-than-fee interests in property appurtenant to existing Coast Guard facilities on lots 16 and 18.

(f) Authorization of appropriations

There are authorized to be appropriated such sums as are necessary to carry out this section.

TITLE VII

EFFECT ON EXISTING RIGHTS; REPEAL OF EXISTING LAWS; SEVERABILITY

Effect on Existing Rights

Sec. 701 [43 U.S.C. 1701 note].

(a) Nothing in this Act, or in any amendment made by this Act, shall be construed as terminating any valid lease, permit, patent, right-of-way, or other land use right or authorization existing on the date of approval of this Act.

(b) Notwithstanding any provision of this Act, in the event of conflict with or inconsistency between this Act and the Acts of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181a-1181j), and May 24, 1939 (53 Stat. 753), insofar as they relate to management of timber resources, and disposition of revenues from lands and resources, the latter Acts shall prevail.

(c) All withdrawals, reservations, classifications, and designations in effect as of the date of approval of this Act shall remain in full force and effect until modified under the provisions of this Act or other applicable law.

(d) Nothing in this Act, or in any amendments made by this Act, shall be construed as permitting any person to place, or allow to be placed, spent oil shale, overburden, or byproducts from the recovery of other minerals found with oil shale, on any Federal land other than Federal land which has been leased for the recovery of shale oil under the Act of February 25, 1920 (41 Stat. 437, as amended; 30 U.S.C. 181 et seq.).

(e) Nothing in this Act shall be construed as modifying, revoking, or changing any provision of

the Alaska Native Claims Settlement Act (85 Stat. 688, as amended; 43 U.S.C. 1601 et seq.).

(f) Nothing in this Act shall be deemed to repeal any existing law by implication.

(g) Nothing in this Act shall be construed as limiting or restricting the power and authority of the United States or—

(1) as affecting in any way any law governing appropriation or use of, or Federal right to, water on public lands;

(2) as expanding or diminishing Federal or State jurisdiction, responsibility, interests, or rights in water resources development or control;

(3) as displacing, superseding, limiting, or modifying any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more States or of two or more States and the Federal Government;

(4) as superseding, modifying, or repealing, except as specifically set forth in this Act, existing laws applicable to the various Federal agencies which are authorized to develop or participate in the development of water resources or to exercise licensing or regulatory functions in relation thereto;

(5) as modifying the terms of any interstate compact; or

(6) as a limitation upon any State criminal statute or upon the police power of the respective

States, or as derogating the authority of a local police officer in the performance of [his or her] duties, or as depriving any State or political subdivision thereof of any right it may have to exercise civil and criminal jurisdiction on the national resource lands; or as amending, limiting, or infringing the existing laws providing grants of lands to the States.

(h) All actions by the Secretary concerned under this Act shall be subject to valid existing rights.

(i) The adequacy of reports required by this Act to be submitted to the Congress or its committees shall not be subject to judicial review.

(j) Nothing in this Act shall be construed as affecting the distribution of livestock grazing revenues to local governments under the Granger-Thye Act (64 Stat. 85, 16 U.S.C. 580h), under the Act of May 23, 1908 (35 Stat. 260, as amended; 16 U.S.C. 500), under the Act of March 4, 1913 (37 Stat. 843, as amended; 16 U.S.C. 501), and under the Act of June 20, 1910 (36 Stat. 557).

Repeal of Laws Relating to Homesteading and Small Tracts

Sec. 702. Effective on and after the date of approval of this Act, the following statutes or parts of statutes are repealed except the effective date shall be on and after the tenth anniversary of the date of approval of this Act insofar as the listed homestead laws apply to public lands in Alaska:

Act of	Chapter	Section	Statute at Large	43 U.S. Code

9. Pittman Underground Water Act:				
Sept. 22, 1922	400		42:1012	356

(c) [the original Act does not include a section 703(b)]

[43 U.S.C. 270-12, 270-12 note] Effective on and after the tenth anniversary of the date of approval of this Act, section 2 of the Act of March 8, 1922 (42 Stat. 415, 416), as amended by section 2 of the Act of August 23, 1958 (72 Stat. 730), is further amended to read:

“The coal, oil, or gas deposits reserved to the United States in accordance with the Act of March 8, 1922 (42 Stat. 415; 43 U.S.C. 270-11 et seq.), as added to by the Act of August 17, 1961 (75 Stat. 384; 43 U.S.C. 270-13), and amended by the Act of October 3, 1962 (76 Stat. 740; 43 U.S.C. 270-13), shall be subject to disposal by the United States in accordance with the provisions of the laws applicable to coal, oil, or gas deposits or coal, oil, or gas lands in Alaska in force at the time of such disposal. Any person qualified to acquire coal, oil, or gas deposits, or the right to mine or remove the coal or to drill for and remove the oil or gas under the laws of the United States shall have the right at all times to enter upon the lands patented under the Act of March 8, 1922, as amended, and in accordance with the provisions hereof, for the purpose of prospecting for coal, oil, or gas therein, upon the approval by the Secretary of the Interior of a bond or undertaking to be filed with [the Secretary] as security for the payment of all damages to the crops and improvements on such lands by reason of such prospecting. Any person who has acquired from the United States the coal, oil, or gas deposits in any such land, or the right to mine, drill for, or remove the same, may reenter and occupy so much of the surface thereof incident to the mining and removal of the coal, oil, or gas therefrom, and mine and remove the coal or drill for and remove oil and gas upon payment of the damages caused thereby to the owner thereof, or upon giving a good and sufficient bond or undertaking in an action instituted in any competent court to ascertain and fix said damages: *Provided*, That the owner under such limited patent shall have the right to mine the coal for use on the land for domestic purposes at any time prior to the

disposal by the United States of the coal deposits: *Provided further*, That nothing in this Act shall be construed as authorizing the exploration upon or entry of any coal deposits withdrawn from such exploration and purchase."

(d) Section 3 of the Act of August 30, 1949 (63 Stat. 679; 43 U.S.C. 687b et seq.), [43 U.S.C. 687b-2] is amended to read:

"Notwithstanding the provisions of any Act of Congress to the contrary, any person who prospects for, mines, or removes any minerals from any land disposed of under the Act of August 30, 1949 (63 Stat. 679), shall be liable for any damage that may be caused to the value of the land and tangible improvements thereon by such prospecting for, mining, or removal of minerals. Nothing in this section shall be construed to impair any vested right in existence on August 30, 1949."

Repeal of Withdrawal Laws

Sec. 704.

(a) Effective on and after the date of approval of this Act, the implied authority of the President to make withdrawals and reservations resulting from acquiescence of the Congress (*U.S. v. Midwest Oil Co.*, 236 U.S. 459) and the following statutes and parts of statutes are repealed:

Act of	Chapter	Section	Statute at Large	43 U.S. Code
Oct. 2, 1888	1069		25:527	662.
Only the following portion under the section headed U.S. Geological survey: The last sentence of the paragraph relating to investigation of irrigable lands in the arid region, including the proviso at the end thereof.				
Mar. 3, 1891	561	24	26:1103	16 U.S.C. 471.
Mar. 1, 1893	183	21	27:510	33 U.S.C. 681.
Aug. 18, 1894	301	4	28:422	641.
Only that portion of the first sentence of the second paragraph beginning with "and the Secretary of the Interior" and ending with "shall not be approved."				
May 14, 1898	299	10	30:413	687a-4.
Only the fifth proviso of the first paragraph.				
June 17, 1902	1093	3	32:388	416.
Only that portion of section three preceding the first proviso.				
Apr. 16, 1906	1631	1	34:116	561.
Only the words "withdraw from public entry any lands needed for townsite purposes", and also after the word "case", the word "and".				
June 27, 1906	3559	4	34:520	561.
Only the words "withdraw and".				

Act of	Chapter	Section	Statute at Large	43 U.S. Code
Mar. 15, 1910	96		36:237	643.
June 25, 1910	421	1, 2	36:847	141, 142, 16 U.S.C. 471(a).
All except the second and third provisos.				
June 25, 1910	431	13	36:858	148.
Mar. 12, 1914	37	1	38:305	975b.
Only that portion which authorizes the President to withdraw, locate, and dispose of lands for townsites.				
Oct. 5, 1914	316	1	38:727	569(a).
June 9, 1916	137	2	39:219	
Under "Class One," only the words "withdrawal and."				
Dec. 29, 1916	9	10	39:865	300.
June 7, 1924	348	9	43:655	16 U.S.C. 471.
Aug. 19, 1935	561	"Sec. 4"	49:661	22 U.S.C. 277c.
In "Sec. 4", only paragraph "c" except the proviso thereof.				
Mar. 3, 1927	299	4	44:1347	25 U.S.C. 398d.
Only the proviso thereof.				
May 24, 1928	729	4	45:729	49 U.S.C. 214.
Dec. 21, 1928	42	9	45:1063	617h.
Mar. 6, 1946	58		69:36	617h.
First sentence only.				
June 16, 1934	557	"Sec. 40(a)"	48:977	30 U.S.C. 229a.
The proviso only.				
May 1, 1936	254	2	49:1250	
May 31, 1938	304		52:593	25 U.S.C. 497.
July 20, 1939	334		53:1071	16 U.S.C. 471b.
May 28, 1940	220	1	54:224	16 U.S.C. 552a.
All except the second proviso.				
Apr. 11, 1956	203	8	70:110	620g.
Only the words "and to withdraw public lands from entry or other disposition under the public land laws."				
Aug. 10, 1956	Chapter 949	9772	70A:588	10 U.S.C. 4472, 9772.
Aug. 16, 1952	P.L. 87-590	4	76:389	616c.
Only the words "and to withdraw public lands from entry or other disposition under the public land laws."				

(b) The second sentence of the Act of March 6, 1946 (60 Stat. 36; 43 U.S.C. 617(h)), [43 U.S.C. 617h] is amended by deleting "Thereafter, at the direction of the Secretary of the Interior, such lands" and by substituting therefor the following: "Lands found to be practicable of irrigation and reclamation by irrigation works and withdrawn under the Act of March 6, 1946 (43 U.S.C. 617(h))."

Repeal of Law Relating to Administration of Public Lands

Sec. 705.

(a) Effective on and after the date of approval of this Act, the following statutes or parts of statutes are repealed:

Act of	Chapter	Section	Statute at Large	43 U.S. Code
1. Mar. 2, 1895	174		28:744	176.
2. June 28, 1934	865	8	48:1272	315g.
June 26, 1936	842	3	49:1976, title I.	
June 19, 1948	548	1	62:533	
July 9, 1962	P.L. 87-524		76:140	315g-1.
3. Aug. 24, 1937	744		50:748	315p.
4. Mar. 3, 1909	271	2d proviso only.	35:845	772.
June 25, 1910	J. Res. 40		36:884	
5. June 21, 1934	689		48:1185	871a.
6. Revised Statute 2447				1151.
Revised Statute 2448				1152.
7. June 6, 1874	223		18:62	1153; 1154.
8. Jan. 28, 1879	30		20:274	1155.
9. May 30, 1894	87		28:84	1156.
10. Revised Statute 2471				1191.
Revised Statute 2472				1192.
Revised Statute 2473				1193.
11. July 14, 1960	P.L. 86-649	101-202(a), 203-204(a), 301-303.	74:506	1361, 1362, 1363-1383.
12. Sept. 26, 1970	P.L. 91-429		84:885	1362a.
13. July 31, 1939	401	1, 2	53:1144	

Repeal of Laws Relating to Rights-of-Way

Sec. 706.

(a) Effective on and after the date of approval of this Act, R.S. 2477 (43 U.S.C. 932) is repealed in its entirety and the following statutes or parts of statutes are repealed insofar as they apply to the issuance of rights-of-way over, upon, under, and through the public lands and lands in the National Forest System:

Act of	Chapter	Section	Statute at Large	43 U.S. Code
Revised Statutes 2339				661.
The following words only: "and the right-of-way for the construction of ditches and canals for the purpose herein specified is acknowledged and confirmed: but whenever any person, in the construction of any ditch or canal, injures or damages the possession of any settler on the public domain, the party committing such injury or damages shall be liable to the party injured for such injury or damage."				
Revised Statutes 2340				661.
The following words only: "or rights to ditches and reservoirs used in connection with such water rights,"				
Feb. 26, 1897	335		29:599	664.
Mar. 3, 1899	427	1	30:1233	665, 958, (16 U.S.C. 525).
The following words only: "that in the form provided by existing law the Secretary of the Interior may file and approve surveys and plots of any right-of-way for a wagon road, railroad, or other highway over and across any forest reservation or reservoirs site when in [the Secretary's] judgment the public interests will not be injuriously affected thereby."				
Mar. 3, 1975	152		18:482	934-939.
May 14, 1898	299	2-9	30:409	942-1 to 942-9.
Feb. 27, 1901	614		31:815	943.
June 26, 1906	3548		34:481	944.
Mar. 3, 1891	561	18-21	26:1101	946-949.
Mar. 4, 1917	184	1	39:1197	
May 28, 1926	409		44:668	
Mar 1, 1921	93		41:1194	950.
Jan. 13, 1897	11		20:484	952-955.
Mar. 3, 1923	219		42:1437	
Jan. 21, 1895	37		28:635	951, 956, 957.
May 14, 1896	179		29:120	
May 11, 1898	292		30:404	
Mar. 4, 1917	184	2	39:1197	
Feb. 15, 1901	372		31:790	959 (16 U.S.C. 79, 522).
Mar. 4, 1911	238		36:1253	951 (16 U.S.C. 5, 420, 523).

Only the last two paragraphs under the subheading "Improvement of the National Forests" under the heading "Forest Service."

Act of	Chapter	Section	Statute at Large	43 U.S. Code
May 27, 1952	338		66:95	
May 21, 1896	212		29:127	962-965.
Apr. 12, 1910	155		36:296	966-970.
June 4, 1897	2	1	30:35	16 U.S.C. 551.
Only the eleventh paragraph under Surveying the public lands.				
July 22, 1937	517	31, 32	50:525	7 U.S.C. 1010-1012.
Sept. 3, 1954	1255	1	68:1146	931c.
July 7, 1960	Public Law 86-608		74:363	40 U.S.C. 345c.
Oct. 23, 1962	Public Law 87-852	1-3	76:1129	40 U.S.C. 319-319c.
Feb. 1, 1905	288	4	33:628	16 U.S.C. 524.

(b) Nothing in section 706(a), [43 U.S.C. 1701 note] except as it pertains to rights-of-way, may be construed as affecting the authority of the Secretary of Agriculture under the Act of June 4, 1897 (30 Stat. 35, as amended, 16 U.S.C. 551); the Act of July 22, 1937 (50 Stat. 525, as amended, 7 U.S.C. 1010-1212); or the Act of September 3, 1954 (68 Stat. 1146, 43 U.S.C. 931c).

Severability

Sec. 707 [43 U.S.C. 1701 note]. If any provision of this Act or the application thereof is held invalid, the remainder of the Act and the application thereof shall not be affected thereby.

Approved October 21, 1976.

This article originally appeared in *Arizona Law Review*, vol. 21, no. 2, pp. 285-300.

The “organic act” originally proposed by the Administration in 1971 for the Bureau of Land Management (BLM) was a relatively simple document.¹ The proposed legislation would have repealed several hundred outdated and duplicative laws, provided BLM with broad policy guidelines and management tools, and given BLM disposal and enforcement authority. However, by the time the Federal Land Policy and Management Act was passed in 1976, it had become a lengthy, complex document, much more than an organic act.² In addition to broad management guidelines and authority, the Federal Land Policy and Management Act (FLPMA) provides legislative direction to numerous specific interests and areas of management.

Perhaps in recognition of the importance of the Act, particularly to the western States and because of its complex origins, the Senate Committee on Energy and Natural Resources in 1978 published a committee print, *Legislative History of the Federal Land Policy and Management Act of 1976*.³ Prefacing the document is a memorandum in which Senator Henry M. Jackson, Chairman, summarizes for fellow committee members the background and need for the Act. He concludes with this statement:

The Federal Land Policy and Management Act of 1976 represents a landmark achievement in the management of the public lands of the United States. For the first time in the long history of the public lands, one law provides comprehensive authority and guidelines for the administration and protection of the Federal lands and their resources under the jurisdiction of the Bureau of Land Management. This law enunciates a Federal policy of retention of these lands for multiple use management and repeals many obsolete public land laws which heretofore hindered effective land use planning for and management of public lands. The policies contained in the Federal Land Policy and Management Act will shape the future development and conservation of a valuable national asset, our public lands.⁴

Much has been written about the significance of the Federal Land Policy and Management Act, its meaning and impact, and its relationship to the report, *One Third of the Nation's Land*, issued in June 1970 by the Public Land Law Review Commission. This Article will discuss briefly the legislative history of the policies and provisions set forth in the Act.

Curiously, recreation was the subject of the first piece of public land legislation that might be considered a predecessor of FLPMA. In February 1970, Senators Jackson and Moss introduced into the 91st Congress a bill designed to improve outdoor recreation activities on the public lands administered by the Bureau of Land Management. The bill, S. 3389, was passed by the Senate on October 7, 1970,⁵ about four months after the report by the Public Land Law Review Commission was released. The Senate committee's report on S. 3389 acknowledged that the bill embodied some of the recommendations made by the Public Land Law Review Commission. The report identified needs of the public lands and shortcomings of management:

Years of neglect have created many problems on the public lands administered by the Bureau of Land Management. Lack of regulations and enforcement authority have resulted in wanton vandalism and destruction of resources. Lack of sanitation facilities has created health hazards. Littering, overuse, and neglect have created unsightly blights on the landscape. Lack of public access has locked up millions of acres of public land for the private use of but a few, and many outstanding hunting, fishing, and other recreation opportunities are not available. As a

result of the lack of enforcement authority and interpretive and restoration work, irreplaceable archeological values have been lost.⁶

S. 3389 recognized that the public lands administered by BLM are vital national assets that contain a wide variety of natural resource values, including outdoor recreation value, which should be developed and administered "for multiple use and sustained yield of the several products obtainable therefrom for the maximum benefit of the general public."⁷ The bill contained a definition of multiple use,⁸ which in substantial parts is the same as the definition in FLPMA,⁹ and a definition of sustained yield¹⁰ also quite similar to that in FLPMA.¹¹

S. 3389 would have given the Secretary of the Interior the authority to acquire lands or interests necessary to provide access by the general public to public lands for outdoor recreational purposes. It also would have authorized allocation of Land and Water Conservation Fund money for this purpose.¹² Of more interest perhaps is the fact that S. 3389 would have provided comprehensive enforcement authority to the Bureau of Land Management. It made violations of public land laws and regulations of the Secretary relating to the protection of the public lands a violation punishable by a fine of not more than \$500 or imprisonment for not more than six months or both.¹³ It also provided that the Secretary could authorize BLM personnel to make arrests for violations of laws and regulations.¹⁴

No action was taken on S. 3389 by the House of Representatives.

In the 92d Congress, the Interior and Insular Affairs Committees of both the House and the Senate reported out bills relating to the management of the public lands. The Senate committee had before it two bills: Senators Jackson, Anderson, Cranston, Hart, Humphrey, Magnuson, Metcalf, and Nelson co-sponsored a bill, S. 921, “[t]o provide for the protection, development, and enhancement of the public lands, to provide for the development of federally-owned minerals, and for other purposes.”¹⁵ At the same time, Senators Jackson and Allott co-sponsored at the Administration’s request S. 2401 “[to provide for the management, protection and development of the national resource lands, and for other purposes.”¹⁶

As its title indicated, S. 921 addressed not only the management of the public lands but also the disposal of federally-owned minerals. Title II of that bill would have been cited as the “Federal Land Mineral Leasing Act of 1971.” It would have replaced and repealed both the Mining Law of 1872 and the Mineral Leasing Act of 1920, as well as several other mineral-related laws. Since S. 2401 was the Administration’s proposal it will be described in somewhat more detail than other forerunners of FLPMA. This fuller analysis will afford a basis for comparison between what the Administration sought as an organic act for the Bureau of Land Management and what Congress finally enacted.

S. 2401 had a short two-paragraph declaration of congressional policy: (1) that the national interest would best be served by retaining the national resource lands in federal ownership except where the Secretary of the Interior determined that disposal of particular tracts was consistent with the purposes, terms, and conditions of the Act, and

(2) that the lands be managed under principles of multiple use and sustained yield in a manner which would, “using all practicable means and measures,” protect the environmental quality of those lands to assure their continued value for present and future generations.¹⁷

The bill prohibited the use, occupancy, or development of the national resource lands contrary to any regulation issued by the Secretary or to any order issued under a regulation.¹⁸ S. 2401 also specified that an inventory of all national resource lands and their resources be maintained and that priority be given to areas of critical environmental concern.¹⁹ Development and maintenance of land use plans would be required and management of the lands would be in accordance with these plans. Specific guidelines were provided. These included, among others, a requirement for land reclamation as a condition of use and revocation of permits upon violation of secretarial regulations or state and federal air or water quality standards and implementation plans. Also included was a requirement for prompt development of regulations for the protection of areas of critical environmental concern.²⁰

Another provision of S. 2401 authorized the Secretary to sell public lands if [he or she] found that the sale would lead to significant improvement in the management of national resource lands or if [the Secretary] found that it would serve important public objectives which could not be achieved prudently and feasibly on land other than national resource lands. Sales were to be made at not less than fair market value.²¹ Generally, conveyances of title were to reserve minerals to the United States, together with the right to develop them. However,

¹⁵ S. 921, 92d Cong., 1st Sess., 117 CONG. REC. 3558-61 (1971).

¹⁶ S. 2401, 92d Cong., 1st Sess., 117 CONG. REC. 28956 (1971). S. 2401 referred to the lands administered by the Bureau of Land Management as “national resource lands.” This term was being used at the time by the Bureau and the Department of the Interior in an effort to establish a more representative and mission-oriented identification for the lands than the less specific expression “public lands.”

¹⁷ S. 2401, 92d Cong., 1st Sess. § 3 (1971).

¹⁸ *Id.* § 4.

¹⁹ *Id.* § 5.

²⁰ *Id.* § 7.

²¹ *Id.* § 8.

the Secretary could grant full fee title if [he or she] found there were no minerals on the land or that reservation of mineral rights would interfere with or preclude development of the land and that such development was a more beneficial use of the land than mineral development. The Secretary would also have been required to insert in document of conveyance terms and conditions [he or she] considered necessary to insure proper land use, environmental integrity, and protection of the public interest. In the event an area which the Secretary identified as an area of critical environmental concern was conveyed out of federal ownership, the Secretary would be required to provide for the continued protection of the area in the patent or other document of conveyance.²² Liberal acquisition and exchange authority was provided by the bill.²³

S. 2401, as introduced, would have made violations of regulations adopted to protect national resource lands, other public property and public health, safety and welfare a misdemeanor punishable by a fine of not more than \$10,000 or imprisonment for not more than one year or both. It would have allowed the Secretary to designate employees as special officers authorized to make arrests or serve citations for violations committed on the public lands.²⁴ The bill also provided for public hearings, where appropriate, to give federal, state, and local governments and the public an opportunity to comment on "the formulation of standards and criteria in the preparation and execution of plans and programs and in the management of the national resource lands."²⁵ It specifically required that any proposed "significant change in land use plans and regulations pertaining to areas of critical environmental concern be the subject of a public hearing."²⁶ Finally, the bill authorized the

appropriation of such sums "as are necessary to carry out the purposes of this Act"²⁷ and repealed a long list of prior laws.²⁸

As reported out by the Senate Committee on Interior and Insular Affairs, S. 2401 contained a few significant changes and additions. Specific examples of areas of critical environmental concern were deleted, leaving only a short definition of the term. The statement of congressional policy was expanded, and the fine for violation of a regulation was reduced to \$1,000. There was a requirement that the Director of the Bureau of Land Management be appointed by the President, with the advice and consent of the Senate. The Director would have to possess a broad background and experience in public land and natural resources management.²⁹ There was no provision for repeal of any public land laws.³⁰

Eight members voted for and four against reporting S. 2401 out of the Senate Committee on Interior and Insular Affairs. The minority statement of Senators Hansen, Fannin, Hatfield, and Bellmon expressed agreement with the comment of President Nixon in his 1972 Environmental Message that this type of legislation was "something which we have been without for too long."³¹ However, these Senators felt that the legislation had been the subject of too little discussion by the Committee. They noted that the bill granted broad authority to the Secretary of the Interior, but just how broad this authority was had never been discussed. Their view was that the legislation was too important to deal with in a hasty manner, and that the Committee should have the opportunity to study and analyze the legislation during the next session of Congress.³² As a matter of fact, the Committee studied, discussed, and

analyzed the legislation for two more Congresses before an organic act was enacted into law. The full Senate did not consider S. 2401 in the 92d Congress. As will be seen, many provisions of S. 2401 considered by the 92d Congress were enacted in the Federal Land Policy and Management Act of 1976, sometimes with only subtle changes or differences in emphasis.

The Interior and Insular Affairs Committee of the House of Representatives followed a different approach in the 92d Congress. That committee did not consider the Administration proposal but considered and reported out instead H.R. 7211,³³ a bill that had been introduced by Chairman Wayne Aspinall on behalf of himself and Congressmen Baring, Taylor, Udall, and Kyl. Although as introduced, H.R. 7211 would have been cited as the “Public Land Policy Act of 1971,” when it was reported out its title was changed to “National Land Policy, Planning, and Management Act of 1972.” The reported bill was a comprehensive piece of legislation designed to reflect as many as possible of the policies and recommendations of the Public Land Law Review Commission.³⁴ Included was an extensive statement of findings, goals, and objectives.³⁵

The stated objective of H.R. 7211 was to provide for an overall land use planning effort on the part of all public land management agencies and to strengthen management by providing statutory guidelines applicable to all agencies having jurisdiction over the public lands. The goal was management practices that would be more uniform, more easily administered, and more easily understood by

the public.³⁶ Title II of the bill, “National Land Use Planning,” provided for federal grants to eligible states to be used in developing comprehensive land use planning. The bill contained detailed descriptions of the requirements to be met, specific provision as to how and for what the funds allotted could be expended, specifications for financial recordkeeping, and provisions for termination or suspension of the grants if the Secretary found that the state’s comprehensive land use planning process no longer met the requirements of the bill or that the state was making no substantial progress toward the development of a comprehensive land use planning process.³⁷

Title III of H.R. 7211 addressed “Coordination of Land Use Planning and Policy.” It would have established within the Department of the Interior an Office of Land Use Policy and Planning to administer the grant-in-aid program under Title II and to coordinate between Title II programs with the planning responsibilities of the federal government spelled out in Title IV. The Committee report on H.R. 7211 stated: “To insure the absence of any mission-orientation in such administration and coordination, the Office is separate from any existing bureau or agency in the Department.”³⁸ The bill as reported out of Committee also would have established a complex advisory system that included a National Land Use Policy and Planning Board,³⁹ land use policy coordinators appointed by the Board members,⁴⁰ Departmental Advisory Committees,⁴¹ and local advisory councils.⁴²

⁴² *Id.* § 307, 118 CONG. REC. at 27179.

Title IV of H.R. 7211 was “Public Land Policy and Planning.” The term “public lands” was defined as “any lands owned by the United States without regard to how the United States acquired ownership, and without regard to the agency having responsibility for management thereof.”⁴³ Excluded were lands held in trust for the Indians, Aleuts, and Eskimos and certain lands acquired by the General Services Administration and other federal agencies.⁴⁴ Thus, the coverage of H.R. 7211 was far broader than had been proposed in any other of the public land bills before the Congress. Because many of the lands encompassed by its definition were covered by existing statutes, the bill declared specifically that the policies therein were supplemental to and not in derogation of the purposes for which units of the National Park System, National Forest System, and National Wildlife Refuge System were established and administered and for which public lands were administered by departments other than Agriculture and the Interior in the fulfillment of their statutory obligations.⁴⁵

Title IV of H.R. 7211 contained sixteen declarations of policy that were based generally on recommendations of the Public Land Law Review Commission. The House Committee in its report recognized that each of the declarations would require additional legislative and administrative action.⁴⁶ An anticipated five to ten years would be required for the Congress to consider all the recommendations of the Commission and to develop the specific and detailed statutory language necessary to implement the recommendations that Congress agreed to. H.R. 7211 was designed to establish a “policy framework” within which the legislation to implement each policy could be contained, so that future congressional action could be on a coordinated basis.⁴⁷

The sixteen statements of policy are interesting as a reflection of the recommendations of the Public

Land Law Review Commission and in the light of the legislation finally enacted by Congress. Stated briefly, as they appear in the report of the House Committee, these recommended policies are:

- (1) Public lands generally be retained in federal ownership;
- (2) public land classifications be reviewed to determine the type of use that will provide maximum benefit for the general public in accordance with overall land use planning goals;
- (3) Executive withdrawals be reviewed to ascertain if they are of sufficient extent, adequately protected from encroachment, and in accordance with the overall land use planning goals of the Act, with a view toward securing a permanent statutory base for units of the National Park, Forest, and Wildlife Refuge Systems;
- (4) Congress exercise withdrawal authority generally and establish specific guidelines for limited Executive withdrawals;
- (5) public land management agencies be required to establish and adhere to administrative procedures;
- (6) statutory land use planning guidelines be established providing for management of the public lands generally on the basis of multiple use and sustained yield;
- (7) public lands be managed for protection of quality of scientific, scenic, historical, ecological, and archeological values; for preservation and protection of certain lands in their natural conditions; to reconcile competing demands; to provide habitat for fish and wildlife; and to provide for outdoor recreation;

⁴⁶ H.R. REP. NO. 92-1306, 92d Cong., 2d Sess. 35 (1972).

⁴⁷ *See id.* at 36.

- (8) fair market value generally be received for the use of the public lands and their resources;
- (9) equitable compensation be provided to users if use is interrupted prior to the end of the period for which use is permitted;
- (10) an equitable system be devised to compensate state and local governments for burdens borne by reason of the tax immunity of the federal land;
- (11) when public lands are managed to accomplish objectives unrelated to protection or development of public lands, the purpose and authority therefore be provided expressly by statute;
- (12) administration of public land programs by various agencies be similar;
- (13) uniform procedures for disposal, acquisition, and exchange be established by statute;
- (14) regulations for protection of areas of critical environmental concern be developed; and that authorizations for use of the public lands provide for revocation upon violation of applicable regulations;
- (15) persons engaging in extractive or other activities “likely to entail significant disturbance” be required to have a land reclamation plan and a performance bond guaranteeing such reclamation; and
- (16) the public lands be administered uniformly as to use and contractual liability conditions, except when otherwise provided by law.⁴⁸

In addition to the extensive declaration of policy, Title IV of H.R. 7211 contained provisions relating to inventory, planning, public land use, management directives, and executive withdrawals. The bill also provided enforcement authority to land managing agencies and made violations of regulations issued

by an agency head with reference to public lands administered by [him or her] punishable by fine or imprisonment or both. Title V of H.R. 7211 contained appropriation authorization, the repeal of many prior public land laws, and a series of definitions of terms used.

Time did not permit consideration of H.R. 7211 by the full House before the 92d Congress ended.

In the 93d Congress, the Senate had before it S. 424,⁴⁹ which Senator Jackson introduced on behalf of himself and Senators Bennett, Church, Gurney, Haskell, Humphrey, Inouye, Metcalf, Moss, Pastore, and Tunney. The Senate also had the Administration’s proposal, S. 1041.⁵⁰ On July 8, 1974, S. 424 was passed by the Senate by a vote of 71 to 1, with 28 members not voting.⁵¹ S. 424, with very few changes, was reintroduced in the 94th Congress as S. 507.⁵² The new bill applied only to national resource lands—those lands administered by the Bureau of Land Management except the Outer Continental Shelf.

S. 507 contained these basic provisions relating to land management:

- (1) management of the national resource lands under principles of multiple use and sustained yield;
- (2) a return of fair market value to the federal government for the use or sale of lands;
- (3) inventory;
- (4) emphasis on planning;
- (5) authority to issue regulations;
- (6) public participation;
- (7) advisory boards;
- (8) annual reports;

⁵⁰ S. 1041, 93d Cong., 1st Sess., 119 CONG. REC. 5741 (1973).

⁵¹ 120 CONG. REC. 22296 (1974).

⁵² S. 507, 94th Cong., 1st Sess., 121 CONG. REC. 1821 (1975).

- (9) general management authority with specific guidelines;
- (10) sales authority;
- (11) expanded exchange authority;
- (12) authority to convey reserved mineral interests;
- (13) reenactment of the Public Land Administration Act of 1960 to put all land managing authorities into one statute;
- (14) authority to issue recordable disclaimers of interest and to issue and correct patents;
- (15) to afford an opportunity to zone or otherwise regulate the use of land, a requirement to notify states and local governmental units with zoning authority of any proposal to convey lands;
- (16) authority to acquire land;
- (17) creation of a working capital fund;
- (18) enforcement authority;
- (19) authority in the Secretary to cooperate with state and local governments in the enforcement of state and local laws on national resource lands;
- (20) special provisions for cadastral survey operations and resource protection;
- (21) special provisions for long-range planning for the "California Desert Area";
- (22) provisions for oil shale revenues;
- (23) a complete consolidation and revision of the authority to grant rights-of-way; and
- (24) repeal of disposal, rights-of-way, and other statutes which this law was replacing.

S. 507, as passed by the Senate in the 94th Congress on February 25, 1976,⁵³ had these additional provisions that were not in S. 424 in the 93d Congress:

- (1) provisions for disposal of "omitted" lands;
- (2) amendments to the Mineral Leasing Act of 1920 to increase the percentage of revenues paid to states;
- (3) provision for mineral impact relief loans; and
- (4) provisions for recordation of mining claims and a conclusive presumption that any recorded claim for which the claimant did not make application for a patent within ten years after recordation is abandoned and therefor void.

There were two points of particular interest in the Senate floor debate on S. 507. The first point involved an amendment by Senator McClure that would have deleted from the provisions relating to mining claims the requirement that application for patents for mining claims be made within ten years.⁵⁴ The second point of particular interest involved grazing fees. Senator Hansen introduced an amendment that incorporated a formula for establishing a fee for grazing of domestic livestock on the public lands. The issue was vigorously debated on February 23

⁵³ 122 CONG. REC. 4423 (1976).

⁵⁴ Senator Haskell and Senator McClure debated the issue briefly. On the calling of the question, Senator Haskell noted the absence of a quorum. This led Senator McClure to withdraw his amendment saying:

Mr. President, I know that the Senate as a whole will probably follow the lead of the committee. If we have a roll call on this, I would anticipate that the majority of them walking through these doors would never have heard of this question before and would be very apt to follow the lead of the committee under those circumstances. Under those circumstances, I think it is likely that the result can be forecast.

In the expectation that this matter might be considered somewhat differently in the other body and with the full confidence that we can move forward on a comprehensive bill, perhaps before this bill has been passed and becomes law, I am suggesting, therefore, it might be varied by subsequent legislation or conference between the Senate and the other body on the Organic Act, and I will withdraw the amendment at this time.

112 CONG. REC. 4053 (1976). As Senator McClure anticipated, the provision was not in S. 507 as it passed the House. The conferees did not adopt the provision, and it is not in the Act.

and again on the 25th. The grazing fee was opposed by Senators Jackson and Metcalf and by the National Wildlife Federation and the American Forestry Association, all of whose letters of opposition appear in the Congressional Record.⁵⁵ The amendment was also opposed by the Administration and eventually was rejected 36 to 53.⁵⁶ On February 25, after this amendment was rejected, S. 507 was passed by the Senate 78 to 11, with 11 members not voting.⁵⁷

During the 93d and 94th Congresses, the Interior and Insular Affairs Committee of the House of Representatives was taking a different approach to public land legislation. Under the leadership of Representative John Melcher as Chairman, the Subcommittee on Public Lands held a series of meetings during which the members discussed and debated what they believed should be included in a bill. The Committee staff put proposed provisions into legislative language as the sessions went along. Committee prints were prepared and circulated for comment. By the end of the 93d Congress, eight prints had been prepared. Congressman John Dellenback had prepared a series of correcting amendments to the last print, but Congress adjourned before all the amendments could be incorporated into a bill. Two bills were actually introduced—H.R. 16676, and then H.R. 16800, a clean bill which corrected some errors discovered in the earlier bill.

During the 94th Congress the Public Lands Subcommittee of the House Interior Committee conducted additional work sessions that culminated in the introduction of H.R. 13777.⁵⁸ This bill as reported out by the Committee not only granted management and enforcement authorities to the Bureau for public lands under its jurisdiction but also applied to public domain lands in the National

Forest System. Some of the provisions relating to the Forest Service System were deleted when the bill was debated on the floor of the House. Passed by the House on July 22, 1976,⁵⁹ H.R. 13777 contained all the now-familiar provisions of previous bills plus many new ones. The new provisions included:

- (1) a grazing fee formula applicable to BLM-administered lands and lands in the National Forest System;
 - (2) provisions relating to duration of grazing leases applicable to BLM and National Forest System lands;
 - (3) requirements for grazing advisory boards, applicable to both BLM and Forest Service;
 - (4) provisions relating to wild horses and burros, also applicable to both BLM and Forest Service;
 - (5) amendment of what is frequently called the Unintentional Trespass Act;⁶⁰
 - (6) provisions relating to the “California Desert Conservation Areas;” and
 - (7) the “King Range National Conservation Area.”⁶¹
- After the House passed H.R. 13777, S. 507 was considered, amended to read as H.R. 13777 did, and passed.⁶²

As expected, the Senate disagreed to the amendments of the House and requested a conference. On July 30, 1976, Senate conferees were appointed: Jackson, Church, Metcalf, Johnston, Haskell, Bumpers, Hansen, Hatfield, and Fannin. Senator Fannin was replaced later by Senator McClure. Conferees from the House were Representatives Melcher, Johnson (Cal.), Seiberling,

⁶¹ These add-ons have sometimes been called the “Christmas-tree amendments.”

⁶² 122 CONG. REC. 23508 (1976).

Udall, Phillip Burton, Santini, Weaver, Steiger (Ariz.), Clausen and Young (Alaska). At an organizational meeting held on August 30, 1976, Congressman Melcher was elected chairman. The conferees determined that because of all the primaries scheduled for early September, the first working session of the conferees could not be held until September 15. Staff was instructed to study the Senate and House versions of S. 507, identify areas of virtual agreement, outline areas of disagreement, and recommend alternatives for resolving those areas of disagreement.

The first difference in text addressed by the conferees was the short title of the Act. The title of the House amendment was “Federal Land Policy and Management Act of 1976.” The title of the Senate amendment was “National Resource Lands Management Act.” The Senate staff deferred to the House staff on the title, and the conferees concurred. The second issue involved the term to be used in referring to lands administered by the Bureau of Land Management. The conferees adopted the term used by the House—public lands—although they recognized, as the staff pointed out, that in the past that had been a confusing term, referring sometimes to public domain lands and other times to acquired lands. And so it went. During four sessions, on September 15, 20, 21, and 22 and spanning more than twelve hours, the conferees had extensive discussions but relatively little problem agreeing to language to be incorporated into the Act—with four major exceptions. These exceptions almost killed the Act.

The House version of the Act contained a grazing fee formula and a provision for ten-year grazing permits.⁶³

It also provided for grazing district advisory boards, as distinct from the multiple use advisory councils.⁶⁴ The Senate conferees, particularly Senator Metcalf, objected to these provisions. The Senate version of the Act contained a provision that required mining claimants to make application for patent within ten years after the date of recordation of the claim. If the claimant failed to do so, the claim would be conclusively presumed to be abandoned and would be void.⁶⁵ The House conferees, particularly Congressman Santini, objected to this.

These issues of grazing and mining were debated extensively on September 22nd. Before the end of that five-hour session, Senator Metcalf offered a “package compromise.”⁶⁶ The proposed compromise required:

- (1) that the grazing fee provisions be deleted from the bill—in effect that the House would accede to the Senate on section 401;
- (2) that the Senate agree with the House on the already adopted Metcalf/Santini amendment that all grazing leases be for ten years;
- (3) that the conferees accept the grazing advisory boards with their functions limited to expenditure of range improvement fees;⁶⁷
- (4) with respect to the Senate language on mining claims, that the language be applicable only to mining claims filed after enactment of the Act, not pre-existing claims.

⁶³ R. 13777, 94th Cong., 1st Sess. §§ 210, 211, 122 CONG. REC. 23447-48 (1976).

⁶⁴ *Id* § 212, 122 CONG. REC. at 23448.

⁶⁵ S. 507, 94th Cong., 1st Sess., § 207, 122 CONG. REC. 23497 (1976).

⁶⁶ The proposal actually was brought to the conferees by D. Michael Harvey, Staff Counsel, because Senator Metcalf was at a meeting of the Committee on Committees.

⁶⁷ Mr. Harvey noted that this was as far as Senator Metcalf would go on an individual basis, but as part of the package he would add to the functions of the grazing advisory boards the development of the management allotment plans.

The conferees could not agree on the compromise that day but did agree to meet again on September 23rd just in advance of the Conference on the National Forest Management Act of 1976 that was due to start at 1:30 p.m. Several of the conferees on S. 507 were also on the Forest Act conference. The conferees convened at 1:10 p.m. on September 23rd. Congressman Santini offered a substitute compromise that would knock out advisory boards, have five-year leases in return for keeping grazing fees, and knock out the patent provisions. Senator Metcalf countered with a proposal to accept the first three amendments

he had offered and knock out the Senate language on mining. This was rejected by the Senate conferees and at 1:20 p.m., the Conference was adjourned by Chairman Melcher who said he saw no point in prolonging the meeting. For the moment, hopes dimmed for passage of an Organic Act for the Bureau of Land Management. The 94th Congress was in its last-minute rush before adjournment. But as with many pieces of landmark legislation, a compromise was reached at the eleventh hour, reportedly as a result of behind-the-scenes lobbying by interested private parties.⁶⁸

⁶⁸ The struggle to achieve an acceptable middle ground was reported in the October 7, 1976, issue of *Public Land News*:

How the BLM Organic Act came back from the grave in five days

The final, fateful meeting of the House-Senate conference committee that revived the BLM Organic Act pitted two unyielding antagonists—Sen. Lee Metcalf (D-Mont.) And Rep. James Santini (D-Nev.).

Simply put, Santini wanted a statutory grazing fee he co-authored to stay in the bill. Metcalf didn't.

So, on September 23, the conference deadlocked over the grazing fee when the House refused by a 5-5 vote to give up the provision. At the same time, the Senate conferees refused to allow the grazing fee to stay in. The bill was effectively dead for 1976 . . . or so the conferees said.

The deadlock began to give way the following day when the mining industry, principally the American Mining Congress, realized the Senate would give up its provision on requiring patent in 10 years. But only if the House dropped the grazing fee. The mining industry abhors the patent requirement.

So, the mining industry started pressuring the ranching industry to ask its Congressional allies to yield on the grazing fee, said sources in the cattle industry.

And Rep. John Melcher (D-Mont.)—chief sponsor of the House bill, candidate for the U.S. Senate—continued to push for a further compromise.

Pressure was applied primarily to Reps. Don Young (R-Alaska) and Don Clausen (R-Calif.), *PLNews* sources said.

Then on Tuesday morning (September 28) a meeting was held among the House supporters of the statutory grazing fee. They decided to yield on the grazing fee, reasoning that a freeze was better than no bill at all.

With that a meeting of the full conference was held in room S 224 of the Capitol at 5:30 p.m, just minutes after a compromise timber management bill had been hammered out in conference down the hall.

The last BLM conference, with only a half dozen attendees other than Congressmen and their staff, started badly. Metcalf and Santini, almost shouting at times, argued forcefully that each had already compromised too much. But Santini eventually offered a compromise on the grazing fee. It called for a statutory grazing fee for two years while a study was conducted. The Senate conferees refused to even consider it.

Then Clausen offered a compromise calling for freezing the present grazing fee, developed administratively by BLM and the Forest Service, for two years while a study was conducted. Again, the Senate refused to consider it.

Then the conferees, with no one in particular sponsoring it, agreed to consider a one-year freeze with study. Santini asked for and received a 30-minute break.

During the break, *PLNews* talked to representatives of the American National Cattlemen's Association and the Public Lands Council. They said, resignedly, the one-year freeze plus study was the most they could hope for, given the Senate conferees adamant opposition to anything else.

Finally, at 7 p.m. on September 28, the conferees reassembled and Melcher asked for a show of hands from the House members. He, Rep. James Johnson (R-Colo.), Rep. Harold T. Johnson (D-Calif.), Clausen, and Santini voted for the compromise. Metcalf said Reps. Mo Udall (D-Ariz.), Jim Weaver (D-Ore.), and John Seiberling (D-Ohio) also would have agreed to the compromise if they had been present.

On September 28, Congressman Melcher made a last minute effort to reach a compromise and get a public land management act in the 94th Congress. He called a meeting of the Conference Committee to commence at 5:30 p.m. that evening. The meeting was held in a very small room in the Congress. Very few persons, other than conferees and staff, were permitted in the room. Dozens of interested persons filled the halls and corridors leading to the meeting room. Within a few minutes of coming together, the conferees took a thirty-minute break. Word spread among the assembled crowd that the meeting was going badly. However, when the conferees reassembled at 7 p.m., those present voted almost immediately for

the compromise that had been suggested earlier. The conferees and staff walked quickly out of the conference room. As they made their way down the corridor, they received the quiet congratulations of the very interested group of people who had waited to hear the final outcome of the session.

In keeping with its somewhat stormy and cliffhanger history, the conference report was passed by the House on September thirtieth, and by the Senate on October first, just hours before the 94th session ended. The Act was signed by the President on October 21, 1976, and became Public Law 94-579, 90 Stat. 2743.

APPENDIX B

Amending Laws for the Federal Land Policy and Management Act

INDEX

Notes: Bold page numbers represent tables. An “n” following a page number indicates the entry occurs in a note. Acts of Congress are listed in chronological order by date of adoption. Court cases are listed alphabetically.

A

abandonments

- mining claims, 35
- permanent easements for water systems, 52, 53
- rights-of-way, 57–58

accounting and reporting requirements for FLAME funds, 42

acquisitions of public lands

- access over non-Federal lands, 13–14
- implementation provisions, 31
- Jupiter Inlet Lighthouse, 73–74
- Piedras Blancas Historic Light Station, 70
- roads, 53–54
- Schwartz article, 86, 89
- uniform procedures, 1–2
- Yaquina Head Outstanding Natural Area, 65
